2 The permits are printed in duplicate—one part for delivery to the importer and the second part for retention in the office of the Collector of the importing district

Permit in duplicate form

3 The importer, or his agent on arrival in the district from which the drug is to be exported, shall, within the time allowed in the permit, present it to the officer in charge of a bonded warehouse and apply for and obtain the requisite pass under the rules in force in the Punjab, a copy of the pass being at the same time sent by the District Officer to the Collector of the importing district After delivery from the warehouse, the *charas* shall be immediately taken to the nearest railway station by the importer or his agent, and shall be consigned by railway direct to the Collector of the importing district, to whom the railway receipt shall be sent by post in a registered cover

Procedure in the exporting district

4 On arrival of the consignment at the railway station in the importing district, the Collector will depute an Excise Officer to take delivery of it and produce it before the Excise Deputy Collector for examination, weighment, and comparison with the pass received from the exporting district in the Punjab The Deputy Collector shall see whether the package or packages are securely packed and sealed, or whether bulk has been broken during transit or the consignment has been tampered with in any other way

Examination of consignment on its arrival

5 Duty shall be charged at the rate of Rs 12 per seer, one half of which must be paid at the time of taking out the permit and the balance after the examination and weighment of the drug by the Excise Deputy Collector of the district in which the drug is to be sold or stored, as the case may be

Time of paying duty

6 After examination by the Excise Deputy Collector and realisation of the balance of duty, the drug will be made over to the importer for sale, an intimation being at once sent by post to the officer in charge of the exporting district of the due arrival of the consignment and realisation of the full duty on the same

Charas to be made over to the importer after levy of duty

7 If the *charas* does not arrive, and the pass be not returned within the time for which it is current, the importer must apply to the Collector of the importing district for an extension of time, failing which the *charas* in transit will be liable to confiscation as being unprotected by a pass.

Importer to apply for extension of time if necessary

8 The whole of a consignment will be liable to be dealt with under section 75 of the Bengal Excise Act, and the importer subjected to other penalties of the Excise laws if he imports a quantity greater or less than that shown to be the quantity covered by the pass, unless the difference is fully explained and full duty paid on the excess or deficiency, as the case may be

Confiscation and penalties

9 Every importer of *charas* will be bound to keep an account in Form No 122, Appendix A, of the quantity received and expended by him The form is intended for use in his dealings with licensed vendors only

Importer to keep an account

If, however, he wishes to dispose of the drug to persons other than licensed vendors, he shall take out a separate retail license for the retail vend in Form No 123 The retail license will be granted either under the auction or the fixed license fee system, as the Board may generally or especially direct

License required for retail sale.

10 If the importer disposes of any *charas* to a licensed vendor of the district in which the drug has been imported, he shall furnish such licensed dealer with a pass in Form No 123A, Appendix, under his own signature in order to protect the drug in transit to the retail shop

Pass for transport to a retail shop in the district

11 If the importer wishes to dispose of any *charas* to a licensed dealer of another district, he shall apply for and obtain a pass from the Collector of his own district in order to protect the drug in transit to such other district Such passes will be granted in duplicate free of charge in Form No 123B of Appendix A One part shall be given to the importer and other sent by post to the Collector of the district for which the drug is intended

Pass for transit to another district.

12 A register of permits for the importation of *charas* shall be kept in the Collector's Office in Form No 124, Appendix A

Register of permits

13 These rules apply only in the case of *charas* imported from the Punjab, and shall take effect from the 1st March 1901

License to sell charas by retail

NOTE.—Counterfoil of this will be signed by the licensee and filed in the Collector's office.

District

Number of license in Register No 7B

Name of vendor

Locality of shop

Be it known that resident of

pargana district of is hereby

authorized by the Collector of to open a shop for the sale by

retail of *charas* at in from the date of this license

to the 1st March 190

It is required of the holder of this license as the condition of this license remaining in force that he duly and faithfully perform and abide by the following articles —

I —That he pay to Government a tax of Rs in the following instalments —

II —That he effect sales of *charas* only in the shop for which this license is granted, and that he do not sell it in any other place or establish a second shop without a separate license

III —That he do not sell more than five tolahs of *charas* to any person at one time

IV —That he do not receive any wearing apparel or other goods in barter for *charas*

V —That he do not open his shop nor effect sales therein before sunrise, that he do not keep it open nor effect sales therein after 8 P M in the cold season (16th October to 15th March) and 9 P M in the hot season (16th March to 15th October), and that he do not harbour any person therein during the night

VI —That he do not permit persons of notoriously bad character to resort to his shop, that he prevent gaming and disorderly conduct therein, and that he give information to the nearest Magistrate or police officer of any suspected persons who may resort to his shop

VII —That he have constantly fixed up at the entrance of his shop a signboard bearing the following inscription in the vernacular language of the country —

(NAME OF VENDOR)

" *Licensed Vendor of Charas* "

VIII —That he do not sublet his shop or transfer his license to any other party or allow any person to sell *charas* under this license unless the name of such person shall have been previously registered in the Collector's office and endorsed by the Excise Deputy Collector on this license

IX —That he only obtain his *charas* from a licensed importer or by importing it himself under the rules for the importation of *charas* into Bengal. If he obtains the *charas* from a licensed importer of another district, it must be protected by a pass granted by the Collector of such other district if from an importer in the district for which his shop is licensed, he can transfer the *charas* to his shop under a pass signed by such importer

X.—That he keep a daily correct account of the receipt and sale of *charas* in the following form, to be balanced at the close of each day :—

STOCK RECEIVED							STOCK SOLD						Daily balance.

MILITARY SECRETARY'S OFFICE

NOTIFICATION

Calcutta, the 20th February 1901

No 175 M—His Excellency the Viceroy and Governor General will leave Calcutta at 10 33 P M, Calcutta time, on Wednesday, the 27th March 1901

His Excellency will visit the Nepal Terai, and arrive at Simla about the end of April

His Excellency's departure from Calcutta and arrival at Simla will be private

By Command,
E BARING, *Lieut -Col.,*
Military Secretary to the Viceroy

The following orders, issued by the Government of India in the Home Department, are republished for general information.

C E BUCKLAND,
Offg Chief Secy to the Govt of Bengal

NOTIFICATIONS

PUBLIC

Calcutta, the 20th February 1901

No 902—In exercise of the powers conferred by sections 17 and 27 of the Indian Arms Act (XI of 1878), the Governor General in Council is pleased to direct that the following further amendments shall be made in the Notification of the Government of India in the Home Department, No 518, dated the 6th March 1879, as amended by subsequent Notifications —

Paragraph I—*For* the words and figures " sections 13, 14 * * * * * * and ammunition ", *substitute*—

" section 14 of the Indian Arms Act, 1878 (XI of 1878), save in respect of cannon, articles designed for torpedo service, war rockets and machinery for the manufacture of arms and ammunition, and from the operation of all prohibitions

and directions contained in sections 13, 15 and 16 of the said Act, save as aforesaid and in respect of rifles of 303 bore, rifles of 450 or 577 bore of the Snider or Martini-Henry pattern, and ammunition for such rifles"

Paragraph VI—*Add* the following proviso (or additional proviso as the case may be) to Rules 2 (clause 1), 6, 6C, 13, 13A, 14, 15 and 16 —

"Provided that (*or* Provided also that) in the case of breech loading rifles and balled rifle ammunition the license shall not (except in the Presidency towns of Madras, Bombay and Calcutta, and in Rangoon, where the Commissioner of Police will continue to grant such licenses) be granted without the previous sanction of the Board of Revenue in Madras, of the Chief Commissioner in Assam and of the Commissioner of a Division in other Provinces"

NOTE—The reference to ammunition is not intended to be included in this proviso so far as the latter relates to Rule 13A

Paragraph VI—*Add* to Rule 2 (clause 1) the following proviso —

"Provided that no license for the transport of breech-loading rifles or balled rifle ammunition to a frontier district shall be granted without the previous sanction of the Local Government or, in the case of transport from Sind, of the Commissioner in Sind"

Paragraph VI—*Add* as a Note to Rule 5 —

NOTE—No such license will be granted for the importation of any rifles of 303 bore or of rifles of 450 or 577 bore of the Snider and Martini-Henry patterns.

Paragraph VI—*Add* to Rule 6 —

Licenses to export arms, other than cannon, or rifles not excepted in Rule 5, ammunition or military stores by sea to any place in His Majesty's dominions may be granted at the ports of Calcutta, Madras, Bombay, Rangoon, Calicut, Karachi and Aden by the Commissioner of Police in respect of each Presidency town and Rangoon and by the Magistrate of the District in respect of the others There shall be no fee payable in respect of such licenses which shall be given in Form IV of license forms annexed to these rules

Arms, ammunition or military stores in the possession of a passenger not exempted under Paragraph I above, arriving in a vessel bound for a Foreign Port and calling at a British Indian Port *en route* shall be detained by the Collector of Customs pending the departure of such passenger by sea

Paragraph VI – *Omit* the word "or" at the end of clause (*b*) of Rule 8 and *add* as clause (*d*) —

(*d*) in the case of breech loading rifles and balled rifle ammunition, whether the previous sanction of the Local Government (the Commissioner in Sind in the case of Sind) or other prescribed authority, as the case may be, has been obtained

Paragraph VI—*Add* to Rule 11 after the words "appended to these rules" —

"But licenses to manufacture, convert, keep or sell or keep for sale breech-loading rifles, rifle ammunition or military stores for rifles shall be granted only by the Local Government or, in the case of Sind, by the Commissioner in Sind, and shall be in Form VI—B or VII—B so appended. The Local Government may under this rule grant licenses to selected dealers to hold a certain amount of ammunition for rifles of 303 bore, or rifles of 450 or 577 bore of the Snider

or Martini-Henry pattern, on the condition that the license-holders shall not sell from this stock to any person who does not hold a license to possess any such ammunition "

Paragraph VI —Add the following new rule after Rule 13A :—

" 13B Licenses for the possession of reasonable quantities of balled ammunition which can be fired from rifles of the 303 bore or rifles of 450 or ·577 bore of the Snider or Martini-Henry pattern, shall be granted by the Commissioner of Police in the Presidency towns and in Rangoon, and by the Magistrate of the district outside those towns, in Form VIII prescribed by Rule 13 Such licenses shall be granted on application to any person lawfully in possession for sporting purposes of a rifle of the 303 bore, or a rifle of the 450 or 577 bore of the Snider or Martini Henry pattern, and shall state the amount of such balled ammunition which he may possess in the following twelve months Duly licensed dealers shall be allowed to import their balled ammunition up to the quantity stated in their licenses Upon every license produced in support of an application for leave to import, the quantity of ammunition to import which leave was given, and the date of giving it, shall be endorsed by the authority by whom leave is granted "

Form of renewing the License

Date and year of renewal	Date on which the renewed license expires	Signature of Commissioner of Police or Magistrate

1. This license is given subject to the provisions of "The Indian Arms Act, 1878," and the rules framed thereunder The attention of the holder is drawn to the sections of the Act quoted separately below

2 He shall keep registers of all arms and ammunition in stock and of all sales, in such form as the Local Government may from time to time direct.

3 He shall exhibit his stock and his registers on demand by any Magistrate, or by any Police officer not below the rank of Inspector

4 If any arms or ammunition covered by this license are lost or stolen, he shall at once give notice at the nearest Police station

N B—This condition may be omitted at the discretion of the Local Government.

5 He shall affix on a conspicuous part of his shop, or usual place of business, a signboard, on which shall be painted in large letters in English and in the Vernacular of the district his name and the words "Licensed to deal in arms, ammunition and military stores" He shall also post up in his shop a copy of section 28 of the Act either in the Vernacular of the district, or in English

6 He shall at the time of purchase endorse upon the license of every purchaser holding a license under Form VIII or IX—(1) the name and address of the person who takes delivery of the articles sold (2) the nature and amount of the articles sold, (3) the date of sale, and shall sign the endorsement

7 This license only covers sales of arms, ammunition or military stores effected upon the premises shown on the face of the license

8 This license expires on the 31st December of the year in which it is issued but the licensee can have it renewed by filing an application for its renewal on stamped paper of the prescribed value

9 This license does not authorize the licensee to possess Government arms or ammunition

Explanation.—A "Government arm" is a firearm or other weapon which is the property of the Government

"Government ammunition" is ammunition manufactured in any Government factory or which is prepared for and supplied to Government

---

Sections of the Indian Arms Act, 1878, referred to in Condition No 1

5 No person shall manufacture convert or sell, or keep, offer or expose for sale, any arms, ammunition or military stores, except under a license and in the manner and to the extent permitted thereby

Nothing herein contained shall prevent any person from selling any arms or ammunition which he lawfully possesses for his own private use to any person who is not by any enactment for the time being in force prohibited from possessing the same but every person so selling arms or ammunition to any person other than a person entitled to possess the same by reason of an exemption under section 27 of this Act shall, without unnecessary delay give to the Magistrate of the district, or to the Officer in charge of the nearest Police station, notice of the sale and of the purchaser's name and address

16 Any person possessing arms ammunition or military stores, the possession whereof by him has in consequence of the cancellation or expiry of a license * * * * * * * become unlawful shall deposit the same without unnecessary delay with the Officer in charge of the nearest Police station

If the owner of anything deposited under this section does not within three years from the date on which such thing is so deposited produce a license authorizing him to possess the same and apply for delivery of the same, such thing shall be forfeited to Her Majesty

19 Whoever commits any of the following offences (namely) —

(*a*) manufactures, converts or sells, or keeps, offers or exposes for sale any arms, ammunition or military stores in contravention of the provisions of section 5,

(*b*) fails to give notice as required by the same section;

* * * * * * * * * * * *

(*g*) intentionally makes any false entry in a record or account which, by a rule, * * * he is required to keep;

(*h*) intentionally fails to exhibit anything which, by a rule * * * * he is required to exhibit, or

(*i*) fails to deposit arms, ammunition or military stores, as required by * * section 16

shall be punished with imprisonment for a term which may extend to three years, or with fine, or with both

20 Whoever does any act mentioned in clause (*a*) * * * of section 19 in such manner as to indicate an intention that such act may not be known to any public servant as defined in the Indian Penal Code or to any person employed upon a Railway, or to the servant of any public carrier,

and whoever, on any search being made under section 25, conceals or attempts to conceal any arms, ammunition or military stores,

shall be punished with imprisonment for a term which may extend to seven years or with fine, or with both

21 Whoever, in violation of a condition subject to which a license has been granted, does or omits to do any act shall, when the doing or omitting to do such act is not punishable under section 19 or section 20 be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

22 Whoever knowingly purchases any arms, ammunition or military stores from any person not licensed or authorized under the proviso to section 5 to sell the same, or

delivers any arms, ammunition or military stores into the possession of any person without previously ascertaining that such person is legally authorized to possess the same

shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both

23 Any person violating any rule made under this Act, and for the violation of which no penalty is provided by this Act, shall be punished with imprisonment for a term which may extend to one month, or with fine which may extend to two hundred rupees, or with both

24. When any person is convicted of an offence punishable under this Act, committed by him in respect of any arms, ammunition or military stores, it shall be in the discretion of the convicting Court or Magistrate further to direct that the whole or any portion of such arms, ammunition or military stores, and any vessel cart or baggage animal used to convey the same, and any box, package or bale in which the same may have been concealed, together with the other contents of such box, package or bale, shall be confiscated.

Khas Mahal Collector s Office Puri, the 19th September 1900. KUNJA BEHARI CHATTERJEE, Deputy Collector in charge.

Advertisement of Sale

NOTICE is hereby given that the undermentioned plots of land no longer required by Government, situate along the Assam-Bengal Railway in the district of Tippera will be put up to sale at 12 o clock on 25th March of the year 1901 corresponding with the 12th Chaitra 1307 Fasli, at the Court of the Land Acquisition Deputy Collector at Comilla.

The purchasers of the several plots of land will be subject to the following conditions —

1st.—The purchasers will have no power to make any excavations on the land nearer than 10 feet from the railway fencing or plough the land closer than 3 feet from its foundation.

2nd—If the amount of purchase money does not exceed Rs 100, the whole amount must be paid down at once.

3rd—If the amount of purchase money exceeds Rs 100 one fourth of the amount must be immediately deposited. If the balance be not paid by the noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale

4th.—The plots of land will be sold revenue free to the highest bidders

5th—The purchasers will be put in possession on receipt by the Collector of the orders of the Board confirming the sales

J H LEA, Collector

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estate situate in the district of Sonthal Parganas will be put up to sale at the Dumka Collectorate on 1st April 1901 corresponding with 19th Chaitra 1307 B S

Conditions of Sale

1st —The estate to be sold to the highest bidder above the upset price which will be fixed by the Deputy Commissioner at the time of sale The purchaser of this estate will be considered as the proprietor of the estate and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity

2nd —The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd —If the amount of purchase money do not exceed Rs 100 the whole amount to be paid down at once.

4th —If the amount of purchase money exceed Rs 100 one fourth of the amount bid to be immediately deposited If the balance be not paid by noon of the 15th day after the sale reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day the sale is to be cancelled (the sum deposited being forfeited to Government) and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement as in the case of original sale

W A MARR Covenanted Deputy Collector in charge for Collector on tour

Midnapore Collectorate Arrear Collection Department the 15th February 1901

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estates situate in the district of Shahabad will be put up to sale at the Shahabad Collectorate Arrah on Monday the 25th March 1901 corresponding with 20th Chait 1308 Fasli

The purchasers will be subject to the following conditions of sale —

Conditions of Sale

1st.—The estates to be sold to the highest bidders above the upset price which will be fixed by the Collector at the time of sale The purchasers of these estates will be considered as the proprietors of the estates and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity

2nd —The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd —If the amount of purchase money do not exceed Rs 100 the whole amount to be paid down at once

4th —If the amount of purchase money exceed Rs 100 one fourth of the amount bid to be immediately deposited If the balance be not paid by noon of the fifteenth day after the sale reckoning the date of sale as one or if that day be a close holiday then by noon of the first succeeding office day the sale is to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchasers after issue of advertisement, as in the case of original sale

The present rent of each estate will be fixed in perpetuity as the revenue the upset price will be twice the amount of this rent.

PART V

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Act of the Governor General of India in Council received the assent of the Governor General on the 22nd February, 1901, and is hereby promulgated for general information —

ACT No II OF 1901

An Act to amend the law relating to the exemption from tolls of persons and property belonging to the Army

WHEREAS certain officers, soldiers and other persons, and certain animals, baggage and carriages belonging or attached to the Army, are exempted by section 143 of the Army Act from payment of certain duties or tolls,

And whereas similar exemptions are made by various enactments of the Indian legislatures, but these exemptions are not co-extensive with those made by the said Army Act,

And whereas it is expedient to remove the inconsistency now existing between the said Army Act and the said enactments, and to exempt certain other persons and property belonging to the Army from payment of certain tolls,

And whereas it is declared by section 169 of the said Army Act that "it shall be lawful for the Governor General of India . . to provide by law for reducing any fine directed by this Act to be recovered on summary conviction to such amount as may appear to the Governor General to be better adapted to the pecuniary means of the inhabitants, and also to declare the amount of the local currency which is to be deemed for the purposes of this Act to be equivalent to any sum of British currency mentioned in this Act", and it is expedient to alter in the manner hereinafter appearing the fine imposed by section 143 of the said Army Act,

It is hereby enacted as follows —

Short title extent and commencement.

1 (1) This Act may be called the Indian Tolls (Army) Act, 1901

(2) It extends to the whole of British India, inclusive of British Baluchistan, the Santhâl Parganas and the Pargana of Spiti, and

(3) It shall come into force on the first day of April, 1901

Definitions.

2 In this Act, unless there is anything repugnant in the subject or context,—

(a) "ferry" includes every bridge and other thing which is a ferry within the meaning of any enactment authorizing the levy of tolls on ferries, but does not include any ferry or other thing which is included in the definition of "railway" in section 3 of the Indian Railways Act, 1890, [IX of 1890]

(b) the expression "His Majesty's Regular Forces" has the meaning assigned to it by section 190, clause (8), of the Army Act, and includes the Indian Reserve Forces when subject to military law [44 & 45 Vict c 58]

(c) "horse" includes a mule and any beast of whatever description which is used for burden or draught or for carrying persons

(*d*) the expression "Indian Reserve Forces" means the forces constituted by the Indian Reserve Forces Act, 1888, and includes persons holding commissions in the Indian Army Reserve of officers when called out in any military capa-city

I of 1888

(*e*) "landing-place" includes a pier, wharf, quay, j tty and a stage, whether fixed or floating

(*f*) the expression "local corps' means the Hyderabad Contingent, the Central India Horse, the Malwa Bhil Corps, the Bhopal Battalion, the Deoli Irregular Force, the Erinpura Irregular Force, the Meywar Bhil Corps the Merwara Battalion and the Escort of the Resident in Nepal, and includes any other corps which may be notified by the Governor General in Council in this behalf by order published in the Gazette of India

(*g*) "public authority" means the Govern ment or a local authority, and, so far as regards tolls levied by a railway company under section 4 of the Indian Guaranteed Railways Act, 1879, or section 51 of the Indian Railways Act, 1890, includes such a railway company and

42 & 43 Vict., c 41
IX of 1890

(*h*) "tolls" include duties, dues, rates, rents, fees and charges, but do not include customs duties levied under the Indian Tariff Act, 1894, octroi duties or town duties on the import of goods, or fares paid for the conveyance of passengers on a tramway

VIII of 1894

3 The following persons and property, namely —

Exemptions from tolls

(*a*) all officers and soldiers of—
 (i) His Majesty's Regular Forces,
 (ii) any local corps, or
 (iii) Imperial Service Troops,
 when on duty or on the march,

(*b*) all members of a corps of Volunteers when on duty or when proceeding to or returning from duty,

(*c*) all officers and soldiers of the Indian Reserve Forces when proceeding from their place of residence on being called out for training or service or when pro ceeding back to their place of residence after such training or service,

(*d*) all grass cutters when employed in the service of—
 (i) His Majesty' Regular Forces,
 (ii) any local corps,
 (iii) Imperial Service Troops, or
 (iv) any corps of Volunteers,

(*e*) all other authorized followers of—
 (i) His Majesty's Regular Forces,
 (ii) any local corps,
 (iii) Imperial Service Troo[illegible]
 (iv) a[illegible]ny corps of Volunteers,
 when they accompany any body of such Forces, Troops or Volunteers or any members of such corps on the march, or when they are otherwise moving under the orders of military authority,

(*f*) all members of the families of officers, soldiers or authorized followers of—
 (i) His Majesty's Regular Forces, or
 (ii) any local corps,
 when accompanying any body of troops, or any officer, soldier or authorized follower thereof on duty or on the march,

(*g*) all prisoners under military escort,

(*h*) the horses and baggage, and the persons (if any) employed in carrying the baggage, of any persons exempted under any of the foregoing clauses, when such hor es, baggage or persons accompany the persons so exempted under the circumstances mentioned in those clauses respectively,

(*i*) all carriages and horses belonging to His Majesty or employed in His Majesty's military service and all persons in charge of or accompanying the same, when conveying any such persons as hereinbefore in this section mentioned, or when conveying baggage or s ores, or when returning unladen from con veying such persons, baggage or stores,

(*j*) all carriages and horses, when moving under the orders of military authority for the purpose of being employed in His Majesty's military service,

(*k*) all animals accompanying any body of troops which are intended to be slaughtered for food or kept for any purpose connected with the provision ing of such troops, and

(*l*) all persons in charge of any carriage, horse or animal exempted under any of the foregoing clauses when accom panying the same under the circum stances mentioned in those clauses respectively,

shall be exempted from payment of any tolls—

(*i*) on embarking or disembarking, or on be ing shipped or landed, from or upon any landing-place, or

(*ii*) in passing along or over any turnpike or other road or bridge, or

(*iii*) on being carried by means of [illegible]y ferry,

otherwise demandable by virtue of any Act, Ordinance, Regulation, order or direction of any legislature or other public authority in British India

Provided that nothing in this section shall exempt any boats, barges or other vessels employed in conveying the said persons or property along any canal from payment of tolls in like manner as other boats, barges and vessels

4. (1) No tolls shall be leviable by any local authority in respect of—

Tolls on vessels transporting troops and baggage etc of troops embarked or disembarked

(a) any vessel employed by the Government solely for the transport of troops, or

(b) the horses, baggage or other effects of any troops embarking or disembarking at any port, or

(c) carriages belonging to His Majesty or employed in His Majesty's military service embarking or disembarking at any port

(2) In respect of all such vessels or troops, their families, their horses, baggage and their effects, or any such carriages as aforesaid, the local authority concerned shall, in addition to its duties in the embarking and disembarking of the same, perform and supply all such reasonable services and accommodation as may, from time to time, be required by the Government, and shall receive payment for all such services and accommodation on such terms and for such periods as may, from time to time, be determined by the Government in consultation with such local authority

5 Any person who demands and receives any toll in contravention of the provisions of section 3 or section 4, shall be punishable with fine which may extend to fifty rupees

Penalty

6 (1) If any owner or lessee, or any Company, railway administration or local authority claims compensation for any loss alleged to have been incurred owing to the operation of this Act, the claim shall be submitted to the Local Government

Compensation

(2) On receiving any such claim, the Local Government subject to the control of the Governor General in Council shall pass such order thereon as justice requires, and shall give all necessary directions for the purpose of ascertaining the facts of the case and of assessing the compensation, if any, to be paid

7 (1) The Governor General in Council, and the Local Government with the previous sanction of the Governor General in Council, may make rules to carry out the purposes and objects of this Act

Rules

(2) In particular and without prejudice to the generality of the foregoing power the Governor General in Council, or the Local Government with the previous sanction of the Governor General in Council, may make rules providing for the form of passes to be given to persons or bodies of persons or in respect of property entitled to exemption from the payment of tolls under this Act

(3) The power to make rules under this section is subject to the condition of the rules being made after previous publication

(4) All rules made under this section shall be published in the Gazette of India or in the local official Gazette, and, on such publication, shall have effect as if enacted by this Act

8 The enactments specified in the schedule are hereby repealed to the extent mentioned in the fourth column thereof

J M MACPHERSON,
Secretary to the Government of India

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Act of the Governor General of India in Council received the assent of the Governor General on the 22nd February, 1901, and is hereby promulgated for general information —

ACT NO III OF 1901

An Act further to amend the Indian Ports Act, 1889

WHEREAS it is expedient further to amend the Indian Ports Act, 1889 It is hereby enacted as follows —

Short title and commencement

1 (*1*) This Act may be called the Indian Ports Act, 1901, and

(*2*) It shall come into force at once

Amendment of section 6 Act X 1889

2 (*1*) For clause (*p*) of sub section (*1*) of section 6 of the Indian Ports Act, 1889, the following shall be substituted, namely —

"(*p*) with the previous sanction of the Governor General in Council, for the establishment and regulation of places to be used as sanitaria for the segregation or as hospitals for the treatment of persons who are or have recently been suffering from any dangerous infectious or contagious disease, and for regulating the action including the disposal of dead bodies, to be taken—

(*i*) where a vessel on which there is any case of dangerous infectious or contagious disease common in India, enters or is in any such port,

(*ii*) where a vessel on which there is any case of dangerous infectious or contagious disease uncommon in India, enters or is in any such port,

(*iii*) where a vessel on which there has been any case of dangerous infectious or contagious disease or any death within twelve days previous to the arrival of the vessel at such port, enters or is in any such port,

(*iv*) where a vessel enters any such port from a port in which, or in the neighbourhood of which there is believed to be, or to have been at the time when the vessel left such port, any dangerous infectious or contagious disease uncommon in India

(*v*) where a vessel enters any such port having on board any person transhipped from a vessel coming from a port in which or in the neighbourhood of which there is believed to be or to have been at the time when such last-mentioned vessel left such last mentioned port any dangerous infectious or contagious disease uncommon in India,

(*vi*) where there is a dead body on board a vessel in any such port,

(*vii*) where there are on board a vessel in any such port food-stuffs which, owing to decomposition or for any other reason are, in the opinion of the Health Officer, unfit for human consumption or

(*viii*) where a vessel leaves any such port while there is in the port or in its neighbourhood any dangerous infectious or contagious disease uncommon in India

For the purposes of this clause only such diseases shall be deemed to be dangerous infectious or contagious diseases, or diseases common or uncommon in India as the Governor General in Council may by order direct

(*2*) After sub section (*2*) of the same section the following sub sections shall be inserted, namely —

"(*3*) If any person disobeys any rule made under clause (*p*) of sub section (*1*) he shall be punished for every such offence with fine which may extend to one thousand rupees

(*4*) If a master fails wholly or in part to do any act prescribed by any rule made under clause (*p*) of sub section (*1*), the Health Officer shall cause such act to be done, and the reasonable expenses incurred in doing such act shall be recoverable by him from such master

Repeal of Act I 1870

3 The Indian Quarantine Act 1870, is hereby repealed

J M MACPHERSON,
Secretary to the Government of India

NOTICE TO MARINERS—No 49

[First Publication]

CHINA SEA—PHILIPPINE ISLANDS—LUZON, EAST COAST

Kalaguas and Balesin islands—Dangers reported

THE British Admiralty has given notice (No 62 of 1901) that the undermentioned dangers have been reported to exist on the east coast of Luzon, in the following positions —

(*a*) A coral reef, now named TABLAO, with a depth over it of 2 fathoms, on which the American S S *Tarlac* grounded, situated about 2 miles southward of Balesin island

Approximate position, lat 14° 23 N, long 122° 1½′ E

(*b*) Breakers are reported to have been seen in a position to the north westward of Kalaguas islands about 4 miles northward of Thurston rock in approximately lat. 14° 38 N, long 122° 39 E. (*Notice No 62 of 1901*)

This Notice affects the following Admiralty Charts —Philippine islands, No 943, St Bernardino and Mindoro straits, No 2577 Also, Eastern Archipelago, Part I, 1890 pages 337, 339

[First Publication]

AUSTRALIA—QUEENSLAND

Port Curtis—Leading lights—Buoys moved

WITH reference to Notice to Mariners No 2?8, dated 12th October 1900, issued by this office, the British Admiralty has given further notice (No 64 of 1901) respecting the positions and particulars of the new leading lights at port Curtis —

1 Near the entrance to the Boyne river, two *white fixed* leading lights of the 4th order have been established the front light, elevated 73 feet above high water and visible from a distance of 12 miles, is shown from a skeleton tower 30 feet high, painted white, situated with the western extreme of Canoe point bearing N 85° W, distant 5 cables, the rear light, elevated 124 feet above high water, and visible from a distance of 14 miles, is shown from a square building, painted white, erected on a hill at a distance of 9½ cables S 75° W from the front light

These lights, in line S 75° W, lead through the South channel entrance

2 On the western slope of Gatcombe head two other *white fixed* leading lights have been established the front light, elevated 32 feet above high water, is shown from a small house, erected at a distance of 2¾ cables S 34° W from Gatcombe signal staff The rear light, elevated 80 feet above high water, is exhibited from a skeleton tower 30 feet high, erected at a distance of 4¾ cables, N 54° W from the front light

Approximate position, front light, lat 23° 53 S, long 151° 22½′ E

DIRECTIONS —To enter port Curtis by night steer in through the South channel, with the leading lights near the Boyne river in line S 75° W until the leading lights on Gatcombe head are in line N 54 W, when alter course to N 54° W, keeping those lights in line until East point light is shut in or Gatcombe head light opens out bearing N 45° W then alter course to N 69° W to pass about two cables South West of the light boat at the inner side of the North channel

3 The red can buoy situated at a distance of 2 $\frac{3}{10}$ miles S 56° E from Gatcombe signal staff, has been moved 4 cables N 56° W from its former position (*Notice No 64 of 1091*)

(*Variation 8° Easterly in 1901*)

NOTE —A new edition of Chart No 19 will be issued

This Notice affects the following Admiralty Charts —Sandy cape to Keppel islands No 345 Port Curtis, No 1900 Also, List of Lights, Part VI, 1900, No 1265, page 206 and Australia Directory, vol II, 1898, page 178

AUSTRALIA—VICTORIA

Port Phillip entrance—Intended alteration of buoyage and lights in West channel

THE British Admiralty has given notice (No 50 of 1901) that it is intended, on 13th February 1901, to commence altering the lights and buoyage in the West channel to port Phillip as follows —

1 The Pile light on the West sand will show the following sectors *white* from the bearing of N 34° E through north to N 77° W, *red* from N 77° W through west to S 80° W, *white* from S 80° W through south to S 14° E, and *red* from S 14° E through east to N 34° E

Approximate position, lat 38° 11¾′ S, long 144° 45½′ E

2 Popes Eye bank —A *white occulting* light, elevated 24 feet above high water and visible in clear weather from a distance of 7 miles, will be established and shown from a beacon near Popes Eye fort

3 Swanspit gas buoy, exhibiting a red occulting light, will be replaced by a can buoy

4 No 4 buoy (red conical) will be moved about 2 cables S 8° W from its present position to mark the south western extremity of the shoal

5 Swashway buoy (red conical) will be replaced by a gas buoy, exhibiting a *red fixed* light, at the northern extremity of Royal George shoal

6 No 2, Royal George shoal buoy, exhibiting white *occulting* light, will be altered to show a *red occulting* light

Approximate position, lat 38° 16 S, long 144° 41½′ E

(*Variation 8° Easterly in 1901*)

Further Notice will be given when these alterations are carried out (*Notice No 50 of 1901*)

This Notice affects the following Admiralty Chart —Port Phillip entrance, No 1171a, 274a Also, List of Lights, part VI, 1900, No 1116, page 182 and Australia Directory, vol I, 1897, pages 445, 446, 447

NORTH PACIFIC OCEAN

Grampus islands—Non-existence of—

THE British Admiralty has given notice (No 54 of 1901) that the Commander of H I J M S *Kongō* reports that he passed under favourable conditions over the assigned position of the Grampus islands without seeing any indication of them

Approximate position, lat 25° 10′ N , long 146° 40 E

They were not seen by either of the U S ships *Alert* in 1881, or *Ropes* in 1893

The Grampus islands were originally reported by Captain Meares in 1788, *vide* "Meares Voyage," page 94 In the account of his voyage it appears that he placed the Freewill islands (New Guinea) 3° eastward of their position as now accepted, and that four days after he had passed the Grampus islands he saw Lots Wife, which he placed 2½° eastward of the position now accepted for that island Taking these facts into consideration, it appears highly probable that the islands he called Grampus were really some of the Volcano group

The Grampus islands have sometimes been thought to be the Sebastian Lobos islands originally reported as being in 25° 40′ N , 154° 0 E , and the name Sebastian Lobos has been given as well as Grampus, to the islands shown on the Admiralty chart in 25° 10′ N , 146° 40 E , but as neither of these islands have been reported more than once and have never been seen since, it is considered they do not exist, and they have been consequently expunged from the Admiralty charts (*Notice No 54 of 1901*)

This Notice affects the following Admiralty Charts —Atlantic and Indian Oceans, No 2483 , Pacific Ocean, Nos 2683 781 Also, China Sea Directory, vol IV, 1894, page 205 and Pacific Islands, vol I, 1900, page 451

Mormugao harbour—Leading lights, buoys, &c

THE following Notice to Mariners (No 4 of 1901) issued by the Bombay Government is republished —

The Agent, West of India Portuguese Guaranteed Railway Company, Limited, gives notice, dated 10th January 1901, that two white fixed leading lights, visible from a distance of twelve miles, are exhibited from cylindrical columns, painted white, in Mormugao

harbour, the front light is situated on Chiquilim Point, the rear light on Secretario Island, about fourteen cables S 78° E from the front light

Approximate position --

Front light—Latitude 15° 24 35" N
Longitude 73° 49 50" E

The above two lights in line S 78° E lead into the harbour

Also that it is intended to exhibit at the junction of breakwater and quay wall a fixed red and white light in place of the light now shown from one of the railway sheds, the red light will be visible through an arc of 107° four miles including the breakwater, the white light through an arc of 73° over the anchorage

The black can buoy marking the Mora ugao rock and the red light at the end of the breakwater have been withdrawn

This Notice affects the following publications —Achra River to Cape Ramas, No 740, Agoada to St George's Islands, No 492 Also, List of Lights, part VI, 1900, page 40, and West Coast of Hindustan Pilot, 1898, page 161

Cape Nosshar—Wakkanai light exhibited—Fog signal

THE British Admiralty has given notice (No 13 of 1901) that, on and after 10th December 1900, a *white group flashing* light of the 3rd order and 54,340 candle power would be exhibited from a lighthouse, named Wakkanai, situated on cape Nosshar

Wakkanai light shows *two flashes* of *five seconds* duration in succession, the interval between the groups of flashes being *fifteen seconds* It is elevated 138 feet above high water, and visible in clear weather from a distance of 18 miles, from the bearing of N 27° E, through east and south, to N 44° W, it is exhibited from an iron cylindrical tower, painted red, about 34 feet high, erected on the cape, in lat 45° 26′ 30″ N, long 141° 38 40″ E

During thick or foggy weather a siren will give *two blasts* of different tones in succession every *two minutes* thus —blast (low), *two seconds*, silent interval, *four seconds* blast (high), *two seconds*, silent interval, *one hundred and twelve seconds* (*Notice No 13 of 1901*)

(*Variation 6° Westerly in 1901*)

This Notice affects the following Admiralty Charts —Kuril islands, No 2405, Yezo island No 452 Also, List of Lights, part VI, 1900, No 949a, and China Sea Directory, vol IV 1894, page 587, and Supplement, 1898, page 32

RED SEA—Strait of Bab el Mandeb

Zi hill—Approximate height

The British Admiralty has given notice (No 26 of 1901) that from recent observations it appears that the height of Zi hill is more nearly 200 feet than 300 feet above high water as shown on the Admiralty chart, but as there has been no survey of the vicinity, this figure must be regarded as very approximate

Caution —Communications received on the subject of the height of Zi hill showing that its elevation has been used as a means of obtaining the distance of ships from the coast, Mariners are hereby warned of the danger of employing this method of obtaining position unless both the height and the position of the object selected have been carefully determined in the course of an accurate survey This may sometimes be judged by the appearance of the Chart and the date of the survey, but in the majority of cases heights on Admiralty Charts can only be regarded as approximate (*Notice No 26 of 1901*)

Approximate position, lat 12° 57½ N, long 43° 21′ E

This Notice affects the following Admiralty Charts —Gulf of Aden, No 6b Red Sea No 8c Jebel Teir to Perim island, No 143 Also, Red Sea Pilot, 1900, page 340

CHINA SEA—PESCADORES ISLANDS

Ponghau (Hoko to) island—Position of Courbet and other rocks

WITH reference to Notice to Mariners No 328, dated 14th December 1900 issued by this office, the British Admiralty has given further notice (No 28 of 1901) respecting Courbet rock and of the existence of other rocks eastward of Ponghau or Hoko to island —

a Courbet rock —The assigned position of this rock has been examined without finding it or any indication of it, depths of from 33 to 20 fathoms being obtained near the spot It is, therefore, considered that Courbet rock is identical with Kentei rock, which is about 1½ cables in extent, with a least depth over it of 1¾ fathoms, situated with Keangli (Keihekisan) point bearing S 86° W distant nearly 4 miles, and Round (Yo sho) island S 25° W

Approximate position, lat 23° 35½ N, long 119° 44 E

Courbet rock has consequently been erased from the charts

b A rock named NAIKIMUTA, with a least depth of 2 fathoms over it, exists in a position with Round island bearing S 9° W, distant 2¾ miles, and Keangli point, S 84 W

c A rock named PAKIMUTA, with a least depth of 7 fathoms, is situated with Round island bearing S 12° W, distant about 4¼ miles, and Keangli point S 65° W (*Notice No 28 of 1901*)

(*Variation Nil in 1901*)

This Notice affects the following Admiralty Charts —Formosa island and strait, No 1968 The Brothers to Ockseu islands, No 1760 West Coast of Formosa, No 2409 The Pescadores islands, No 1961 Also, China Sea Directory, vol III, 1894, page 217, and Supplement, 1898, page 12

J C E Branson,

Accountant-General, Bengal.

Report of the Committee appointed to inquire into the prospects of the cultivation of Sugar by indigo planters in Bihar.

The Report of the Committee appointed to enquire into the prospects of the cultivation of sugar in Bihar is hereby published for general information The Lieutenant Governor defers his remarks on the Report, but offers at once to the gentlemen of the Committee his warm thanks for the quickness with which they have carried out the duty they undertook

REVENUE DEPT , F A SLACKE,

The 26th February 1901 *Secretary to to the Govt of Bengal*

To—The Secretary to the Government of Bengal, Revenue Department

SIR,

WE have the honour to submit, for the consideration of His Honour the Lieutenant-Governor, the results of our inquiries into the question of the cultivation of sugar by the indigo planters of Bihar referred to us in the Resolution of the Government of Bengal, No 2005 T R , dated the 8th October 1900

2 We have visited the districts in Bihar in which indigo and sugar are now most extensively grown, and have had the advantage of personal conference with many planters and other gentlemen interested in and acquainted with the cultivation and manufacture of indigo and sugar After carefully considering and collating all the facts and opinions thus obtained, and studying the facts connected with the sugar industry in other parts of the world, we see no reason to doubt that the cultivation of sugarcane and the manufacture of sugar therefrom may profitably be combined with the cultivation and manufacture of indigo in Bihar provided they are undertaken on business lines with strict regard to efficiency and economy These two factors, we desire to say, involve the conduct of the business on a large scale, the employment of the best machinery and of skilled supervision and this necessarily means the expenditure of large capital The cultivation of the cane on the methods now employed, and the manufacture of raw sugar therefrom by the native methods, do not present any prospect of financial success to a European in competition with the native cultivator and manufacturer, and it would be unwise of planters to adopt such methods

Production in Bihar

3 In the four great indigo growing districts of Bihar north of the Ganges there are altogether, according to the official statistics, about 316,000 acres under indigo and 142,000 acres under sugarcane

	Indigo Acres	Sugar Acres
Champaran	86,000	13,000
Saran	50,000	47,000
Muzaffarpur	90 000	8,800
Darbangha	90,000	73,200
	316,000	142,000

We are assured by the planters that there would be no difficulty in appropriating a fourth or a fifth of their *zirat* lands to the cultivation of the cane, and therefore it may be assumed that 60,000 acres could be added to the area now under cane It may be taken that a ton of sugar is the ordinary yield to the acre at present and therefore the cultivation of this additional area would add about 60,000 tons of sugar to the quantity now produced in these districts, being an increase of about 42 per cent

4 It has been suggested that such an increase would have the effect of over-supplying the market and of depressing prices to an unprofitable level. We do not share this anticipation which seems to us to be based upon a restricted view of the local market in Bihar It is perfectly true that if indigo planters produced sugar largely and depended for their profits upon the sale of raw sugar in the bazars in the vicinity, competing in them with the native producer, prices would be so run down that the venture would soon be found too unprofitable to be repeated The adoption of such a course, however, would be most inexpedient, and in our opinion the planter's sugar must not be placed on the market in the form of gur, it must be refined in greater or less degree before it is sent out for sale, and the principal markets should be sought beyond the limits of Bihar

Trade and Consumption

5 At present the export of sugar from Bihar is very limited, the average of the five years ending 1899 1900 being—

	Refined	Unrefined
Imports, tons	2,507	8,077
Exports, tons	394	26,871

Apparently most of the production in Bihar is locally consumed, and there is not much margin for an addition to the quantity of unrefined sugar required by the local population, who also are generally poor It seems clear, therefore, that the consumers of sugar manufactured by the indigo planters must be found, in the main, beyond the limits of Bihar The market for sugar, refined more or less, is very large in India, for, apart from the production of the country, there has been an annual average importation of refined sugar from other countries in the four years ending 1899-1900 amounting to 170,235 tons, and in the first nine months of the present year the imports amount to 177,363 tons The importation may be taken to amount on the average to about three times the quantity which the Bihar planters may be expected to produce for some years to come, and we see no reason to apprehend that if sugar is produced economically and efficiently in Bihar it will be unable to compete successfully with that portion of the imports at any rate which is consumed in Calcutta and other ports in the Bay of Bengal as well as in Northern India Nor are the conditions unfavourable for the capture of remoter markets in and out of India Besides the sugar which is imported there is also an importation into Calcutta from Mauritius of some 18,000 tons of molasses, most of which is, we are informed, used to mix with native tobacco This article is entered on importation at a declared value of 2 rupees the hundredweight, but it is sold in the market at a price of 3 rupees the maund There is consequently an extensive outlet not only for the sugar produced in Bihar, but also for the molasses

6 Besides the imports we may take into account the proportion of the Indian production which is roughly refined for Indian consumption According to the agricultural statistics there are approximately 2,800,000 acres under cane in India, but the statistics are imperfect by the omission of many Native States and of some large regions in British territory, and it will be well within the mark to say that there are three million acres under sugarcane in India, producing more than a ton to the acre on the average If only one-tenth of this quantity is refined there are 300,000 tons of refined sugar required in the country in addition to the quantity imported, and most of the refining is done by rough,

inefficient, and expensive processes the outcome of which cannot compete with sugar refined by modern and scientific methods and appliances While it is evident therefore that for such sugar, whether imported or made in India, there is already a large market, the market is also an expanding one, for the population increases every year and there is certainly a constantly increasing tendency to prefer refined to unrefined sugar A similar tendency has been manifested in other Asiatic countries whenever the people have had the opportunity given to them of purchasing refined sugar at a moderate price For instance, in a Consular report recently issued on the trade of Nagasaki in 1899 we read, regarding the consumption of sugar "It is in the higher grades that the increase in consumption may be most confidently expected Formerly the Japanese preferred and indeed used solely unrefined sugar, but their taste has gradually changed and the use of that of higher grade is now universal throughout the Empire * * * Two large refineries have been established at Osaka and Tokio capable of turning out in the aggregate about eighty tons of refined sugar per diem, and both have financially been so eminently successful as to warmly encourage the continued development of this industry in Japan under prospects that every year are more and more brightening At present the establishment of a third refinery on a large scale is being promoted at Wakamatsu" The change which has gradually taken place in Japan is also now taking place in India, and there is no room to doubt that the largest quantity of sugar that can be made by the planters in Bihar will find an expanding and profitable market beyond the limits of Bihar

Conditions in Bihar and cost of production

7 The existing conditions in Bihar seem to us to be encouraging even at present, and with improved methods most promising The planters possess enough land, of suitable quality, to grow sufficient cane to produce 60,000 tons of sugar, and need not concern themselves to seek for land for the purpose or to depend upon native cultivators to supply them with the cane Labour is extremely cheap, much cheaper than in any other part of India or the world, irrigation is not practised and is not necessary, almost all the factories are located within a short distance—on the average from five to seven miles—from the railway, every factory is provided with steam power and with water and also has carts and bullocks at its command sufficient to ensure cheap transit, the season for sowing the cane comes on before the time for sowing indigo, and the cane is not ready for the beginning of cutting operations until after the planter has made and sent away his indigo As far as we can see, from the information furnished to us, the cost of cultivation at present is from 30 to 40 rupees the acre, including rent at 6 rupees an acre The highest cost given to us does not exceed 50 rupees to the acre The cost of manufacture of a ton of sugar (one ton sugar to the acre) is 16 rupees, and the cost of packing, freight, and other charges may be placed at 30 rupees The total cost is therefore 96—or say 100—rupees for a ton of sugar which sells in the market at present at from R150 to R180 a ton, according to the degree of refining These figures of cost, it should be noted, are the highest possible figures

8 It has been objected that the planter who grows sugar will be the victim of theft from the canefields to an extent which will cause most or all of his profit to disappear, sugar offering a temptation to the dishonestly inclined person which is absent in the case of indigo We have, however, satisfied ourselves, by inquiry from planters, that most of them are not inclined to regard the risk as serious and that they are confident of possessing the means of preventing

all but such petty theft as may be disregarded Some planters expressed the opinion that it would be desirable that Government should legislate specially against such theft, but it seems to us that it is unnecessary to take this suggestion into consideration

9 It has also been represented to us that the provisions of the Bengal Tenancy Act are so framed as to deter a planter from letting out his land to a cultivator for the cultivation of even one crop thereon, for such lease gives to the cultivator the power of claiming occupancy rights, and it has been suggested that provision should be made to enable a planter to let his land for a crop to a cultivator without incurring that risk, or—if this is considered inadmissible—to make a temporary exchange of lands to the advantage of both parties We understand that no case in which occupancy rights have been claimed in such circumstances has as yet occurred, and we are not aware whether the apprehension expressed is sufficiently well founded to warrant serious consideration of the question by the Government, but as the matter was brought to our notice we mention it here

10 We have said that the cultivation of the cane by the Bihar planter, even as at present conducted, offers a good prospect of profit, but it is necessary to observe that the methods of cultivation are susceptible of immense improvement and call for immediate reform Indeed, nothing whatever has been done in Bihar to improve the cultivation either by rational treatment of the soil, by a rational manner of planting the canes, or by the introduction of improved varieties Many planters now cultivate sugarcane on a small scale, feeding the cane to their cattle and occasionally making *gur* from surplus cane for disposal in the nearest bazar, but the cultivation has been conducted entirely according to native methods, without an attempt to prepare the soil on scientific principles or to grow improved varieties, and most of the cane therefore grown in Bihar has a thin and stunted appearance Although the conclusions we have formed have been derived from the facts we have observed and ascertained in regard to the ordinary methods of cultivation with these unimproved descriptions of cane, we are confident that the profit to the planter must be materially enhanced by the careful cultivation of superior varieties

Methods of manufacture to be adopted

11 When the cane has been grown and cut, what is to be done with it?

At present, when a planter or a native cultivator crushes cane the crushing is effected in the well-known Beheea mill, set in motion by a bullock, which has so largely superseded the indigenous and still more primitive *kolhu* The Beheea mill is a useful implement adapted to the needs of the very small cultivator, but its employment is quite out of the question when an extensive area has been grown by the planter Worked by a bullock, and the canes fed into it singly by hand, the daily output is extremely small and the mill leaves much more juice in the cane than is left by a powerful mill worked by steam The method of boiling the juice thus obtained, in an open pan over a fire lighted in a hole in the ground, is also primitive and inefficient in the highest degree If a planter growing a hundred acres or more of cane were to use these implements he must certainly lose money, for his sugar would not compete with the sugar of the small cultivator made by similar methods, and it would be driven out of any market which could be entered by sugar made by better methods

12 The answer to the question put in the preceding paragraph is suggested by the experience of most other countries in which sugar is grown and manufactured In these it has been found that the best prospects of financial success are presented by the complete dissociation of cultivation and manufacture The grower ceases to be concerned with the cane after it has been cut, and it is then removed to a central mill where it is crushed and made into sugar In Queensland and New South Wales such mills are set up by a syndicate of farmers, or they are established by a large and powerful company which establishes also a central refinery or refineries to which the "grey sugar" produced in the mills is taken for conversion into the white sugar which alone is put on the market in those Colonies

13 The arrangement in such a case may be briefly described as follows The company arranges with a number of cultivators for the cultivation of a certain area with sugarcane and the purchase of the cane by the company These cultivators grow the varieties of cane which are required by the company in the areas indicated by it, the varieties being selected by the company with reference to the conditions of soil and climate, the juice giving properties of the cane, and especially the time at which each variety comes to maturity, some being much earlier than others By this means the company is able to secure that the mill is fed in regular succession from day to day with an adequate quantity of cane cut at precisely the right moment, and the season is prolonged over half the year or more When the time arrives for cane cutting trucks, specially constructed for the carriage of the canes, are run on the railway line to the point nearest the field to be cut, and from that point they are taken to the field on a portable railway line, by men, horses, or oxen The trucks are filled and brought back to the railway line, and the cane conveyed to the crushing mill For the use of this portable line the cultivators are charged a moderate rate of hire by the company The field being cleared the portable line is taken up and relaid at the next field to be cut, and the process is repeated until all the cane has been cut in the area which supplies the mill with its raw material The size of the mills is regulated by the cane-growing area of the district whence the raw material is brought to be crushed and the maximum distance over which the cane must be transported Sometimes cane is two days on the railway before it reaches the mill, but this is the longest period that can be permitted to pass between cutting and crushing

In these mills, which are furnished with the best machinery and apparatus, the canes are effectively treated to obtain from them all the juice obtainable, and the juice is made into dry grey sugar all of which is sent to a central refinery for conversion into white sugar The relations of the manufacturing company with the cultivators extend further than the contractual engagement to grow and buy sugar, for the company finances the grower with working advances

14 An arrangement of this kind is distinctly the best that could be made in Bihar, so far as it may be feasible There are, however, two considerations which may operate against its adoption The first of these is the doubt whether in the climate of Bihar, especially in the warmer periods at the beginning and ending of the cutting season, the cane would not begin to deteriorate if it is kept for more than a day after cutting This point can only be determined by actual experience The second consideration is that the establishment of mills such as those to which reference has been made, in the numbers which would

be required to treat the 600,000 tons of cane that the Bihar planters will be in a position to produce, involves the raising of very large capital for initial cost and working expenses Of course any operations of this kind must be gradual and tentative, and a company might be formed in association with the syndicated planters of a selected district for the establishment of one or two such mills capable of producing one thousand tons of sugar in the season For such mills convenient sites would be found at Sakri, Muzaffarpur, Bettiah, and Chupra

15 There must, however, necessarily be some delay in the formation of a company or companies possessing such large capital and working resources as are implied in the establishment of works of this class, and it is expedient to consider whether it would be feasible to begin the business with an alternative system not requiring so much organisation and capital though it would permit planters to place on the market at profitable rates a class of sugar for which there is an extensive and constant demand.

16 It seems likely, judging from the results of experiments which have just been undertaken at Begumserai by Mr Hancock on behalf of Messrs Gillanders Arbuthnot & Co, that such an alternative method exists in the establishment, at each indigo factory where sugar is grown on an area of about 200 acres, of a cane crushing machine, furnished with the necessary evaporating pans and centrifugal We have ascertained that such a machine can be set up for R5,325, including the price which is R5,075 The working cost of the machine—including fuel, stores, labour, and all charges with depreciation on capital cost at 6 per cent—is not more than R16 daily The machine turns out two tons of dry (muscovado) sugar in a working day of 12 hours, with 35 gallons (equal to 510 lbs) of molasses This machine, as observed above, is capable of treating the cane from 200 acres, but larger machines capable of dealing with more extensive areas can be obtained at a comparatively small increase of cost

17 Here it will be remarked that we suggest the association of cultivation and manufacture, although in a preceding paragraph the opinion was expressed that the two operations should be dissociated Certainly the most efficient way of carrying on the industry lies in the conduct of the two processes by separate agencies, for ordinarily the grower has neither the skill, nor the capital, nor the area of land under cane, which are required for the economical conduct of a crushing mill The Bihar planter, however, stands on a relatively high plane as a grower of agricultural products He generally possesses a wide area of land, he has under him an army of work people and labourers and is accustomed to organisation and discipline, he is—or was before the recent heavy fall in the price of indigo—in a position to command the advance of considerable sums for working capital, he possesses steam-engines and these are set free from the requirements of indigo manufacture in good time to be utilised to drive the cane crushing machinery which can be connected with the engines, he has at hand the workshop appliances requisite for repairs in case of accident, at Muzaffarpur he can command skilled engineering aid if it is wanted for more serious cases, he possesses an abundant water supply, he has extensive storage accommodation for sugar in the indigo houses which are emptied of the indigo before sugar manufacture begins, and, finally, he can sell the grey sugar in a market in which there is still a more extensive demand for that article than for white sugar

Consequently, in view of all the conditions, it seems to us that pending the completion of the more perfect organisation which is needful if the utmost economy and efficiency are to be secured, planters may with confidence set up such machines as the one tested at Begumserai and expect that their outturn will be sold at a profit which will satisfy them

Organization of market agencies

18 Here, however, the consideration of the market again presents itself When the cultivation and manufacture are dissociated the grower s market is ready to hand in the manufacturing company when they are combined, as in the case just discussed, the grower must and his market, and here complete and careful organisation is necessary It may be said that the market will be found in Calcutta by those mercantile agencies in whose hands the planters' indigo is concentrated before distribution But the cases are not analogous The indigo is sent to Calcutta as the port of shipment to other countries, whereas most of the sugar produced in Bihar will be consumed in India Now if the arrangements for the finding of a market are concentrated in Calcutta the sugar grower will not be able to take advantage of the internal markets in Northern India, for his sugar cannot successfully compete, after payment of the cost of transit to Calcutta and back again, either with imported sugar on which only the cost of transit one way is paid, or with locally made sugar The market for grey sugar in Calcutta moreover is not so important as it is in places more remote from the sea and less easily supplied with white sugar The conclusion to which these considerations point is that it is necessary for the growers to organise a buying and distributing agency in the area of production Such an agency or agencies might conveniently be located at Somastipur or Mokameh It would be desirable that the agencies should be in a position to work with the planters for sugar in the manner in which the Calcutta firms work with them for indigo and indeed the agencies might be conducted by those firms Possibly in course of time they would find it advantageous to develope into manufacturing companies like those to which we have referred

We wish to say here that we lay particular stress upon this question of the organisation of a complete and efficient market agency for the purchase, sale, and distribution of the sugar made by the planters, for without such agency the extensive growth of cane by the planters must end in disappointment and pecuniary loss

Failure of former attempts at Sugar-growing in Bihar

19 It will naturally be asked what is the reason that former attempts at sugar manufacture in Bihar have failed if the prospects at present are so encouraging The answer is on the surface conditions were radically different in the days—the last decade of the first half of the century—when a sudden mania for the growth and manufacture of sugar took possession of the Bihar planters Much of the machinery ordered out in haste was found unsuitable, the persons who were to work it did not know their business, there were no means of repairing broken machines, some parts of the machinery were lost in the long and laborious transit up the river which then formed practically the only means of communication, the sugar made was of a class for which at that time there was no demand in the country and all of it was sent down in boats to Calcutta, suffering heavily from wastage by theft and leakage in ill found boats, while there was not infrequently complete loss of boat and cargo

When the sugar, or what was left of it, finally reached its destination, after a very long journey during which interest and other charges were accumulating, it could not find a profitable market in competition with sugar produced much nearer the market and more cheaply Further, just as the industry was started there occurred the failure of the Union Bank which shook the Indian mercantile world, and the planter found that it was hopeless to obtain funds to any extent even for the prosecution of a well established industry much less for one that was new, one which short experience had already shown to have been started on a wrong basis, and one which could not in existing conditions hope to succeed. All the conditions are now radically different it is easy to import machinery into any part of Bihar rapidly and safely, and the means exist of keeping it in order and of securing the services of persons capable of working it to the most advantage, while all the factories are located conveniently to railways which can move their sugar cheaply, quickly, and safely to Calcutta or any internal market, and there is a large and growing demand in India for sugars such as the planters will make The old conditions therefore present a contrast, not a precedent

20 It will doubtless also be asked how it is that even in the present day the refinery established at Sakri, in the Darbhanga district, has not been a success The answer is obvious to those who know the circumstances If this refinery had been started with a block value of only £20,000 or £25,000, instead of the £50,000 which it actually cost in consequence of the original proprietors not having conducted their operations on business principles, if the waste of capital on plant and machinery had not left the proprietors without funds to pay for working charges, and if the establishment had been worked all along under competent management, it would have been working at a profit now It could now be set to work again at a good profit if the capital account were reduced to its proper value, and it was managed on the lines of a business concern

State aid to planters

21 In the course of our conversations with the many gentlemen who have spoken to us on the subject of this report, it has frequently been suggested that the Government might give the planters financial assistance towards the cultivation and manufacture of sugar It seems clear, however, from the terms of the Resolution of the Government of Bengal in which this inquiry was ordered that the Government do not propose to offer financial aid to individual planters, but desire to limit their intervention to ascertaining through an independent Committee whether the cultivation and manufacture of sugar offer a sufficiently attractive prospect to induce capitalists to invest their money in the venture We venture to think that the decision of the Government on this point is sound If planters are in a position to offer security for advances of capital they will not fail to obtain in the market the funds they require at a reasonable rate, if they are not in a position to offer security the public money should not be lent It has been suggested that Government might guarantee advances from banks to planters, but it is obvious that such a course would not be considered necessary by a bank if sufficient security were offered, while any bank would lend as much as was required on the Government guarantee without asking for any other security, and when the time for repayment arrived the bank would look to the Government and leave to them the odium and trouble of endeavouring to realise from the planter

It is true that in Queensland the Colonial Government on the application

of a syndicate of sugar growers advances the money required for the establishment of a sugar mill, but the conditions are not such as to make this arrangement a precedent to be followed in India There the Government are desirous of attracting settlers to unpeopled land by aiding them to pursue profitably the agricultural industry for which the land is best suited, and to introduce at the same time a new manufacturing industry In India the cultivation of sugarcane is not new, it is very extensive, and if the Government aid the planters to grow the cane, they cannot refuse similarly to aid all native cultivators engaged in the same pursuit, especially as it must be anticipated that the efficient methods employed by the planters must displace sugar produced by the inefficient native methods Moreover, the Government will not be able to discriminate between men who may be trusted to do well with the assistance given them and men on whom assistance is thrown away Further, if the Government were to aid the cultivation and manufacture of sugar, there would be no justification for refusing financial help to persons engaged in other agricultural industries where the product of field labour needs to be manufactured before it can be brought into use—for instance, cotton, jute, oilseeds, tea No assistance in such cases would be useful unless it was given on an extensive scale, and the funds at the disposal of Government are entirely inadequate for such purposes Finally, if the Government were to make advances on easy terms to planters and others, an artificial stimulus would be given to the production of a particular article which must of necessity end in a fall of prices financial waste, and the loss of the money advanced by Government From information communicated to us we are led to believe that—as was natural to anticipate—the mills in Queensland established on the basis of Government money have not been such a financial success as to commend the system for imitation in India, while the mills set up by private capital and directed by skilled enterprise are returning good profits

22 There are, however, two ways in which Government assistance could be given to planters in an unobjectionable and useful way One of these methods lies in the direction of systematic and co-ordinated experiments in cultivation There are at present two experimental stations in Bihar—one under the control of the Bihar Planters' Association located near Muzaffarpur and managed by Mr Rawson, the other at Dulsingserai under the control of a syndicate of Calcutta merchants and managed by Mr Hancock At each of these stations experiments are being made, quite independently of the other, in the cultivation of indigo and other crops, and the results achieved in each are carefully guarded from the knowledge of all but the contributories * Such experiments, however, should be made generally available to the whole planting community, and they should be worked as part of one system if the full benefit of such work is to be obtained Experiments of this kind are of the greatest use, and indeed it is stated that already material improvements have been introduced into the cultivation and manufacture of indigo, increasing the quantity and improving the quality without a corresponding increase in cost Agricultural experiments must proceed continuously over a long series of years before definite and really valuable results can be secured, and it is possible that private individuals, associations, or syndicates may be disinclined after a time to defray the cost of continuing them when much of the accumulated experience is withheld It would be an advantage then if

such experiments were conducted by Government and the results obtained made accessible at frequent intervals by means of leaflets or bulletins to the persons interested The experts conducting the experiments should also be allowed to visit indigo factories for the purpose of giving personal advice on the spot with regard to experiments locally undertaken Such a form of aid by the State is eminently suitable and proper in an agricultural country where the planters, themselves agriculturists on a large scale, will profit by the instruction received, and form a centre whence improvements will spread amongst the smaller agriculturists by whom they are surrounded, so far as the improvements are within the means of the people.

Such a station would be excellently located at Poosa, which, we understand, is now again in the possession of Government This place is well adapted in every respect for the establishment of an important and well equipped agricultural station for Bihar and capable of extending the sphere of its influence westward into the adjacent districts of the North Western Provinces and east and south in Bengal If the station is established the staff should be fully adequate to secure continuity in the experiments undertaken, both in the field and in the laboratory

23 It is worth mentioning here that the Hawaiian Sugar Planters' Association possess such experimental stations and laboratories, and that the Director and Chief Chemist in charge of those stations, Professor Walter Maxwell, was employed by the Queensland Government to report on the sugar industry in that Colony In his "Report upon an investigation into the condition of the sugar industry in Queensland," dated the 30th January 1900, he recommended the establishment of three experimental stations, and his description of the staff required and its function and duties may well be reproduced here—

A director shall be appointed who shall establish the said stations, appoint and locate an assistant director upon each station, and engage chemists for all laboratory requirements

The functions of the director, after the establishment of the said stations, shall be as follows —

(1) To personally visit all districts and sub-districts where cane is grown, and to inspect the farms and plantations of the growers, advising in all matters of the field, such as selection of lands suitable, and leaving out of lands unsuitable, for cane, the individual acts of cultivation, the resting and rotating of the soils with other crops, the introduction of other economic crops and sources of profit, and the instituting of new means for the restoring and maintaining of the producing power of the lands

(2) To examine the soils in the field, and take samples for analysis in laboratories, and to advise manures according to the ascertained requirements of each soil and location.

(3) To inspect the mills during the crushing season, advising and aiding the manager in the several acts of the manufacture

(4) To institute experiments at each of the three stations along the several lines of cultivation, planting, manuring, irrigating, and study of cane varieties, and likewise to study prevailing diseases and pests

(5) To advise and aid the cane-growers and manufacturers on questions of sale and purchase of cane, and to be at the service of the Association in its affairs which are connected with the State

(6) To train and prepare the assistant directors, in order that they shall ultimately become fitted for the responsible direction of the respective stations The term of requirement of the services of the director in chief should not exceed five years

To embody and execute the functions as set forth, it is seen that the director must, of necessity, be a thorough agriculturist, a highly trained scientist, and conversant with all questions of the field and mill His practical experience and technical knowledge must be such as to secure the absolute confidence of the cane growers and the mill officials, whilst his tact and business capacity must be to hand in all practical situations

The selection of the director will be the most important act of the association His fitness for the position must be absolutely certain, then he must be given full responsibility and discretion And his responsibilities will be varied and heavy, for he must not only talk with and advise the farmers in the fields and the managers in the mills, but he must appoint the work of the chemists in the analysis of soils and control inspections of manures and know that they are accurately carried out, and he must advise the composition of the manures to be used, and know where the manures can be most economically obtained In brief, the absolute direction of the experimental work that we are advising will be in his hands and its success will rest wholly with him He, therefore, must be a man of the fullest and most unquestioned fitness for the position Unless such a man is found and entrusted with the work, we cannot accept the responsibility for the adoption of the remainder of our recommendations

With the institution of such a system of scientific and practical experimentation as we have set forth, the direct advising and instructing of the growers and manufacturers along new and tried lines would begin Upon these would follow the accurately ascertained results of the experiments at the stations, which results would serve as guides and as actual examples, showing what could be done on a larger scale By these means would be set in movement the influence of new ideas and the knowledge of new methods and their results until gradually but surely a new system and order of things will have taken root in the whole field of sugar production throughout the colony

Now appears to be the time to put this new work into operation We have seen the lands and conditions of the sugar growing areas, and are fully persuaded of their native capability to produce, but we have also noticed the exhausted state of the soils and their demand for restoration and help

The last paragraph quoted above applies as appropriately to Bihar as to Queensland And we may observe here that the suggestion we make is similar to the recommendation made in analogous conditions by the West India Royal Commission in their report written in August 1897

24 The other method in which Government might assist planters is in the provision of railway communication by sidings or portable lines between factories and the main line of the railway system This recommendation is also in accordance with one made by the West India Royal Commission

Cultivation of Oilseeds

25 In the course of our work we inquired whether there were other products which might advantageously be grown by indigo planters We found that several of them were already cultivating various products (such as turmeric, ginger, chillies), chief among them being oilseeds, especially *sarsor* (rapeseed) These seeds are easily cultivated, and we were enabled to note at Dulsingserai how greatly the yield has increased with the judicious application of suitable manure If the planters could grow them and express the oil the cultivation has everything in its favour, for the oilcake would be most useful in manuring the sugarcane lands and for cattle feed But here also careful organisation of a market is all important The oil must be made efficiently and economically, a certain standard must be worked up to and maintained so that the oil may be known by its name and mark and the market must be found as in the case of indigo and sugar Some planters now make oil in rough way and sell it readily, but they should not assume that they can continue to do so if the cultivation should largely increase

Prospects of Indigo

26 Our attention was also directed to the condition and prospects of indigo, for if it seemed probable that indigo would be restored to the position which it held until recently, it would be idle to anticipate any extensive resort to sugar cultivation by indigo planters and therefore equally idle to expect that capital would be forthcoming for investment in cane crushing and sugar-manufacturing machinery We found that the two Associations mentioned in paragraph 22 of this report had done and are doing useful work in increasing the quantity of indigo plant yielded to the acre and the quantity of dye yielded by the leaf in the vat Such an increase enables the planter to sell his indigo with a profit at a price which would have been unprofitable under antecedent conditions Nevertheless, it must be recognised that, in face of the increasing competition of synthetic indigo, an increase in the quantity of indigo produced in Bihar must of necessity tend to lower prices below the present low level On the other hand, it is possible, and indeed probable, that as synthetic indigo becomes better known to consumers and the means of producing it expand, it will be produced on an increasing scale and at a diminishing level of price Again, the present level of price for natural indigo may continue to be profitable while the planter has a full crop, but recent experience precludes us from anticipating an increase in price when crops are bad, and indigo is notoriously a precarious crop Therefore, without taking too pessimistic a view of the future of indigo, it is reasonable to anticipate that the competition of synthetic indigo will prevent any future increase in the price of vegetable indigo, that it will soonest and most injuriously affect the finest and most expensive indigo which is that of Bihar, and cause a further reduction in price which would hardly clear the planter in a good season, while a bad season would be ruinous to him In the end, though we trust the end is a long way off, the competition of synthetic indigo may bring about the supersession of vegetable indigo as the competition of alizarine dyes ended in the supersession of madder However this may be, it is obviously expedient that indigo planters should possess in sugar and other products resources which, if they are carefully and intelligently utilised, will enable them to contemplate the future of indigo with equanimity

Summary

27 Our conclusions may conveniently be summarised as follows —

(1) Even as now conducted the cultivation of sugar by planters is profitable, and it will be still more profitable if conducted in accordance with the principles of modern scientific agriculture, and it is very necessary that the cane should be so cultivated,

(2) the methods of manufacture in use by native cultivators and refiners cannot be applied to the cane produced on a large scale by European planters,

(3) it will be best and most economical to adopt the system of central mills and refineries,

(4) but, if capital cannot be raised at present for the introduction of that system, planters should crush the cane grown by themselves in mills worked by steam and furnish with apparatus for the manufacture of grey sugar,

(5) the organisation of the market for the sugar produced is a considera tion of primary importance, and arrangements for the supply of a wide range of markets should be made as soon as the movement for the cultivation of sugarcane extends,

(6) there is room for great improvement in the varieties of cane grown in Bihar, and the planters stand in need of careful and systematic instruction in the cultivation of the cane,

(7) such instruction can best be imparted from an agricultural station maintained by the State under the charge of a competent director and chemist and adequately equipped and manned,

(8) such an institution would primarily give instruction in the important crops of indigo and sugar, but experiments should be made also in all other crops cultivated or capable of being cultivated in Bihar by European or native agriculturists, for the instruction given would be as useful to the native cultivator as to the Euro pean planter,

(9) the future of indigo is precarious, and it is desirable that no time should be lost in growing other saleable crops which will partially take its place, amongst these being sugar and oilseeds

28 Appended to this report are some papers which are interesting and useful as presenting the conditions under which the cultivation and manufacture of sugar are carried on in some countries where the industry has attained important dimensions The papers also include some by representative Bihar planters containing their opinions on the prospects there We should observe that the paper by Mr Moreland, Director of Land Records and Agriculture in the North Western Provinces and Oudh, is inapplicable to the conditions existing in Bihar, but it is useful because it sets forth impressively and emphatically the need of skill and care in the conduct of the industry

We have the honour to be,

Sir,

Your most obedient servants,

J E O'CONOR

D M HAMILTON,

E A HANCOCK

[Appendix No. 1]

Notes on Sugar growing in Bihar by Mr Rowland Hudson, of Ottur, dated January 1900

Soil —Tirhoot has been called the garden of India The soil of Tirhoot, Champaran, and Chapra, the three principal indigo growing districts in Bihar, is admittedly the most fertile in India, and perhaps in the world Many years ago European settlers fixed on Bihar, especially Tirhoot, for their cane growing and sugar making operations The soil is good, the district thickly populated, labour extremely cheap, and the local consumption of sugar heavy The trade was eventually abandoned by Europeans in these districts, owing to the difficulty and expense of transport, and of obtaining efficient pressing machinery It was about that time that indigo became a most paying industry, and large tracts of land which had until then been under sugarcane, were converted into indigo cultivation Since then, great changes have taken place Several lines of railway run through Bihar, connecting it with the main line running between Calcutta and Bombay Pressing machinery has been so improved that an increase of over 30 per cent of yield can now be obtained from the cane, and recently a countervailing duty of R1 per maund (about £1-10-0 per ton) has been imposed on all bounty fed imported sugar

Canes —The description of cane grown by the European planters for sugar has been allowed to practically die out in Bihar It contained a much larger percentage of sugar than the ordinary cane still in use, but was of so much larger diameter, and consequently so much more difficult to press, that the natives, who still carry on the industry of growing and pressing canes, were unable to work it in their primitive pressing mills worked by hand or bullock power I believe this cane is still grown in some parts of India *Vide* Agricultural Ledger 1898, No 8, from which I attach extract (marked B) I have written to Dr Leather for all information about this cane, and enclose copy (marked A), of his reply dated 13th January 1900 It is possible that the cane which grows from seed in Barbadoes and other West Indian islands, would be the most suitable description to import and try in this country I have just procured a sample of cane thicker than the ordinary cane, but which grows to a height of 15 feet I am planting small plots of both canes to see which does best The extra long variety was grown in Burdwan (Lower Bengal)

Yield —After most careful inquiries in several localities, and from experiments that I have made myself, I find that the ordinary cane grown on one acre of *unmanured* land weighs 15 tons This yields about 1½ tons of sukkur (unrefined sugar) and about ½ ton of molasses The rates quoted by the manager of Sakri sugar refinery, at which he is ready to purchase the above produce, are as follows —

	£	s	d
Sukkur 1½ ton	13	6	8
Molasses ½ ton	1	0	0
TOTAL .	14	6	8

The rent of land and cost of cultivation of one acre of cane, and conversion of the produce into sukkur and molasses, would amount to about £3

The gross profit on one acre of cane would therefore be £11 6s 8d, as per the following estimate —

	R	a	p	R a p	£ s d
Cultivation charges—					
Rent of land	5	0	0		
Tillage	3	0	0		
Seed cane	8	0	0		
Cutting and planting seed cane	1	0	0		
Supervision	4	0	0		
				21 0 0	
Manufacturing charges—					
Cutting canes	1	8	0		
Carting to factory	4	0	0		
Coal	6	0	0		
Skilled and unskilled labour	6	0	0		
Supervision	4	0	0		
Miscellaneous expenses	1	0	0		
				22 8 0	
Total cost of cultivation and manufacture of one acre of sugarcane				43 8 0	=£3 0 0
Value of 1½ ton of sukkur	£13	6	8		
Do of ½ ton of molasses	£1	0	0		
					£14 6 8
Profit					£11 6 8

Two crops of cane are obtained from one sowing, and the period which each crop takes in growing is about one year The second crop does not give as good a yield as the first The figures quoted above refer to the expenses and yield of one year only After the second year's crop is cut, it is advisable to put the land under some other crops for at least two years I have found from experience, during my management of the Prossa indigo concern, where cane is largely grown by natives, that indigo does exceedingly well on land that has been under sugarcane The roots of sugarcane only penetrate to a depth of from eight to twelve inches The tap roots of indigo go down several feet As soon as sugarcane reaches a height of about three feet it kills weeds of all descriptions Thus the land is not exhausted by *weeds*, whereas in the case of almost every other crop it is well nigh impossible to keep them down by the most careful weeding

Adaptability of indigo estates to the cultivation of cane and manufacture of sukkur and molasses—Indigo is sown in March and manufactured during July, August, and September Cane is planted or sown in February, and manufactured during January, February, March and part of April, in the following year The buildings, boilers, engines, etc, of indigo factories could therefore be utilized for the manufacture of both crops The cost of cane pressing machinery, boilers suitable for boiling the sugarcane juice, and centrifugals for making sukkur, would be roughly about £2,000, for a cane cultivation of 1,000 acres The lands at present under indigo are, in most cases, suitable for sugar It is therefore obvious that a system of changing the land from one crop to the other would work simply and economically, and with advantage to both The cane crop would all be cut by about the 10th April The land

could be manured with the refuse indigo plant (most excellent manure) and allowed to lie fallow till the following March, or, if considered advisable, let out to natives for an autumn crop at a rent which would more than cover the cost of manuring This crop would be harvested in September and October and the land prepared for the sowing of indigo in the following March The above remarks refer to lands in possession of indigo factories Natives who hold lands and possess occupancy rights on indigo estates contract to grow indigo at fixed rates I am assured on all sides by them that they would be equally willing to contract to grow cane for the same rates as we pay for indigo, which would be very little in excess of what it would cost to cultivate cane in lands in our own possession It is possible that the European and native staff at present employed for the cultivation and manufacture of indigo would, with a few additional hands, be capable of superintending the operations of both industries, and thus a considerable saving could be effected in the yearly outlay

The great difficulty which the refiners appear to have to contend with is that the manufacture of the raw material must be completed between the months of December and April, and a sufficient quantity cannot be bought and stored at the refinery to keep it working during the whole year This difficulty could be overcome by storing the raw material at the indigo factories, where there is ample room, and forwarding it to the refinery as required The freight per maund of sukkur per mile by rail is one fourth of a pie, which is equivalent to about one half penny per ton per mile Carting expenses would come to about one penny per ton per mile

	£	s	d	£	s	d
Price of 1¼ ton of sukkur	13	6	8			
,, of ¼ ,, of molasses	1	0	0			
Cost of refining 1 ton of sukkur as per Mr J C Aguilar's figures appended (marked F)	0	19	0			
Cost of distilling 74 gallons of rum, produce of 1 ton of molasses	2	13	4			
TOTAL				17	19	0
Value of 1 ton of refined sugar obtained from 1¼ ton of sukkur	15	0	0			
Value of 74 gallons of rum	5	0	0			
Total value of refined produce of one acre				20	0	0
Refinery profit on produce of one acre				2	1	0

From the foregoing figures it is obvious that the growing of cane, and manufacture of sukkur and molasses, is a more paying business than the refining and distilling of sukkur and molasses into pure sugar and rum Each industry, properly worked, would pay good dividends on the necessary capital, but the combination of both would pay better than either *separately* for the following reasons At present the market for the raw material is uncertain, and the supply of the same for the refinery is equally uncertain The middleman who buys from the producer and sells to the refinery absorbs a profit of from 10 per cent to 20 per cent on his transactions By combining the two industries, these three drawbacks would disappear At present, owners of

refineries do not possess any land, and never attempt to grow cane Some of them whom I have met were absolutely ignorant of the fact that there is more money to be made out of the growing of the cane and manufacture of the raw material than from the refining of the latter

General aspect of the trade—The growing of sugarcane in Bihar has for many years been in the hands of natives They are behind the times The quality of cane grown is not the best obtainable, the selection and cultivation of the land is very imperfectly done, and they lose at least 30 per cent of the yield for want of up-to-date pressing machinery Refining is carried on by them with their old and primitive methods, and the quality of the sugar that they make is very inferior Europeans now confine their attention to the refining of the raw material which they buy from native middlemen There are only four refineries in Bengal and the North-West Provinces, namely, at Cossipore, at Shajehanpore, at Cawnpore, and at Sakri (in Bihar) These refineries pay good dividends if worked up to their full power Their profits have been materially increased since the imposition of the countervailing duty on bounty fed imported sugar, as the demand for Indian refined sugar has increased, while the prices of the raw material have remained stationary Prior to the introduction of the countervailing duty large quantities of sugar were imported into this country This, in face of the fact that India is itself a sugar-producing country, is, I think, a very strong proof that the demand for Indian sugar, at present rates, will not decrease, even if the industry is revived in Bihar I see in a recent number of the *Pioneer* that the importation of sugar has decreased by 75 per cent since the introduction of the duty Two facts appear to me to be perfectly clear—

(1) That the growing of sugarcane, and refining of the produce will pay well at present prices

(2) That unless the increase in production exceeds the decrease in importation, present prices will remain unaltered beyond the ordinary fluctuations of the trade

The area under sugarcane in Bengal in 1899 was 860,200 acres The outturn of raw sugar from this area is estimated by Government officials at 16,000,000 cwts, or 1 ton per acre This estimate of yield is no doubt based on previous results It must be borne in mind that all classes of lands are included in the above area, and that the ordinary primitive machines are used for pressing, and we may therefore reasonably assume that from carefully selected lands, well cultivated, the best variety of cane, and up-to-date pressing machinery, an increase of 50 per cent in yield could be obtained The annexed extract (marked B) from a note by Dr J J Leather, in the Agricultural Ledger 1898, No 8, supports this assumption The area under indigo in Bihar in 1899 was 254,235 acres Only a certain proportion of this area would be suitable for sugarcane, and it is extremely unlikely that more than a fourth would be planted with that crop for many years to come, even if the majority of indigo planters take to growing it Thus we would have an increase in area under cane of 63,558 acres At 1½ tons per acre, this would yield 95,337 tons of raw sugar or a little less than an eighth of the present outturn of Bengal only This increase in production could not seriously affect present prices Dr Leather estimates the imports at 75,000 tons of refined sugar, his estimate being evidently based on the average of several years *prior* to the imposition of the countervailing duty,

75 000 tons represent 100,000 of raw sugar, and if the statement in the *Pioneer*, already referred to, is correct, the imports for the current year would only represent 25,000 tons of raw sugar, and it is quite possible that in the near future the importation of bounty-fed sugar will cease altogether

I annex extract from—

1 Dr Leather's letter on sugarcane (marked A)
2 Dr Leather's note (marked B)
3 Table showing cost of production of sugar and its value in Queensland, Barbadoes, and Bihar (marked C)
4 Sakri refinery price list (marked D)
5 Rosa Company s refinery price list (marked E)

P S—The question of manuring and its results is too complicated to deal with without very carefully examining all available information as to soils, etc , but should manuring eventually become a necessity, the cheapest way to procure the by-products of vegetable soils, said to be the best manure for sugarcane, would be to establish oil mills at the growing centres

---

A

From Dr Leather to Mr Hudson, dated the 13th January, 1900

In reply to yours of December 28th last the cane grown around Poona is called *Pundia*, and is probably as good a cane as we have in India But I fancy the *Samsara* of Burdwan district, is as good The cost of carriage of the seed cane would be much less from the latter place It must be sent to you whole, or at most cut in half lengths None of the Indian canes can be propagated by seed It has all to be planted from cuttings of the cane itself You will get the seed cane through the Director of Land Records and Agriculture, or the Poona cane from the same office, Poona The average yield of *gur* obtained at Poona is assumed to be about 8,000 lbs per acre We have got a good deal more than this at the Government farm, but 8,000 lbs is reckoned to be the cultivators' average

N B—I don't think it is the least use trying to grow cane as they do in your part, you should get a cultivator from Poona or Burdwan to show you how they do it

---

B

Extract from note by Dr J W Leather, Agricultural Chemist to the Government of India, in Agricultural Ledger, 1898, No 8

" As to the general importance of experiments on the sugarcane crop, it is almost unnecessary for me to say anything It is clear, in the first place, that so long as India has to import sugar (the net amount is about 75,000 tons annually,) there is room for an increased production It is also clear that, whilst an article of diet which is common to the people generally, is imported, the cost of production is higher than it should be But this is not all , for the greater part of the sugar produced goes to the cities and thus becomes in a masure a luxury Then, too, there is the difference between the outturn per

acre, as realized in the Deccan and Bengal on the one hand, where with good varieties and good methods of cultivation, some 2½ to 4 tons of raw sugar is obtained, and in Bihar and the North-Western Provinces on the other, where the outturn is certainly not more than 1 to 1½ tons per acre, and is often much less As has been shown in the course of this section of my report, there is no need to go outside of India for good varieties, nor to other countries for good methods of cultivation The best varieties are met with, and the methods of cultivation in some parts are very perfect What is wanted is the introduction of these good varieties and good methods into those parts, particularly the North Western Provinces and Bihar, which provinces, it must be recollected, include much the largest area under cane of any provinces of India "

C

Value of sugar per ton and cost of production in Queensland, Barbadoes, and Bihar

	Value of refined sugar per ton	Cost of production per ton			Profit per ton	Loss per ton
		Growing cane	Manufacture and refining	Total		
	£ s d	£ s d	£ s d	£ s d	£ s d	£ s d
Queensland	10 18 11½	5 16 0	2 4 4	8 0 4	2 18 7½	
Barbadoes	10 0 0	8 15 6	2 4 4	10 19 10		0 19 10
Bihar	18 0 0	1 6 8	2 12 4	3 19 0	14 1 0	

The figures for Queensland and Barbadoes have been taken from articles which appeared in the *Times* in September 1899 The price of sugar per ton for Bihar is taken from the Sakri refinery price list, the quotation is per maund of 80 lbs, and as a wholesale price would probably be lower, I have in the body of my notes put it at £15 per ton In the figures for Bihar no credit has been taken for by-products as they are not mentioned in the *Times* articles on Queensland and Barbadoes, though it is possible their value may have been deducted from gross cost of production in those countries

Memorandum on sugar growing by Mr H Collingridge, of Daudpur, dated February 14, 1900

A great deal of this province is undoubtedly suitable for the growth of sugarcane, and between 1840 and 1850, it was cultivated to a large extent by European planters in the place of indigo, which at that time was not a paying industry. From all I have heard, I believe that it did not pay, and was eventually given up for indigo, which commenced to revive again In those days, transit was a great difficulty, and added greatly to expenses, as well as to disposing of the sugar otherwise than locally Machinery was used, but to what extent I do not know Since then, sugarcane has been grown only by natives, and the methods employed by them for extracting the juice are very primitive Still, however, they succeed in making it pay, although the cane is said by Dr Leather, Agricultural Chemist to the Government of India, to be very inferior to that grown on the Bombay side, and their lands are not so carefully cultivated.

Indigo factories, with their own lands and leases of villages, have a large choice of cultivation at their command, and with constant changes, together with manures and better class of cane, combined with machinery, should be able

to show a much larger profit than the native does Sugarcane can be worked simultaneously with indigo The crop would be planted before the indigo sowings commence, and would be manufactured after the indigo crop was finished, and would not therefore interfere in any way with indigo Sugarcane lands, I believe, give good indigo crops the following year, as the roots of the sugarcane do not go down more than a foot or so into the ground, whilst the tap roots of indigo work down nearly 3 feet, and they would therefore be a good change for indigo I should certainly not recommend putting more than a quarter of the present cultivation under indigo into sugar cane, though it is possible that the lands in some factories might enable more to be grown The machinery at present available, at most indigo factories, would probably assist the crushing, etc , of the cane, but it must be remembered that, if owing to the expense of fitting up a factory with the necessary extra machinery, only one or two factories in a concern could be used, the expenses of carting plant from a long distance would be heavy

Cane for planting —Dr Leather writes, under date of 13th January, 1900, " The cane grown round Poona is called Pundis, and is probably as good a cane as we have in India, but I fancy the Samsara of Burdwan district, is as good The cost of carriage of the seed cane would be much less from the latter place " I have communicated with Mr Maddox, Acting Director of Land Records and Agriculture, Bengal, regarding the supply of seed cane, and I have just heard from him, enclosing a letter from his assistant, dated 2nd February, 1900, in which he writes, " I beg to report that I subscribe to Dr Leather's opinion to experiment with the Samsara variety of sugarcane in Bihar This is a soft, thick, variety, which is cultivated to a large extent in the Burdwan district It has given very good results in our Farm, and the gur manufactured from its juice is much appreciated by the cultivator of Bengal " The price, however, is R4 per kahan, which weighs about 8 maunds, and it takes 12 kahans to sow one acre The railway freight from Burdwan to Muzaffarpur is 0-13-1 per maund, so with cutting, carting, etc , the seed cannot be laid down under R130 to 140 per acre, according to the distance, which is a heavy item to start with, and it will therefore take some time before Bihar is stocked with much good cane

Cost of cultivation and manufacture of gur or shakkur —As sugarcane is at present grown in Bihar, I have, together with Mr R Hudson, made a rough estimate of the probable expenses incurred in cultivation, and manufacturing the juice into either " gur " or " shakkur " of an acre of sugarcane

	R	a	p	
Seed	9	0	0	
Rent	5	8	0	
Cultivation	4	8	0	
Planting	2	4	0	
Cutting and carting	11	4	0	
Supervision	4	8	0	
Manufacturing	8	0	0	
	85	0	0	or say £3 per acre

I have little or no figures to go upon to frame the above estimate, but I do not think I have understated it, taking into consideration the results of three factories where gur has been, and is being, made this year

Newada Factory (Mr Lawrie's) —

Cane cut	*acres* 34
Gur made	*Mds* 398 19*s* 1*c*
Amount realised	*R*914-10-3
Cost of manufacture	*R*157 1 0

This sugarcane was flooded during the rains, and the yield was consequently very disappointing, and, over and above, there was no European in charge of the place, so it is impossible to say whether the crop was looted or not

Newada Factory (Mr Walker's) — Two and one fifth acres sugarcane were manufactured into gur, which was sold for R220, whilst the total expenses, including rent, cutting etc, only amounted to R46, showing a profit of about R80 or say £5 6 8 per acre

Domrah —One acre gave 407 factory maunds of sugarcane, say 13½ tons Gur made, 32 maunds, value at R3 per maund = R96 Expenses are not given, as the work is proceeding Mr Wilson, the manager, writes that he expects better results from smaller cane Manuring will probably be a very heavy item in expenditure, and is not included in this estimate, as it is impossible to lay down any basis, but, on the other hand, one may reasonably expect to get a larger return of saccharine matter from manured lands, which will counterbalance the expense The seed in the estimate is put down at the usual price paid for sugarcane in Bihar

Yield of sugarcane per acre —I am informed that a fair outturn is 15 tons per acre, which should give about 1 to 1½ tons of sukkur, and this is borne out by Dr Leather There are three kinds of unrefined sugar, namely —

		R	*a*				£	*s*	*d*	
Ráb	value	2	8	per md	or		4	10	8	per ton
Goor	"	3	0	"	"		5	9	3	"
Shakkur	"	5	0	"	"		8	7	9	"

and the above were the prices paid for the same at Sakri sugar works, in December 1899 From enquiries I have made since, I find that R6 per maund is paid in the bazar, at Muzaffarpur, for good shakkur

Refining sugar — This at present is done at Sakri (Bihar), Cossipore (Calcutta), Cawnpore, and Shahjehanpur in the N W P, and I believe these are the only refineries on this side of India I am given to understand that at Sakri the cost of making one ton of refined sugar from shakkur is 19*s* per ton, probably it is dearer elsewhere, as labour would be more expensive Apparently the difficulty is to have a sufficient stock of raw sugar to enable the work to be kept going the whole year, and that must militate against good dividends, but it would be different if planting and refining were combined A central refinery might be connected with a group of factories which could arrange to grow sufficient cane for a year's supply, and after the raw sugar had been made it could be stored at the factories, till it was required at the refinery, as every factory has plenty of godown room available I suppose a certain amount of loss would occur, but I am unable to say how much, though I should be inclined to think it would not be considerable Supposing it were decided to work a refinery independently of the factories, it would have to buy the raw sugar in the open market, in competition with a refinery already working in

these districts Mr R Hudson's corrected figures, showing 19*s*, as the cost of refining a ton of shakkur, instead of 12*s*, would only show a profit of £1 17*s* 4*d* per ton of sugar, and from this would have to be deducted interest on capital, so the profit on refining alone would not be a very large one

In the "Times" of 2nd September, 1899, the writer on the sugar industry states "The time is approaching when cane sugar will, if conducted by brains, re-establish itself in that command of the markets, from which it has been temporarily displaced by its parvenu, but more intelligently managed, rival The 'ultimate possible' in the cheapening of beet sugar has been much more nearly approached than in the case of cane sugar, which has a far larger margin of potential improvement to draw upon In Germany, where most progress has been made, the most recent (and economical) figures show that 8 tons beet root make one ton of sugar, and that beet root costs 17*s* 8½*d* per ton (as much as over £2 per ton in Wurtemberg) in other words, the raw material alone costs £7 2*s* 8*d* per sugar ton Besides this, only 13 tons beet root are grown to the acre, now only under most decidedly unfavourable conditions of soil should less than 20 tons of cane be produced per acre" So, aided by the best machinery and careful cultivation, Bihar ought to be able to produce sugar considerably cheaper than Germany does

Manures for sugar cane—I understand that oilcake is one of the best manures for sugarcane, and if that is the case, I think it would be a good plan to work hydraulic presses for crushing oilseeds in conjunction with the refinery Each concern connected with the refinery could grow a certain amount of oilseeds in conjunction with indigo and sugarcane, and could also purchase locally enough seeds to provide them with the oilcake they would require for manure, and it could thus be laid down at a much cheaper rate than it could be purchased, even if it was available, which is not the case At Poona oilcake is extensively used as a manure for sugarcane, and the natives pay a very high price for it From enquiries I have made, I understand that there is a large demand for oils, both for local and export consumption

[Appendix No 3]

Memorandum by Mr Ernest Mylne, of Beheea, on Sugar Cultivation and Manufacture in Shahabad

[Herewith a memorandum regarding our experience of cane growing and sugar making in this district of which you can make any use you like I have little or no experience of Tirhoot, but I am very strongly of opinion that sugar cultivation and making by Europeans in the Shahabad district is not possible]

Among other experiments some years ago we tried sugar cane cultivation, sugar making, gur, rab, kutcha and pucca chinee The experiment was carefully gone into under European supervision, but on a small scale with a view to feel our way before launching into the purchase of costly machinery After a trial extending over two or three years we had to abandon the venture as we lost money over it, and were convinced it would not pay The following were some of the difficulties we had to contend against —

(1) Heavy cost of cultivation
(2) Want of sufficient and suitable land near the sugar works

(3) Want of cheap manure

(4) Heavy cost of carrying cane to the works

(5) Uncertain yield per acre owing to variable seasons

(6) Refusal of the ryot to contract to grow cane for the sugar factory

(7) Refusal of ryots to sell their standing crop of cane or sell any portion of it at a fair valuation

It may be put forward that our experiment failed because it was on a small scale, but the experience gained taught us that a large undertaking in face of the obstacles above referred to was impossible

Though the conditions may be somewhat different in Tirhoot I believe the planters there will have, if not all, some of these difficulties to contend against, and possibly will find it no easy task to compete with the ryot in cane growing and the production of rab and jagri Sugar works may be possible where suitable land is to be had close at hand, where irrigation is not necessary, and where the ryot would contract to grow cane, but such works, if remunerative (which I very much doubt), would probably benefit the few and not the indigo industry as a whole or the planters generally Were the Tirhoot planters to put in cane as extensively as it is proposed there would seem to be a real danger of prices running down to such a figure as would leave little or no margin If the planters really want to know what is in cane growing and sugar making, the most sensible plan would be for them as a body to form a company to put in, say, 500 acres of cane and run up a small refinery with the newest machinery, which would be to the fore should the venture prove successful, should it prove otherwise the individual loss would be small and shared by the community A practical test such as I suggest would be of more value than all the theories and opinions the committee could gather

I give below what it costs in Shahabad to put in a bigha of cane and to turn it into *gur* or *rab* in the native method The Shahabad bigha is five eighths of an acre

	R	*a*	*p*
Rent for 1½ years at R6	9	0	0
Manuring with village sweepings	5	0	0
Seed or cuttings, 8,250 at R2-8 per 1,000	3	8	0
Ploughing 10 times at R0-8	5	0	0
Digging or hoeing 8 times	5	0	0
Canal water, including hot weather rate	4	6	0
Sowing cuttings	1	0	0
Squeezing and boiling juice at 4 annas per táo or boiling, on an average outturn of 50 táo	12	0	0
Supervision, sundries, and interest to mahajan	7	8	0
	52	14	0
Take the average outturn to be 50 táo, each táo or chaki being about 20 pucca Calcutta seers=25 mds *gur* at an average bazar rate of 14 pucca seers	71	8	0

[Appendix No. 4]

Note on Sugar Cultivation by Mr W. H. Moreland, I C S, Director of Land Records and Agriculture, N.-W P and Oudh

In the literature of the subject there is some want of uniformity in the nomenclature of the various sugars In this note I use the following terms

Cane-sugar, denoting the form of sugar that exists in the ripe cane

Invert-sugar, denoting the products of hydrolysis of cane-sugar whether produced by the action of dilute acids or by the ferment *invertase*

2 In discussing the proposal to replace indigo by sugarcane, I shall have occasion to insist on the necessity of adhering to certain principles which are recognised by cultivators in this part of the country, I will therefore begin by stating these principles and explaining at some length the grounds on which I consider their acceptance indispensable to the economical production of sugar The first principle is that the production of cane-sugar per acre depends, other things being equal, on the skill and care of the cultivator Numerous detailed rules come under this head which I may pass over as differences of soil and climate prevent their universal application, but the general principle which I have stated would receive the consent of any skilful sugar-grower in these provinces The second principle is that the time chosen to cut the crop materially affects the product, and the third is that once the crop is cut there must be no loss of time The cane should go straight from the field to the press, and the juice should go straight from the press to the boiling pan Four arguments may be stated for holding that adherence to these principles is indispensable

3. In the first place, the principles are the result of many generations' practical experience, gained by men whose income depended on the success of their cultivation In the second, they are found to be necessary by persons who have taken up cane-growing with no previous prejudices As an example I may cite the experience of the present superintendent of the Cawnpore farm who came to these provinces from Madras, and who, as the result of his seven years' experience of practical work here, tells me that the necessity of adhering to these principles would have been obvious even if the whole subject had been outside the range of science Thirdly, there is the fact that these principles are found to apply in other countries, where the cane is grown under very different conditions On a recent visit to Queensland I found that their importance was clearly recognised by the heads of the industry, and that though the local conditions are such as to permit profitable manufacture without a strict adherence to them, the loss in sugar that results from any deviations is fully admitted Fourthly, there is the fact that these practical rules appear to be in close accordance with what is known of the physiology of the sugarcane It will perhaps be convenient if I explain this last statement in rather fuller detail, premising that I have not studied this branch of the subject experimentally and that the facts which I state are drawn from the latest literature on the subject that I have been able to procure

4. Cane-sugar appears to be an intermediate product of the plant, that is to say, that though it is produced in the leaves with a view to being consumed

in the nutrition of the cells, it cannot be assimilated *in the form of cane-sugar*, but must first be inverted, the invert-sugar which results can be readily assimilated by the cells Thus we may say that in the growing plant there is a continual production, and at the same time a continual destruction, of cane-sugar When, however, the period of active growth comes to an end, usually in these provinces about the middle of October, the production of cane-sugar continues, but the rate of destruction falls off as there is no production of new growth in progress, and consumption is limited to the demands of the existing plant, there is thus at this period an excess production of cane-sugar, which is stored up in the sap If the plant were allowed to stand, this cane-sugar would be consumed as soon as the new period of growth should set in, but the crop is cut before this period arrives, and the aim of the cultivator should be to cut the crop exactly at the period when the accumulation of cane-sugar is at its maximum If he harvests too early, he loses the additional amount of sugar which would have been produced if he had waited longer, while if he waits too long the stock of sugar has begun to diminish, being expended in starting the new season's growth This then is the scientific justification of the practical rule which insists that the crop shall be cut exactly at the right time the importance of the rule probably varies according to the length of the resting period, which again depends on the climate, being greatest when the winter is most severe

5 When, however, the canes have been cut and stripped of their leaves, the supply of new cane sugar is irretrievably cut off, and by no process that has yet been discovered can it be increased, thus whatever inverting forces may be at work within the cut cane have full scope, and whatever is inverted is lost I do not know of any investigations showing exactly what forces are at work in this direction, but it is known that the juice of the cane has an acid reaction, and that dilute acids can effect inversion, while from the fact that cane-sugar is regularly inverted in the metabolism of the living plant, it may be inferred that the appropriate ferment, invertase, is present in the tissues, and, if not actually in the juice, may be brought into it in the process of crushing Again, it seems probable that all vital processes are not immediately stopped when the cane is severed, but that metabolism continues for some time this would account for a good deal of deterioration when once the supply of cane-sugar is cut off Thus any changes that will take place after the cane is cut will diminish the quantity of cane-sugar, so that the practical cultivator has anticipated the recommendations of science in insisting that no time shall be lost between the field and the boiling-pan

6. Owing to climatic and soil variations it is not possible to state so definitely the scientific basis of the remaining principle,—the importance of care and skill in cultivation It is obvious, however, that the amount of cane-sugar accumulated on an acre will depend mainly on the perfect health of the individual plants, and that this condition can be secured only by attention to the details of cultivation, especially in the period between the preparation of the seed-bed and the setting-in of the monsoon.

7 These then are the grounds on which I think it desirable to insist on the importance of the practical rules of cultivation, but, as I have incidentally mentioned above that some deviations from these rules are admitted

in Queensland, I will now describe the extent of these deviations and the local circumstances which render them admissible In what follows I am describing mainly what I learnt at a large and thoroughly modern factory, the manager of which is a recognised authority on sugar, and the staff of which includes three or four chemists, the plant of this factory represents an expenditure of about £120,000

8 First as regards the rule that the cane should be cut just when ripe, it is admitted that the greatest quantity of sugar per acre would be obtained if the harvest season were limited to about two months, but it is impossible that the plant could be worked remuneratively if the season were so limited, and it is more profitable business to work for about six months in the year, thus dealing with a much greater quantity of sugarcane, and securing a larger gross outturn

9 Speaking roughly, it may be said that, in an ordinary year, during the optimum months the cane will yield fifteen per cent of its weight of cane-sugar, during the two months before this period it will yield about fourteen or a little less, while the first two months of the harvest it will not yield more than twelve and a half per cent In other words, if a thousand tons of cane were crushed in the optimum period it would yield 150 tons of sugar, while if the crushing were spread evenly over six months, the yield would be 138 tons or a loss of eight per cent In the case I am describing, this loss falls mainly on the farmer owing to the system under which work is carried on, the farmers agree to grow so much cane, to be delivered to the factory at a price of so much per ton of such a quality, quality being ascertained by analysis of a sample of each lot delivered. Thus the farmer receives less money for cane cut early in the season than he would receive if it were allowed to stand till later, and some kind of arrangement is made by which this loss will fall more or less equally on the various farmers, some part of the crop of each being cut early and some later Presumably the farmers consent to this arrangement because in this way they are sure of a market for the produce of a larger area, and can thus secure on the whole a larger income

10 Next as regards the loss of time, it is of course not possible to ensure that the cane shall go straight from the field to the mill when the cane fields stretch eight or ten miles from the factory, but time is saved in every possible way The cane-lands being continuous and practically uninterrupted by stretches of other cultivation, it is found profitable to have a system of light railways running through them, from which temporary sidings can if necessary be laid down to accommodate almost every field When the factory is ready to take the produce of a particular field, intimation is sent to the farmer that empty trucks will be provided at such a time, and will be taken away by such a train The farmer has to load up the trucks ready for the train, which picks them up and takes them straight to the factory yard Here they pass over a weighbridge and thence direct to the "feed" of the mill The trucks are emptied on to the "feed," which carries the cane under the rollers without any further delay, and as the juice is pressed out it is pumped direct into the evaporators Thus it will be seen that a large amount of capital has been sunk and a considerable organisation is maintained partly at least with a view to avoid delay in the treatment of the cane.

11. And as regards the style of cultivation, this factory, like most others that I have heard of, has found it necessary to adopt the system of payment by analysis, a scale of prices per ton is drawn up according to the percentage of cane-sugar, and as each consignment comes in, a sample is taken to the laboratory on the premises, where the percentage is determined, the price can then be calculated from the weight, as ascertained at the weighbridge, and the composition as determined in the laboratory

12 In order to show how the farmers can bear the loss arising from the long period of harvesting, it is necessary to give a brief account of the conditions of cultivation In the part of Queensland of which I am writing, the normal outturn (using the word normal in the official sense), is about 25 tons of cane to the acre, and as on the whole about 14 per cent of this is cane-sugar, the farmer expects three-and a-half tons of sugar to the acre, if all his crop were harvested at exactly the right time, he might perhaps expect almost four tons, a substantial difference it is true, but not a matter of life and death The cost of production is practically reduced to two items, planting and harvesting When a farmer starts to grow cane, he begins by cutting the trees and burning the brushwood and the cane tops are then at once planted between the tree stumps Sometimes the ground is first ploughed roughly, sometimes the tops are merely dibbled into holes These plants will ordinarily give successive crops for five years, without either manure or irrigation, after about five years the stock wears out and the land has to be replanted, but so rich is the land that the most that has hitherto been done in the way of manuring is to turn in a leguminous crop between two cycles of sugarcane Thus despite the very high cost of labour, there is so little work that the crop is not very expensive to grow, while the cash return is high and a large area is available. Contrast the Queensland farmer with the Gorakhpur cultivator, who according to my calculations does not expect to get more than R94 from an acre, and to do so spends R82, if the cash value of the labour of his family is included.

13 This difference is due mainly to the scale of work and to the condition of the soil The Gorakhpur cultivator has neither the capital nor the land necessary to grow a large area, and even if he had it is not to be expected that the old lands of these provinces will yield the same crop as the virgin soils of Queensland The point on which I wish to insist here is that the Queensland farmer can afford to sacrifice some portion of the sugar in order to work a larger area, but this course is out of the question in these provinces, as, even assuming that the land is available, the expense of cultivation is so great that the crop can be made to pay only when most of the labour can be supplied by the members of the cultivator's family The evidence in support of this statement will be offered immediately

14 If a planter decides to enter on the sugar industry, his intervention may begin at one of three stages he may grow the crop for himself, or he may take over the raw produce from the cultivator either in the form of cane or of juice, or he may take over the *gur* or *ráb* and refine it for the market In the last case his position would practically be that of a sugar refiner such as the Rosa Company or the Cawnpore sugar works, with the advantage of being able to control the supply of raw material from his estate. This course is probably not contemplated, and in any case it is a purely commercial

matter which I am not competent to discuss, I pass on therefore to a consideration of the other two possible courses.

15. First, as regards the planter who grows cane for himself, either on his own land or on land rented for the purpose In this case he should have no difficulty in so organising his business as to secure that the crop can be cut at the best possible period, and that no time shall be lost in extracting the sugar from the cane Whether, however, he can afford to cut all his cane at the optimum period will depend on the amount of machinery which he employs. If he adopts the small bullock mill and the open furnace, he will be in the same position as the small grower, with this difference that the small grower does most of his work himself and has a very small wages bill, while the European will have to pay cash for all labour, and perhaps for some supervision as well If, however, the planter goes in for expensive power machinery, the same question will arise as in Queensland, in order to keep the machinery employed for a sufficient period to earn the interest on its cost it may be necessary to extend the harvest season, and as the yield will undoubtedly be less and the cost of production probably heavier than is the case in Queensland, it may turn out that the sacrifice of part of the sugar involves the sacrifice of the year's profit A definite opinion can hardly be offered on this point in the absence of information as to the cost of machinery and the amount of capital that would be available, but it is a point that should in my opinion receive careful consideration from the individual planter who proposes to put much capital into the industry I am inclined to think that the resting period of the cane is shorter in these provinces than in South Queensland, so that the loss from harvesting out of season may be expected to be greater than the figures I have given

16 It is, however, when we come to the third principle I have laid down that the risks of direct cultivation appear to be most serious Sugarcane is a most difficult crop to grow, so much so that in these provinces the presence of the crop is an index of the most skilful cultivation At any rate it is an entirely different art from the growth of indigo, and a planter who took up sugarcane with no experience beyond that derived from indigo and cereals would find the practical acquisition of new knowledge a very costly matter Experience is needed to tell exactly what operations should be performed, and exactly at what seasons, and more experience is needed to tell whether these operations have been skilfully performed As I have said above, the crop is one that depends more than most on the skill and care of the cultivator, and even if the skill can be hired, the care that a man will give to a crop he is paid to look after is very different from that which he will give to his own field

17 Again the labour bill must form so large a proportion of the cost of growing cane that it is imperative to secure the utmost efficiency of labour I do not know how the case may be in Bihar, but in these provinces it is usually thought that no European can get as much work out of a labourer as that labourer would give willingly to his own land, and that very few Europeans can get as much work out of a body of labourers as can a native who knows exactly what has to be done and is working in his own interest In this connection it will perhaps be of interest if I give the results of some enquiries into the cost and profits of growing cane in these provinces The first I shall notice was made about twenty years ago by Mr J B Fuller, and purports to be an average for the whole provinces He reckons all necessary labour in cash,

whether or not it is paid for by the cultivator, but he allows nothing for "the care and attention which an industrious cultivator and his family apply to their land out of hours, and which often serve to extract a profit under circumstances which would otherwise allow of none" Calculated thus, the cost of cultivating an acre is about R63, of which the labour bill accounts for R28 The cost of making *gur* adds another R41, so that the total cost of production comes to R104 The normal yield is taken at thirty maunds (using normal as always in the official sense), so that with *gur* selling at R3 8, a fairly high price on the average, the cultivator would exactly clear his expenses but would have nothing over, in other words all that the average cultivator could draw from a normal crop, that is, a crop as good as he has any right to expect, is the hire of the labour which he and his family have supplied

18 The next estimate I shall notice is one which I drew up two years ago in the course of the discussion of the bounties question It is on the same lines as that which I have just given, but the cost of each item was carefully redetermined and the estimate was framed separately for each division of the provinces On this estimate, taking *gur* at R3-4 0 per maund, the highest profit per acre was R30 in the Meerut division, where everything favours the crop, the lowest was seven rupees in Agra, where there are numerous disadvantages The figure for the whole of Oudh was R18, while for Gorakhpur, which of all the divisions has I suppose the closest resemblance to Bihar, it was as low as R12 Remembering that these calculations are based on normal outturns, they so far confirm the earlier estimate that they show clearly that the advantage of the crop to the cultivator lies in the scope it affords to his best and most unwearying labour

19 The third estimate was made last year by a number of selected officers, and quite independently of the foregoing In this enquiry, the actual outturn of the season was ascertained and the cost of production estimated on a cash basis The results obtained were in Aligarh, R20 profit, in Muzaffarnagar, R8, in Etawah, R4, in Meerut, R2, in Cawnpore the account balanced, and in Mainpuri there was a loss of R14 These results were obtained by selected officers in the Revenue Department, similar enquiries made by officers in the Irrigation Department showed small profits in four cases, and small losses in two Bearing in mind that the season was unfavourable for sugarcane, these estimates appear to me to be in close accordance with those already quoted, and the whole series tends to establish the fact, which indeed is a matter of notoriety, that no one can grow cane in these provinces unless he can command labour without cash payment Or in other words, the chief advantage of the crop is the opportunity it affords for employing the labour of the cultivator and his family, especially at times when they have not much else to do

20 I have no knowledge of the actual conditions of cultivation in Bihar, so that I cannot say how far these estimates apply but it should be mentioned that in these provinces the cost of irrigation is generally an important feature, varying from seven to twelve rupees, or even more in some cases So far as irrigation can be dispensed with the profit will of course be increased My object in giving these figures is to establish the truth of the ordinary idea that in these provinces sugarcane will not pay the man who looks on It is for those who have a knowledge of Bihar to say whether the conditions are so different there that the same conclusion does not apply

21 The alternative before the planter is to leave the field work in the

hands of the native cultivator, and take over from him either the cane or the pressed juice In this case he will not run against the principle of cultivation, provided that it continues to be the interest of the grower to get the maximum of cane-sugar in the cane This condition can, so far as I know, be attained only if the price is determined by analysis Otherwise it would be the cultivator's interest to produce, not as at present the richest cane, but either the heaviest cane, or the cane yielding the largest quantity of juice The cultivator would, I believe, in no long time adapt his cultivation to the conditions of his market, and the planter would find himself receiving in the first case a heavy cane with little juice of poor quality, and in the second a large quantity of thin watery juice, which would require much fuel for evaporation and would yield a low proportion of cane sugar In either case he would find his cost of production much increased and his yield of sugar seriously diminished.

22 But there are also drawbacks in the way of purchase by analysis The work of analysis requires a good deal of practical training in a specialized laboratory in addition to a thorough general knowledge of chemistry I believe I am correct in saying that very few planters could do this work themselves, and that the great majority would have to employ a chemist But a chemist with the necessary qualifications would probably cost at least four or five hundred rupees a month, which would add very materially to the fixed expenses of the factory, unless things were on a larger scale than is likely to be possible The apparatus too is, I believe, sufficiently costly to make some difference It is very doubtful whether several factories could combine to employ one chemist, each would want him at the same time, and no one would want him when any one could spare him The samples too should be examined at once and on the spot, as they would probably deteriorate rapidly if sent to any distance for analysis

23 In this connection there is another question which I can raise but which must be answered by those who know the Bihar peasant Would he agree to sell by analysis, or would he constantly dispute the chemist's dictum, based on processes which he cannot see and which are unintelligible to him? I am quite sure that our eastern cultivators who live on the borders of Bihar would demand an impartial court of appeal, and that the system of analysis would be very unpopular even if any one would agree to it at all

24 There seems therefore to be some risk either way the planter may buy by weight alone, and find that he cannot rely on the cane being sufficiently rich to be worth crushing or he may buy on analysis, at the risk of stirring up ill feeling and of being unable to get enough cane grown to feed his plant It is necessary, however, to turn aside at this point from my argument to notice the *bel* system of Rohilkhand, which at first sight appears to show that cultivators will not allow the quality of their cane to deteriorate when they sell by weight alone

25 This system exists in a few districts only, the cultivator presses the juice for himself but hands it over to the *khándsárí* who boils it down into *ráb* with his own plant The price is fixed at so much per hundred maunds of juice, and where this system has prevailed for many years no complaints appear to have arisen that the quality of the juice has become markedly inferior It may therefore be thought that what the *khándsárí* can do without loss may be safely

done by the planter, but there are some distinctions to be taken into consideration In the first place the *khándsárí* does not pay a uniform price, he knows from his experience the approximate value of the juice produced by the cultivators of a particular village, and he regulates his schedule of prices accordingly Next there is the extraordinary minuteness of the native manufacturer, his attention to detail is such that by watching the process of evaporation he can form a very good idea as to the quality of the juice, and can regulate his next year's prices accordingly I doubt very much whether such acuteness of perception would be acquired by the majority of the planters And finally there is the important fact that the *khándsárí* often pays rates so iniquitously low as to leave a handsome margin, while he has obtained such power over the cultivator as almost to deprive the latter of initiative The usual method by which he attains this position is, I understand, to offer at first good prices (including a liberal advance), but with high rates of interest and severe penalties for non delivery of the amount of produce stipulated The cultivator who is at the time in need of cash does not as a rule scrutinise the terms very closely and they are in fact very burthensome He very soon therefore finds his account does not balance, and that when he has parted with all his juice he is still in debt to the *khándsárí* Once in this position, the *khándsárí* can force him to accept very inadequate rates for the next year, so that he is quite unable to clear himself, and comes completely into his creditor's power, as he knows that a decree can be got against him, and that he can be at once sold up and ruined It is obvious that people in this position are not likely to attempt to do anything that would injure their master when he has the power of immediate and effective retaliation These considerations show that the *bel* system is hardly a fair precedent for the planter, and it may perhaps be added that, so far as I know, the Bihar cultivator is infinitely more cunning than the small farmer of Rohilkhand

26 To return then to the main course of my argument, I have attempted to show that if the planter takes over the raw material, there is a risk that he will not get the same quantity of cane-sugar as would be obtained by a cultivator working for his own benefit, and I have also shown that, if experience in these provinces is to be accepted as a guide, the margin of profit is very small in the case of the cultivator, so that the planter could not afford to sacrifice any portion of the possible outturn unless he can introduce great economies into the processes of manufacture, the possibility of such economies will be considered further on The next step in my argument is to show that the planter who takes over the raw material will have difficulties in respect to the other two principles which I began by laying down First, as regards the time of harvest The same considerations come into play here as were stated when I was dealing with the system of direct cultivation, if work is undertaken on a small scale and with elementary plant, there should be no difficulty in harvesting within the optimum period, but in this case it must be remembered that there will be few opportunities of economy, and that having regard to the low rate of profit it is open to question whether with a small outturn the business would be worth undertaking If on the other hand expensive plant is set up, it is, I suppose, hopeless to expect that under any circumstances it could pay if worked for so small a period as two months, so that some arrangement would be necessary of the kind which I have described as being in use in Queensland It is, however, very doubtful whether the Bihar cultivator could be brought into any

such arrangement, if he is like cultivators in these provinces, he has a very fair idea of the loss that would result from harvesting his cane before it was ripe, and I do not think he would agree to do so unless he were to receive the full price for ripe cane, no matter what might be the time of harvest. It will be obvious from the figures that I have quoted that this course would seriously reduce the profits of the planter, who could scarcely afford to pay for sugar which he did not receive Even if the system were introduced, each cultivator would probably clamour to have his own particular plot, "a very little one," cut at the proper time, and there would be room for a good deal of friction and discontent, especially if the rotation were left to any extent in the hands of a native subordinate, who might see an opportunity for levying fees for priority

27. And there would also be considerable risk of loss of time between the field and the evaporator such an organisation as I have described at the Queensland factories would probably be quite out of the question except in factories of the largest scale, and doubtless in ordinary cases the cultivator would be required to bring his raw produce to the factory This system would probably work out somewhat as follows, at first the orders would provide that so many cultivators should bring their produce on a certain day, the number being so fixed as to provide just enough produce for the day's working, no doubt some cultivators would be late and the factory would be insufficiently supplied with the raw material After this had occurred a few times, the planter or one of his subordinates would arrange to have more cane cut than was required in order to keep the factory fully supplied, and there would generally be some cane left overnight, it needs practical experience to know the extent of deterioration that may occur in a single night, and the aggregate loss in a season's work from this cause might be very serious Again the cultivators would have no motive for punctuality, at present they have a motive, for they know that the cane will deteriorate if allowed to stand after cutting and that the loss will fall on them, but when they are selling to the planter a slight delay will seem of no importance

28 Thus it will be seen that there are distinct risks of the loss of cane-sugar both in cultivation and in harvesting, the whole of the former and part of the latter risks could be avoided by the system of purchase by analysis, but, as I have shown above, that system has difficulties of its own even if the cultivators would agree to it, and in any case there would be, with any but moderate sized factories, great difficulties in arranging a rotation of harvesting so as to keep the plant employed for a sufficiently long season

29. I have now enumerated the risks that the planter would have to consider owing to the existence of the three principles that I began by laying down, and I turn to another point that appears to me to be of importance from the planter's point of view If the ordinary cultivator makes little or nothing out of the crop beyond the hire of his own and his family's labour, it is obvious that the planter can make a profit only by introducing large economies and improvements But this can be done only by a man possessed of very special qualifications The manager of a factory must first of all have a thorough practical knowledge of the art of cultivating sugarcane, that is to say of the most difficult branch of the cultivator's art, and he must be well acquainted with the numerous varieties of the cane, a study in itself of considerable magnitude

Secondly, he must know a certain amount of general chemistry and a good deal of that complicated subject, the chemistry of the sugars Should he desire to do his own analyses he will need a course of technical training, and if he relies on others for his analytical work he must still know enough chemistry and general plant-physiology to understand the results put before him, and to apply them in his future work For it will, I suppose, be admitted that success in the sugar industry is out of the question without the aid of science, where the work has been done by rule of thumb the industry has decayed, and where it is flourishing the success may be traced to the steady application of science to every detail of the cultivation and manufacture Thirdly, the manager will need to have a good practical knowledge of machinery, especially if there be any considerable amount of plant, and he will also require the ordinary qualifications of a man of business All over the world in fact the management of sugar factories is recognised as a special profession requiring special qualifications and commanding high salaries, and there must be considerable local advantages to enable amateur management to compete with professional

30 While enumerating the disadvantages under which the planter would labour, it would be wrong to overlook the risk of a breakdown of the machinery during the harvest This risk, and the difficulty of obtaining skilled repairers without delay, has to my knowledge deterred many native capitalists in these provinces from procuring expensive machinery, and it would be specially serious in the case of sugar, as any delay would interfere with the work of the harvest and would probably involve a loss of sugar even after the plant was again in working order

31 The disposal of the extra sugar produced is also a matter for consideration The intention, I suppose, is to put it on the Indian market, where it will be in competition with the products of Mauritius and of European countries, as well as with the produce of these provinces There is very little possibility of extending the demand for sugar, whether raw or refined, except by a substantial lowering of price, and profits in the industry in these provinces are so low that a substantial fall in prices would ruin the industry,—the most important of the provinces,—and thus produce or at least precipitate an economic crisis as serious as that which is now under consideration The disorganisation of the market would of course re-act on the planters, and calculations of profit founded on prices recently ruling might prove very misleading in the event of a large extension of the acreage under cane

32 I have stated at some length the disadvantages under which I think a planter would labour in manufacturing sugar, but I recognise that he would also have a good deal in his favour The advantages will doubtless have been pressed on the attention of the Commission and I need not dilate on them, but I may bring this note to a close by indicating briefly the principal advantages that occur to me In the first place a planter might be able to introduce better varieties of cane There is no doubt that, from the point of view of yield, many of the Indian canes are behind those of other countries, at the same time, there is always the risk with new varieties that they may be specially liable to injury from disease or from accidents of season, so that prolonged experimental work would be a necessary preliminary The manure supply could doubtless be organised with advantage, my own experience points to castor cake being (within certain limits) an admirable manure for the plant, and perhaps it might

be profitable to grow castor on a large scale, and to apply the power of the factory in crushing the seed at times when there was no cane to be crushed, the oil would probably fetch a profit and the cake would be available for manure I do not know enough of agriculture in Bihar to say whether this particular form of organisation is possible, but I mention it as an instance of what I mean by the organisation of the manure supply If again irrigation is found to be a necessity, the organisation of the water supply would doubtless lead to increased economy I doubt whether other economies are possible in the processes of cultivation, but there are certainly possibilities of improving the process of extraction, better mills would extract more of the juice with a less than proportional increase of power, improved furnaces and boiling pans would economise fuel, and the use of the centrifugal would enormously simplify the extraction of the molasses

33 I am not prepared to express a definite opinion as to the balance of advantages and disadvantages, the sugar industry is not a newly found eldorado, its possibilities have been thoroughly explored, and those who hope to make a profit out of it must be guided by past experience So far as I know, that experience shows that except in places where local conditions are peculiarly advantageous, the industry can be permanently successful only in one of two cases, either in the hands of small men who will work unceasingly and pay attention to the very smallest details, or in the hands of capitalists who can command, and are willing to employ, the resources of science The small man who only looks on, and the capitalist who works on in a rut, are alike failures, and as such are soon eliminated from the industry

[Appendix No 5]

Sugar Cultivation in Queensland, by Mr A F Walker, of Brisbane

1 —Average temperature and rainfall In the two principal northern sugar districts, Mackay and Cairns, the average temperature and rainfall last year were —

	Cairns	Mackay
Temperature	77 degrees (Fahr)	71 degrees (Fahr)
Rainfall	98 inches	72 inches

This may be taken as an average season for each district Taking the temperature and rainfall month by month for the first six months of this year (we will include December to make the season, an average growing one, complete), the results are as follows —

Month	Average Temperature	Rainfall (inches)
December	78 (Fahr)	9 17
January	70	20 82
February	75	0 65
March	75	4 12
April	72	0 78
May	70	2 89
June	68	2 17

Hot, muggy weather is the best for rapid cane growth, and when the sun shines strongly for a few days after rain, one can almost see it grow Cold checks the growth of course, and frost will kill the young cane if severe and frequent, but cold is still necessary to make up the density and harden the cane

Rain and then cold is very detrimental to growth, as the cane somehow deadens and if the water does not quickly evaporate, the cane will begin to "gum" inside

2—Irrigation In a country like Queensland, taking of course the northern portion of it, where cane is extensively cultivated and really the staple crop, irrigation must needs be an improvement, owing to the very unreliable and capricious nature of the rainfall, and not only beneficial, but absolutely necessary in many cases, to obtain crops that will really warrant the labour expended in harvesting alone The distribution of the rainfall on the average is not equal, and although it might be ample for a whole twelve months, such inequality destroys much of the value it would otherwise have Unquestionably the experience in most districts favours rain, that is, the cane suffers less from an abnormally wet season than from an average dry one, and the porous nature of the soil and subsoil makes this easily understood A growing year, however, with a fair distribution of rain during the twelve months produces weight, but perhaps less sugar, whereas irrigation, being under control, would have the effect of not necessarily producing weight at the sacrifice of sugar, which is an important consideration To derive the full benefit of irrigation, however, it should go hand in hand with artificial manuring, which must be placed first in the matter of assistance to cane growth There is very little irrigation done in Queensland, though experts have urged its general practice Where it has been adopted, in the most northern districts, water has been distributed over the land by means of a series of wells, with windmills and flumes, but this will only work well where the areas of cane are small For large areas windmills would prove unreliable and unequal to the work required, so that steam pumps would have to be used There are immense possibilities in irrigation for cane growing, and in places where the rainfall is uncertain, or where there are long periods of drought, successful cultivation would be impossible without Here, however, rain at very short intervals can be depended upon from the middle of January to the end of March, though of late the seasons have been dry in comparison with previous years Water lying for long on the ground, so as to make the cultivated area swampy, is exceedingly detrimental to cane growth, and the necessity for judicious drainage is undoubted During the present season, regarded as a very fair one in the sugar districts, good rain fell in January and February, a little in March, more in April and May, and during the winter months serviceable showers were experienced almost at fortnightly intervals To deal thoroughly with the question of irrigation, however, an exhaustive article would be necessary, and besides, in India, the home of irrigation, the matter has been brought far more up to date than in Queensland

3—Steam ploughing There is little or none in the cultivation of sugar at present, the chief reason being the question of expense Where the areas are small the steam plough is not serviceable by reason of the number of headlands that are necessary, and the sugar districts, being so far from coal mining localities, are not abundantly supplied with fuel On many of the plantations they were tried long ago, but the machines have been put aside and are now lying idle Again, so many different ploughs have been introduced to cover the whole of the work that the ground is ploughed and reploughed on the best plantations in so many different ways that the plain mould-board system does not save much time, unless the area of each field is very great

4—Planting the canes Cane plants are the top joints of the stalks, taken from the finest lengths and best varieties of cane grown the previous season That is, the cane is planted in March and August, the March cane being cut for crushing in July or August of the following year, when most of the mills generally start operations, while the cane planted in August is cut in November and December in the following year The best of the cane cut in the latter month is reserved for planting, according to the area required, about from two to three tons of plants going to the acre on the average according to scrub or forest land The practice of using *any* portion of the cane for plants is a decided blunder Care must be taken to select the springy part near the top In most districts in Queensland a length of about 18 inches, just below where the "cabbage" or leafy top ends, is cut off the stalk, the cane of course having been previously "topped" in the way of ordinary harvesting There is no reason, however, why a great deal more of the top should not be taken than is the custom In Honolulu and other places where cane cultivation is carried on most successfully and on most modern and scientific lines, the upper portion of the stalk is just cut sufficiently deep and near the hard cane formation to prevent shooting at the end, and again cut at the second or third visible point (assuming that the cane has been stripped of the dry leaves as high up as possible, that is, "trashed,") thus forming a plant ready for use it may be 14 or 18 inches long according to the length of the joints, and this should never exceed three, or four at the outside, which can be got from some varieties of cane without waste There is no need to waste the cane in cutting plants, but only to take so much as is of no use for manufacture, containing no sucrose The advantage of the cane top or terminal buds over other portions of the cane is an early, vigorous spring, with a rapid continuity of growth, producing in the end a fully matured and robust cane Other portions of the stalk may be grown equally as well perhaps, but the spring is considerably slower and the resulting tonnage much less Care should be taken to select plants from canes entirely free from "gum" or disease of any kind, as a few plants will spread disease over a whole field in time The plants should be placed in a deep, well opened drill, two abreast, 18 inches apart, with "eyes" (little buds at the joints) on side in one direction and covered as the nature of the soil and prevailing weather may suggest If the "eyes" on the plant are good only one plant need be dropped After a spring a light moulding may be given, but the drills at this stage must never be broken in or levelled off The method of planting is for the black boys to go out into the field with small bags full of plants over their backs, and walk down the rows as directed carefully dropping the lengths into the drill at the distance above stated, which they soon learn to do The ground must of course be thoroughly tilled before planting

5—Manure In Dr Maxwell's report upon the Queensland sugar industry upon which all late improvements in cultivation have been based, the question of past failure in raising abundant crops, the exhaustion of the land, and poor quality of the cane, is all summed up in the evidence he obtained regarding the want of manuring to all the farms and most of the plantations in the north Personally I know some plantations that are now lying idle where successive crops were reaped for a period of 28 years without any manuring whatever to speak of Nothing was given back to the land for all that was taken from it, and consequently the land was impoverished Now artificial manuring has become a necessary part of the work on almost every farm of any extent, while

"green" manuring is also being largely adopted The old idea of robbing the soil of elements by cropping without restoring any is recognized as disastrous, but the lesson has only been learnt by bitter experience in many cases Still in many places the former careless waste of manures exists The trash is still burnt, thus scattering to the winds the nitrogen and humus matter intended for the soil, and exposing the ashes also to being frequently blown away The coarse molasses leaving the mills, which also contain notable quantities of the vital elements taken out of the soil, are found running to waste instead of being returned to the lands The filter press refuse, rich in elements that the soil needs, is also wasted instead of being carefully reserved The principal manures (artificial) used upon the land for cane are sulphate of ammonia, sulphate of potash, and superphosphate, as follows —

Manure	Quantity per acre	Price per cwt
Sulphate of potash	One cwt	R 15 per cwt
Superphosphate	Three ,,	,, 5 ,,
Sulphate of ammonia	One ,,	,, 15 ,,

Green manuring has been extensively gone in for of late, planting the cane area after the third ratoons have been taken off with such greens as are most likely to replenish the soil with some valuable plant foods, while taking little of what the cane really requires This saves expensive manuring, and also provides valuable fodder for stock, or the greens can be ploughed in afterwards and used as manure that way These green manures are mostly cow pea, velvet bean, and other such fodders while lupins have been urged by a great many as fertilizers The advantage of both artificial and green fertilizers may be not so much the supply of plant foods not otherwise to be obtained from the soil by the cane, as the changing of unavailable into available forms of plant food Sulphate of ammonia supplies the most expensive of all plant foods—nitrogen, containing about 20½ per cent of this element Nitrogenous guanos are valuable manures again, also dried blood, kainit (the most common product of German potash mines) bone dust, and nitrate of soda Farm yard manure can be used without restriction or be mixed with any of the fertilizers already mentioned No matter how well the land bears at the start, after the third ratoons have been harvested, manure should be liberally supplied Such outlay will bring its own reward

6—Cultivation before and after planting On this question an exhaustive article could be written without dealing too much with any portion of the necessary field work The modes of handling the land here have for a long time been crude and superficial In the deepest soils ploughing has been shallow, and more adapted for cereals than for the larger and wide reaching root of the cane in its search of food A thorough preparation of the ground before planting, meaning the turning over of the surface soil to a depth that its staple will bear, from nine inches to two feet, and the movement of the sub-soil, followed by cross-ploughings and deep cultivation is the ground work of the crop Deeper cultivation of course depletes the ground of its stock of plant food rather than adds to it, as the crop is larger and more completely robs the land of what it contains, so there is need for good manuring where there is the best cultivation In some sugar growing district familiar to the writer soils yielding the largest crops receive the heaviest applications of manures in return Shortly, however, the ground is generally ploughed twice after being broken up, harrowed and cross-ploughed, being finally ridged

and drilled in rows in the ordinary way of planting most other crops The plants are dropped in the hollows left on the top of the ridges and afterwards covered in to the depth already stated This is all done with the plough, except the planting of course, which is done in the way described elsewhere in this paper The young cane should be kept free of all weeds until it covers the ground, and should be regularly cleaned afterwards until about four or five feet high Up to that time the horse can go through it with the scarifier, the rows being about four feet apart With a small plough, when the cane is about two feet high, the soil on each side is turned over on to the roots After the cane is cut, and this must be about two inches under the ground, and the tops taken off, the plough goes between the rows and the soil is again thrown over the roots The cane is not planted again, that is, but the roots are allowed to grow again, the same process of cleaning being gone through The cane has been cut and again allowed to grow without planting, and yet again, so that one planting really does for four crops This system is known as "*rattooning*," which has meant that ploughing after each crop shall not be done, and that the old root system of the previous crop shall be left practically undisturbed, but modern agriculture is against this The cropping should not go further than second rattoons, or else a great falling off in yield will result by reason of the depletion of the soil And even if allowed to go this far, the cultivation should be rigid, so that the soil should again be disturbed to a good depth, and the exposure of the earth, containing the dregs of the previous crop, be exposed to the oxydising and sweetening action of the sun and air The plants should be kept thoroughly clean with the hoe, and the first rattoons will then yield a crop not much behind the first After the second rattoons have been harvested, the ground should be thoroughly ploughed and manured again, and care taken to have the row where the drill formerly was, so that the plants this time really have fresh feeding ground, and this should be done at every alternate planting Scientific agriculture is opposed to continuous rattooning, as it means the impoverishment of the soil to very little purpose The best experts are against more than two crops being reaped without replanting and plentiful manuring The various methods of disc ploughing and uses of other cultivators would take too long to detail here

7—Best varieties of cane Different canes give different results in different soils and climates In North Queensland some hundreds of different varieties of canes have been tried with more or less success, and the farmer can only decide for himself by experimenting on his own ground It is generally admitted here that the Rappoe, commonly known as the Rose Bamboo, (because of its hard outer cover), is the best cane for the mill, containing the most sucrose and being the best disease resisting As a farmers' cane, by reason of weight and length, the Tanna varieties are considered the best and are mostly grown in the north Several New Guinea canes have been found to yield good results, while other good seedling canes are the White Bamboo Singapore, Bourbon, and Demerara varieties, all largely grown and mixed in the same fields There is seldom the careful selection of plants there should be, as has been already pointed out

8—Labour For many years the great drawback to the proper carrying on of the sugar industry in Queensland has been the short supply of suitable labour Experience among the cane teaches that beyond a doubt white labour is not suitable for field work, black labour must be employed The South Sea

Islander predominates in the cane fields here, and of all the Kanakas the Solomon Island "boys" are preferable When I speak of "field work" I refer specially to planting, hoeing, cutting, and loading the cane Here all ploughing and harrowing and all the more skilful work is done by the white man, it being against the regulations for the Kanaka to touch the plough or to be allowed to attempt skilled labour at all The excessive heat and stifling closeness of the cane itself makes it almost impossible for the white man to stand the work of cane cutting long, and where gangs of white men have been employed to cut and load the cane on the plantations when black labour was very scarce (all the Islanders having to be indented at the planters' expense) failure has inevitably been the result I have known white men receive board and 2*s* 6*d* a ton as wages on the plantations for cane cutting, but they had to leave it Javanese, Malays, and coolies mix with the Kanakas at this work, but with the cane knife or the hoe the Kanaka is super-excellent for some reason or other

The wages paid now are high, owing to the scarcity, good steady Islanders receiving £26 per year, paid half yearly, being of course clothed and fed at the expense of the plantation, (two suits of dungarees per year) This amounts to 10*s* per week, which is considered very expensive working, but the Kanakas can demand this owing to the diminishing number of them A good Kanaka can perhaps cut and help to load four tons of cane per day, according to the thickness of growth, and whether the cane has been first "trashed" (stripped of long dry leaves)

9—Number of labourers per acre Latest statistics show that in the sugar fields one coloured labourer is employed for every ten acres under cane, that is, taking an all round average for all field work in which the Kanaka is employed on the plantations

10—Weight of cane and sugar produced per acre in a normal season Naturally the yield of cane and sugar per acre depends altogether upon the quality of the soil, the method of cultivation, and climatic conditions, and even in the same district the differences in the yields would surprise the non-acquainted The principle of obtaining good crops is this —Plant cane wholly free from disease or which has inherited bad qualities, (which can be easily ascertained of course, by examination), in land which has been thoroughly tilled and replenished with the necessary elements of plant food, and keep free from weeds It is necessary to lay great stress upon manuring, even from the very start, and if careful cultivation is seen to, the harvest will every year abundantly repay labour and expenditure In Queensland the average yield per acre has been reduced very low, and of late seasons has gone over 12 to 15 tons of cane Good ground, and subjected to the attention already referred to, should not yield less than 40 tons of cane to the acre, and this, at the average price, 14*s* per ton, cannot be considered a poor asset In some districts in Queensland, years ago before the land was impoverished, 40 tons to the acre was a common crop, now it is an extraordinary yield More than 60 tons to the acre was frequently recorded, but owing to deterioration in cultivation and the utter absence of manure on the land, those days have gone, though they may yet return under the new conditions insisted upon by Dr Maxwell the recently appointed sugar expert for Queensland In Honolulu where Dr Maxwell revised the whole system of cultivation and manufacture of

NOTE —The falling off of the crops of 1897 8 was wholly due to the great drought that lasted through the year The crop 1898 9 also suffered through drought

sugar, 120 tons to the acre is often realised The following table will show the comparative yield of the Hawaiian sugar crops for five years as regards sugar, tons of cane not being reckoned here :—

Year	Acres	Total tons of sugar	Yield per acre lb sugar
1894 5	47,339½	153,419½	6,472
1895-6	55,729	227,093	8,184
1896 7	53,825½	251,126	9,33[illegible]
1897 8	55,235½	229,414	8,306
1898 9	60,308	282,807	9,378

In Queensland for the past two years the yield of sugar per acre has only averaged a little less than two tons, but the following table, showing the yield of cane and sugar in the northern districts, will be more explanatory The amount of cane taken to make a ton of sugar is also shown —

Northern Queensland Sugar Averages 1899

District	Tons of cane per acre, crushed	Tons of sugar per acre crushed	Tons of cane per ton of sugar
Ayr	13 86	1 35	10 30
Bowen	11 93	0 90	13 27
*Cairns and Douglas	19 52	2 15	9 08
Ingham and Mourilyan	14 54	1 72	8 45
*Mackay	9 09	0 96	9 51

* These are the largest and most important districts in the north

It must be stated that 1899 was a very poor season, the density of the cane was low, the yield small, and the poor quality of the cane rendered it necessary that a great deal more than usual should go to the ton of sugar With the improved methods of manufacture never more than eight tons of cane should be used per ton of sugar, though of course this is largely brought about by economical management Good cane, well up in density and from an average crop, will not go higher than nine tons to one of sugar, and then the maceration would not be high

11—Cost per ton of producing cane in a normal season Once the farm is established, the cost of producing cane under ordinary conditions may be reckoned at from 9*s* to 11*s* per ton, and at *that*, cultivation of the first order, to ensure an excellent crop, can be gone in for The cost of manufacture has been reckoned at from 14*s* to 15*s* per ton with the most modern machinery Of course every year the conditions may differ, but with cheap labour and improved machinery the cost of cultivation may be kept pretty well uniform and not above the highest amount stated Every country must be guided by its own natural resources, labour, soil, and climate, and last, but not least, its practical conditions, which frequently place difficulties in the way which are only overcome by great patience and perseverance

12—Cost per ton of sugar manufactured in a normal season The question as already been dealt with, and the cost stated at from 14*s* to 15*s* a ton In Barbadoes the cost has been reckoned by experts at 5*s* 5*d* per ton, labour there being very cheap In some of the mills here the cost of manufacture has gone as high as 17*s* 6*d* and even £1 per ton, but this should not be, provided fuel is to be reasonably obtained and ordinary economy practised

Production can be easily kept down to these amounts with the most modern machinery. Of course, in some of the mills even now the equipment is not of the best, and the cost of manufacture every year is considerably over £1 per ton

13—From 7 tons 12 cwt to 11 tons of cane are required to produce one ton of sugar as already stated A good average is between 8 and 9 tons of cane to one ton of sugar

14—Machinery This question is too exhaustive to deal with in limited space as so many different firms supply different parts of mill equipment, and there must needs be so many different kinds of machines in the mill There are the roller engines, shredder, pumping "triple effect," filter presses, centrifugals, and vacuum pan, etc, and the makers are too numerous to mention here Some well-known firms who supply sugar mill machinery are the Sangerhauser Engineering Co Ltd, Berlin, (Wehl & Co, Melbourne, Agents), Pott, Cassels & Williamson, Glasgow, Watson, Laidlaw & Co, Glasgow, Walkers Ltd, Maryborough, Q'land, and Smellie & Co, Brisbane Communication with the Manager of Walkers Ltd, would secure particulars of all the different kinds of machinery required The central mills, for the construction of which money is advanced by the Government through local companies, in which most of the principal farmers are shareholders, are all well equipped now, and the whole process of manufacture has been brought to a state bordering on perfection

15—Cutting So far no machine has yet been tried with anything like success in the way of harvesting cane A few machines have been experimented with in Queensland and a good many in the West Indies, but the great question of cane cutting by machinery has not been solved Nor in the writer's opinion will it ever be successfully carried on, by reason of the fact that no receiver could ever be made adequate to bear the weight of as much cane as the length of a row of cane would mean, and because the cane has to be cut below the ground, about two inches No stubble must be left showing, so nothing in the form of a knife would suit as worked by machinery Again, only a poor crop could be harvested however strong the cutter or receiver might be, for, if the crop is any good at all, the stalks are lying all over the ground, and the cane resembles jungle The cane bends over and twines in and out and is far too thick and heavy to get a machine or horses through Cane cutting is done by hand, and this is the only sure method A cane harvester would undoubtedly be a boon if guaranteed to reap any great amount without continual unloading, but the necessity for getting below the ground, and the weight of the crop, have so far barred the passage to success

General Remarks

There are so many other questions to deal with, especially under the new régime which has been inaugurated in the direction of scientific agriculture, improvement of canes by chemical selection, insect problems, fertilizing improvements, the progress of agricultural chemistry, methods of making use of the after products, and chemical control in the mills, etc, that the whole matter could only be dealt with even concisely by a series of articles on the cultivation and manufacture of sugar—say in Queensland Under the questions suggested only the rudiments of the industry, so to speak, have been dealt with The

writer would advise that Dr Maxwell's report on the sugar industry in Queensland be procured and studied, so that in India the industry might be started if need be upon modern and improved lines at once, without the wasted experiences which have characterised the growth of the industry in this country The presence of an expert to begin with could not but be advantageous to all concerned, and the money expended in such a manner, and by the establishment of a few experiment stations, would be well spent indeed and economical in the end beyond all first calculations

[Appendix No 6]

Notes on Sugar cultivation in the Straits by Mr Jules Martin of Messrs Huttenbach Liebert & Co, Penang

1—The area under sugar acreage in Province Wellesley is about 7,000 acres, in Perak, about the same, but the cultivation there is extending

2—The cost of cultivating and cutting per acre is about $50

3—20 to 30 tons of clean cane without tops are yielded by one acre

4—Eleven tons of cane make one ton of sugar on a fair average

5—One and a half to two tons of raw sugar may be taken as the yield per acre on the average

6—Steam ploughing is not practised At the present rate of wages hand cultivation is considered to be cheaper than the steam plough A steam plough was introduced here some years ago for the purpose of ploughing paddy fields, but it proved too costly and was abandoned

7—The cane occupies the ground for twelve months

8—Manure Fish manure, sulphate of ammonia, phosphates, guano, lime, pea and rape cake, Thomas' cane manure The cost per acre is from $15 to $30 according to requirements

9—The rainfall is from 6 to 16 inches per month, yearly rainfall 90 to 100 inches The greatest fall is in April and May, October and November, the driest months being January, February, March, and July

Temperature 84° to 92° in the shade.

10—Irrigation is not practised The Perak Government are now undertaking a scheme for irrigation in the Krian district, but it is meant more for paddy cultivation

11—Method of planting The canes are planted in trenches six feet apart, 2 or 3 inches deep, the tops being 18 to 24 inches from point of one to the other in the trench, planted nearly level As the plant grows, the soil is moulded up from time to time until it forms a bank to support the cane, care being taken as the work progresses that the dead leaves are removed About 4,000 tops will plant an acre

12—Varieties of cane In Province Wellesley and Perak, only the striped Bourbon and the so-called yellow Mauritius are planted The Otaheite is more for eating and the Selangore has completely died out

13—Method of planting Cuttings generally Seedlings have been tried on a very small scale but have not been the success that was expected of them

14—Coolie wages In Province Wellesley from 17 to 19 dollar cents per day, in Perak from 18 to 40 dollar cents per day Tamils from the Madras Coast are employed In importing them, the estate gives a free passage and other charges, amounting to about $24 per head, house and water-supply are given gratis, in sickness, they are cared for in hospital and fed free of all charges, for which they agree to work 600 days, after which, they are free agents It would pay an estate, to be free of these encumbrances, to pay 25 dollar cents per day to free men if they could be procured and depended upon to work regularly

14—A good coolie can easily cultivate an acre

15—The plantations vary in sizes from 100 acres up to 2,000 acres

16—Method of manufacture As a rule, each estate manufactures its own produce Two estates belonging to one Company now send all their canes to one factory On some estates, Chinese squatters are encouraged to plant and sell the *juice* to the estate at a price per gallon During the growth of the cane, the squatter is paid $3 per month to supply himself with food, the advances being deducted on settling day

17—The cost of manufacturing per ton apart from cultivation and cutting is about $15 to $17 per ton

18—Machinery Europeans use the very best machinery, consisting of double mills, rollers 7 feet long and 31 inches in diameter with engines of about 40 horse power driven by steam 60 @ 80lbs per square inch generated either in multibular or water tube boilers, steam clarifiers, juice heaters, vacuum pans triple effets, and Westons' centrifugals Chinese use buffalo mills with stone rollers and boil their sugar in open pans, producing low class, namely, brown sugar The outturn per day ranges from 1 ton on the small Chinese estates to 10—40 tons on the European estates

Production—The present production of sugar in Province Wellesley and Perak is estimated at 10 to 12,000 tons of white sugar no I, 3,000 tons of white sugar no II, and 10,000 tons of brown sugar These are the only three kinds of sugar produced

No I white sugar has been contracted for at $7 per picul, and no II at $5, while brown sugar sells at $4—$4½ per picul.

[Appendix No 7]

Notes on Sugar Cultivation in Mauritius, by Messrs Scott & Co, of Port Louis, dated October 4, 1900

1—The average temperature and rainfall in the sugar growing districts varies considerably

2—Irrigation is resorted to, only in a few places Water is taken from reservoirs and run into the fields Water concessions are very difficult and complicated

3—Steam ploughing is not practised, the nature of the land not admitting of steam ploughs In free soil without rocks, horse ploughs and hoes are used

4—The canes are planted generally in lines 4′ 6″ or 5 apart, in holes 15″ or 18″ by 9″ Some planters prefer 15″×15″ where practicable Cane tops, that is, the three or four top joints are planted, but sections of the cane containing two eyes each are often used.

5—The employment and nature of manure depend on the soil, where there is abundance of lime, much chemical manure can be saved For virgin cane 10 to 15 tons of stable manure is used, and 2½ to 4 oz chemicals per hole Nitrates are most important, with potash, and phosphoric aid according to soil

6—Cultivation before and after planting The land must be cleaned and holed for planting, immediately after cutting, the fields should be cleaned up, the straw on the fields banked, and the young ratoons receive 2 to 4 oz of chemical where needed

7—Many descriptions of cane are used, the principal varieties being Big Tanna, Port Mackay, Lousier, Iscambine, Bamboo, and Bois Rouge Many varieties of seedlings have lately been introduced

8—The labour employed is that of Indian coolies under contract of service for 5 years at R5, 5 50, 6, 6 50, and 7 per mensem respectively, with rations

9—The number of labourers employed is, on the *area cut*, about one man an acre, where there is a factory Where there is none, about one man to 2 acres, or less, it depends on the nature of the ground

10—In a normal season 30 tons per acre for virgin and 20 for ratoons is a good average yield With sweet canes and a good modern mill, 10 per cent on the weight of the canes is a very fair yield

11—The cost per ton of producing cane in a normal season is R7 to R8 per ton delivered to the mill according to district and class of cane

12—Cost per ton of sugar manufactured R100 per ton is very cheap, but occasionally done, R120 to R140 is a more frequent average, about R130 for the whole island

13—From 10 to 12 tons of cane are sometimes required to produce one ton of sugar, according to canes and mills, but generally a ton of sugar is produced from 9 tons and even less of cane

14—Machinery modern sugar machinery, of the latest type, is alone worth mounting, the more powerful the factory the cheaper the cost of production

15—Cutting is done by hand labour

[Appendix No 8]

The Sugar Industry in the North Coast District by J A Despeissis, M R A C —(*From the Agricultural Gazette of New South Wales, January 1891*)

— – -

The sugar cane industry has been introduced for the last thirty years in the north-coast district, during which time it has experienced many fluctuations, and it may safely be said that it is only recently that this important industry has been placed upon a sounder basis, and is extending every year its scope and range of operations After a hard and toilsome beginning the price of sugar suddenly went up so high, and reached such a figure (over £30 a ton) that many farmers who possessed a sufficient acreage of land put up a small sugar mill and manufactured their own sugar instead of selling the cane to central mills There was a sort of fever all along the northern rivers, and people who knew nothing of the sugar-cane, and of the extraction of sugar from its juice, boldly embarked in the venture, mortgaged their property and obtaining money from banks, put up crude, inefficient, and quite inadequate small mills, which wasted more sugar than they actually manufactured

On the price of the produce going down to the usual level again such mills could not crush any more to advantage, and some frosty seasons having set in, many of these properties fell into the hands of the banks, most of the mill-owners paying dearly for what little experience they had acquired in the manufacture of cane sugar Just at present that industry is very flourishing under a system of small farms, and large central factories, where the canes are sold at a fixed price

These central factories are mostly in the hands of a few powerful Companies, and though they grow canes of their own, most of their needs are supplied by their clients, who are paid a fixed and what I consider a handsome price for the raw material The farmer, on the other hand, undertakes to grow a certain area of land, with varieties of canes approved by the companies for a stated period of years

This system of having the two businesses entirely separate is by a long way the best so far as the sugar industry is concerned The planter is thus independent of the fluctuations of the market, he has more time to give to the proper cultivation and improvement of his farm, and is repaid at the time of the cutting, on a settled basis, according to the nature of the season and the amount of industry he has displayed The manufacturer, on the other hand, by treating a considerable quantity of cane, can put up powerful and efficient machinery, which will do the work more expeditiously, more efficiently and more economically—three considerations of the utmost importance in the process of extraction of sugar from cane He can, besides, by utilising the services of a qualified staff of chemists, boilers, and engineers obtain the best possible results from his mills, and modify the grade of the produce according to the demand of the market

From personal experience, I can state that the great mistake made in Mauritius, Réunion, and also in several of the West Indies Islands, where sugar

estates are larger than in New South Wales, and measure from 350 to 800 acres and more, was in the planters not amalgamating to put up central sugar factories but each one crushing and manufacturing his own canes Thus it came to pass that many planters, with little or no agricultural, chemical, and engineering knowledge, had to face, almost constantly, difficulties beyond the training they had received As a consequence, a great many of them sought advice from not always scrupulous agricultural chemists, or importers of costly patented machinery, eager to sell, the result being in many cases that all the profits made at the end of the season's crushing went to pay for the heavy manure bills, often quite inappropriate to the requirements of either soil and crop, and also the capital, with interest added, invested on the expensive pieces of machinery

Besides these evils, others of a different nature severely handicap the sugar industry—that is, the free and easy way which characterises the working of the plantation and sugar mill Cane requires, unfortunately, to grow to perfection, a forcing climate, which has upon men an unmistakably depressing influence, and until lately, waste of energy and waste of material was of common occurrence The great and prolonged crisis, which has menaced not long ago the colonial sugar industry, has, at least, had this good result, that things are now managed, on a great many sugar estates, in a quite different style than they used to be, and that planters are alive to the fact that to compete successfully against the sugar beet, they must show an equal degree of industry all through the period of cultivation of the cane and processes of manufacturing of the sugar

I readily acknowledge that in all the various sugar producing countries I have visited—either Mauritius, Reunion, or India—I have never seen such luxuriant canefields as those I have seen on the banks of the rivers and creeks of this North-Coast District, where crops weighing, when cut, 40, 50, 60, and 70 tons of canes fit for the mill, are of common occurrence I was even shown a few patches, here and there, which yielded this season, more than 80 tons to the acre, and crops have been known of 100 and 105 tons to the acre, in particularly favourable seasons These canes are from sixteen to twenty-two months old, and the heaviest crops recorded on the Tweed, the Richmond, and the Clarence Rivers have been from the varieties known as "Rappœ," or Fiji, and "Mauritius Ribbon"

The system of cultivation, however, with few exceptions, has nothing particularly commendable in itself, and it may be said that these satisfactory results are almost entirely due to the natural suitability of both soil and climate for the plant As a rule, the farmer contents himself with giving to the land a shallow ploughing, 7 or 8 inches deep, he runs the harrow over the sods, places the sets in the furrows he has previously opened at distances varying from 3 ft ×6 ft to 5 ft ×5 ft, scarifies the land once and in more rare cases twice, then lets the plants grow He often goes to the sugar mill, with which he has passed a contract and gets an advance on his plantation, whilst the plants are growing he strips the dead leaves, or more often does not trouble to remove them When the canes are ripe, the Sugar Company send round gangs of cutters and punts to take away the crop, which is weighed at the mill, and the farmer then gets a cheque for the balance of the money due to him, or for the whole amount of his crop's worth The price paid by several mill-owners is exceedingly handsome, being at the rate of 10*s* to 12*s* per ton of cane, the Company doing the cutting and the hauling It will be readily imagined that, at the rate,

few crops giving so little trouble will be found more payable, in the North-Coast District The hauling is done by bullock or horse carts, or in the Company's, punts, which contain from 50 to 55 tons of canes The canes are cut and put on the punts one day, the punts are taken to the mill the next day, and on the third day their contents are discharged on the cane carrier, which brings them to the rollers When the distances are somewhat considerable, or if a Sunday intervenes, the canes are not crushed till four or five days after they have been cut, thus causing in hot weather, and with canes which have been injured, a notable interversion of the crystallizable sugar into glucose

FIRST FORECAST OF THE OILSEED CROPS OF BENGAL, 1900 1901

THE following is published for general information

F A SLACKE,
Secy to the Govt of Bengal

The 25th February 1901

DEPARTMENT OF LAND RECORDS AND AGRI CULTURE, BENGAL

First Forecast of the Oilseed Crops of Bengal, 1900 1901

Explanatory —This forecast furnishes preliminary esti mates of the area and outturn of the different varieties of oilseeds grown in this Province

Character of the season —The rainfall during the monsoon season of 1900 was capricious and irregular In the Burd wan, Presidency, and Orissa Divisions it was exceptionally heavy, while in several districts of North and East Bengal, it was more or less in defect The fall in September was copious and general, and in the three Divisions named above, it was so heavy as to cause a serious flood In October, however, the fall was everywhere below the normal, while in November the rains practically ceased all over the Province The fall in December was also deficient and badly distributed, and the rain in January and February has been somewhat in excess of the requirements of some districts On the whole, the season has not been a favour able one for the oilseed crops, as they have suffered from an excess of rain in many tracts, while in others they have suffered from drought

Area sown —The normal area under the different kinds of oilseeds in these Provinces is returned by the local authorities as 4,014,700 acres, out of which only 3,645,600 acres have been brought under cultivation this year

The difference is to a great extent to be accounted for by a reduction of area in the district of Hazaribagh by over 200,000 acres, due to a revision of figures in the current year The Deputy Commissioner will be asked to revise his normal areas when submitting the final forecast There has also been a decrease of nearly 100,000 acres in the district of Bogra

The area sown with these crops last year was approxima taly 3,632,400 acres, with which the figures for the current year compare favourably

Character of the crop—From the annexed statement summarising the district returns, it will be seen that out of the 45 districts in the Province, only 11—Birbhum, Dinajpur, Darjeeling, Gaya, Saran, Champaran, Muzaffarpur, Bhagalpur, Hazaribagh, Manbhum, and Palamau,—anticipate an outturn of 100 per cent or over In 21 other districts, an outturn of between 80 and 99 per cent is estimated, while nine others return a crop of between 60 and 79 per cent The estimated outturn in the remaining four is below 60 per cent, Jessore, with 46 per cent, shewing the poorest outturn of all For the Province, as a whole, the percentage, according to the district estimates, amounts to 87 per cent of a normal crop Making the usual allowance for the tendency to under estimate which is observable in many of the district returns, and in view of the nature of the season, it may be anticipated that 90 per cent of a normal crop will eventually be harvested

G C DUTT,

Asst Director of the Department of Land Records and Agriculture, Bengal

WEATHER AND CROP REPORT

For the week ending the 25th February 1901

Burdwan—Rainfall at Sadar 0 08, Kalna 0 02, Katwa nil, Raniganj 0 12 Weather unusually cold Threshing of *aman* and pressing of sugarcane still continue Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	12	per rupee
Kalna	10⅝	
Katwa	13	
Raniganj	12½	

Birbhum—Rainfall at Sadar 0 6, Rampur Hat nil Weather cloudy till Saturday *Rabi* crops doing well Sugarcane being pressed Price of rice at Sadar 12 seers and at Rampur Hat 13½ seers Fodder sufficient

Bankura—Rainfall at Bankura 0 15, Vishnupur 0 13 Weather generally cloudy Pressing of sugarcane at a standstill owing to bad weather Fodder and water sufficient No cattle disease reported Price of common rice at Bankura 11 seers 14 chitaks and at Vishnupur 12 seers per rupee

Midnapore—Rainfall at Sadar 0 20 Ghatal 0 11 Weather cloudy *Rabi* injured in Ghatal *Aman* being harvested Sugarcane being pressed Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Contai	13	
Tamluk	11	
Ghatal	12½	

Hooghly—Rainfall at Sadar nil, Serampore 07, Arambagh 08 Weather cloudy Pressing of sugarcane continues Fodder and water sufficient Common rice sells at 10 seers 7 chitaks per rupee

Howrah—Weather cloudy Transplantation of *boro* commenced Fodder and water sufficient Common rice sells at 10 seers per rupee

24 Parganas—Rainfall at Sadar 04, at Barasat 10, at Diamond Harbour 02 Weather cloudy and gloomy Lands are being ploughed for *aus* paddy and jute *Rabi* crops are being harvested Cattle pox reported from Basirhat sub division Fodder and water sufficient Common rice sells as follows —

	Srs	Ch	
Sadar	10	3	per rupee
Barasat	10	0	
Basirhat	10	0	
Diamond Harbour	10	8	

Nadia—Rainfall at Sadar 0 02 Weather dull and cloudy Harvesting of *rabi* going on Lands being cultivated for early rice Fodder and water sufficient except in Chuadanga Price of common rice stationary

Murshidabad—No rain Weather seasonable Prospects of *rabi* crops less favourable owing to cloudy weather Cattle-disease reported from outpost Hoorshi of Sadar and Panchgram of Lalbagh subdivision Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	13	per rupee.
Jangipur	14	
Kandi	15	
Lalbagh	12½	

Jessore—No rainfall. Weather cloudy Prospects of the crops good Peas, rapeseed and linseed being harvested Fodder and water sufficient Pressing of sugarcane going on Common rice sells as follows —

	Srs	
Sadar	12½	per rupee
Jhenida	12	
Magura	12	
Narail	12	
Bangaon	12$\frac{1}{16}$	

Khulna —Rainfall nil Weather cloudy Harvesting of *aman* completed Transplantation of *boro* continues Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	12¾	per rupee
Bagerhat	13	
Satkhira	11	

Rajshahi - No rain Prospects of crops reported to be fair No cattle disease Fodder and water available Common rice sells at 14 seers a rupee

Dinajpur —Rainfall nil Weather cloudy No cattle disease Fodder and drinking water plentiful Rice 14 seers a rupee at sadar and 13 seers at Thakurgaon

Jalpaiguri —Rainfall nil Weather cloudy and cold Prospect of *rabi* crops satisfactory Fields for *bhadoi* and jute are being prepared Harvesting of tobacco commenced in places Common rice sells at 12 seers per rupee Fodder and water sufficient

Darjeeling —Rainfall at Darjeeling 0 02 Weather seasonable *Hills—tor*, *phapor* wheat, barley and potatoes, progressing *Terai*—harvesting of mustard proceeding Potatoes doing well Common rice sells as follows —

	Srs	
Hills	10	per rupee
Terai	14	

Bhutta sells at Darjeeling 18 seers and at Kalimpong 20 seers per rupee

Rangpur —Rainfall nil Weather seasonable *Rabi* crops are being harvested and lands are being prepared for *aus* and jute Fodder and water sufficient Price of common rice stationary

Bogra —No rain Harvesting of *rabi* pulses and cultivation for *aus* and jute continue Prospects moderate Fodder and water sufficient Prices unchanged Rain wanted

Pabna —Rain nil Weather seasonable Prospects of crops good Cultivation for paddy and jute going on Prices stationary Fodder and water sufficient

Dacca —Rainfall nil Weather seasonable Prospects of crops fair No cattle disease Fodder available Common rice 11 seers per rupee

Mymensingh —Rainfall nil Weather cloudy with west wind Prospects of standing crops fair Common rice sells as follows —

	Srs	
Sadar	10	per rupee
Jamalpur	10	
Kishoreganj	10	
Tangail	Report not received	
Netrakona	9⅜	

Faridpur —Rainfall at Sadar nil, Goalundo not received Madaripur nil Weather seasonable State and prospects of crops good Common rice sells at 12 seers a rupee

Backergunge —Rainfall nil Weather seasonable Prospects of crops good Fodder and water sufficient No cattle disease reported Common rice sells at 11½ seers (new *aman*)

Tippera —No rain Weather seasonable, but rain is needed for crops Water and fodder sufficient Cattle disease reported from Nabinagar thana Common rice sells at 11½ seers per rupee

Noakhali —Rainfall nil Crop prospects good Preparation of land for *aus* continue Fodder and water sufficient No cattle disease reported Price of common rice average 11 seers per rupee

Chittagong —No rain Harvesting of winter rice completed Outturn 12 annas Cattle disease reported from Sitakund Water and fodder wanted Common rice sells at 12 seers

Patna —Rainfall at Sadar 0 23, Barh 0 10, Bihar 0 09, Dinapore 16 Hilsa nil, Bikram 0 21 The cloudy state of the weather has damaged the standing crops to some extent Lancing of poppy in progress Sugarcane being pressed Fodder and water for cattle sufficient Common rice sells at Patna 14 seers per rupee

Gaya —Rainfall at Sadar 27, Jahanabad 11, Aurangabad 21, Nawada 25 *Rabi* and poppy damaged to some extent by rain Common rice selling at 12 seers per rupee

Shahabad —Rainfall at Sadar 0 20, Buxar 0 28, Bhabua 1 22, Sasaram 0 48, Dehri 0 52 The recent rain has done much damage to the standing crops Pressing of sugarcane in progress Fodder and water sufficient Rice 12 seers a rupee at Sadar

Saran —Rainfall at Sadar 0 04, Siwan 0 25, Gopalganj 0 26 Weather unsettled and cloudy *Rabi* ripening, unsettled weather not favourable to the crop, bright sunshine with west wind needed Fodder and water sufficient Common rice 14 seers 2 chitaks and *makai* 22 seers 3 chitaks

Champaran —Rainfall at Motihari 25, Bettiah 18 Harvesting of *rabi* has commenced in some places Prospects of standing crops good Fodder and water sufficient Prices of common rice and maize at Sadar are 15 and 23¾ seers respectively

Muzaffarpur —Rainfall at Sadar 03, Hajipur 09 and Sitamarhi 11 Prospects continue to be good though a slight injury has been done in some places to the standing crops by the rainfall of the week Prices are—Common rice 14 seers, wheat 10 seers, barley 20 seers, maize 23 seers, gram 13 seers, *arhar* 13 seers, and *marua* 23 seers a rupee

Darbhanga —Rainfall at Sadar nil, Madhubani nil, Samastipur 0 05 *Rabi* doing well Fodder and water sufficient No cattle disease reported Common rice sells as follows —

	Srs	Ch	
Sadar	15	6	per rupee
Samastipur	15	0	
Madhubani	15	9	

Monghyr —Rainfall at Sadar nil, Begusarai 09, Jamui 0 02 Cloudy recent rain has done damage to the *rabi* crops Wheat much damaged by *harda* in Begusarai subdivision Poppy prospect fairly good Common rice selling as follows —

	Srs	Ch	
Sadar	14	3	per rupee
Begusarai	13	8	
Jamui	14	0	

Bhagalpur —Rainfall at Madhipura 0 01 Clouds clearing up Weather cold *Rabi* prospects somewhat injured by late cloudy weather Fodder and water sufficient No cattle disease Coarse rice sells as follows —

	Srs	Ch	
Sadar	14	8	per rupee
Banka	16	0	
Madhipura	18	0	
Supaul	18	0	

Purnea —Rainfall at Sadar 0 04, Kishanganj 0 75, Araria 0 00 Weather seasonable Harvesting of mustard is nearly finished Prospects of *rabi* crops fair Lands being prepared for jute and *bhadoi* crops No cattle disease Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Kishanganj	13	
Araria	16	

Malda —Rainfall nil Weather seasonable and occasionally cloudy Prospects of wheat, barley, &c, good No cattle disease Price of rice stationary Fodder and water sufficient

Sonthal Parganas —Rainfall 0 8 Weather cloudy Prospect of standing *rabi* favourable Fodder and water supply sufficient No cattle-disease Rice sells at 14 and maize at 21 seers 10 chitaks per rupee

Cuttack —Rainfall at Kendrapara 0 01 Weather seasonable Sugarcane and *rabi* being harvested *Dalua* and tobacco growing Condition of cattle generally good Fodder and water sufficient Common rice sells as follows —

	Srs	Ch	
Sadar	13	12	per rupee
Jajpur	15	12	
Kendrapara	15	12	
Banki	15	12	

Balasore —Rainfall nil at Sadar Harvesting of *kandha*, *sarad*, and *rabi* continues Cotton and *dalua* flowering Surgarcane being pressed Rice sells at 16, 14 and 18 seers per rupee in interior, Balasore and Bhadrak, respectively Ploughing continues Fodder and water sufficient

Angul.—Rainfall at Sadar 61, Tikerpara 1 78 Weather cloudy Common rice sells at 20 seers per rupee in Angul Report from Khondmals not received Fodder and water sufficient

Puri—Rainfall at Sadar nil, Khurda 1 29 Weather cloudy Lands being ploughed Harvesting of *kulthi* and winter *mandia* continues Prospects of *dalua*, *mung*, and other miscellaneous crops good. Sugarcane being pressed Fodder and water plenty Common rice sells as follows —

	Srs	ch	
Sadar	13	2	per rupee
Khurda	15	12	
In the interior	16	6	

Hazaribagh.—Rainfall at Sadar 36, Giridih 25 Weather very cold Fodder and water sufficient No cattle-disease reported Common rice sells at Sadar at 13 seers and at Giridih at 12½ seers per rupee

Ranchi—Rainfall 0 55 Weather cloudy *Rabi* crops much injured by the recent rainfall Average price of common rice is 14½ seers per rupee No cattle-disease reported Fodder and water sufficient

Palamau.—Rainfall 0 57 Weather cloudy throughout the week, now clear *Rabi* being injured by insects Fagooni *mahua* ceased to fall owing to continuous cloudy weather *Tima dhan* and sugarcane being planted in places Cattle disease prevalent in a few villages Rice selling at 11½ seers per rupee at Sadar

Manbhum—Rainfall at Sadar 0·32, Gobindpur 0 22 Weather seasonable Prospects of crops on ground good Fodder and water sufficient Cattle disease reported from Para. Average price of common rice at Sadar 13½ seers and at Gobindpur 12 seers per rupee Supply sufficient

Singhbhum—Rainfall 0 88 The *rabi* is suffering much from excessive rain Average price of rice is 15 seers 9 chitaks in the district

General Summary—Rain fell in small quantities in the Burdwan and Presidency Divisions, in Bihar, Orissa and Chota Nagpur and at Darjeeling Slight injury has been done in some places to the standing crops by the rainfall of the week Lands are being prepared for jute and *bhadoi* Cattle-disease reported from six districts Fodder and water sufficient except in Chuadanga and Chittagong The price of common rice has a tendency towards increase It has risen in 19 districts, fallen in five, and is stationary in the rest.

By order of the Lieutenant-Governor of Bengal,

F A SLACKE,

Secretary to the Govt. of Bengal.

REVENUE DEPARTMENT,

The 26th February 1901

	Inches
The total fall of rain from 17th to 23rd February 1901	0 04
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0 25
The total fall from 1st January to 23rd February 1901	3 26
The average fall of the corresponding period for 24 years, Surveyor General's Office	1 30

The mean pressure, temperature, &c, are deduced from the traces of the Barograph and Thermograph, and from eye observations

The maximum and minimum temperatures are obtained from self registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No 86, formerly at the Surveyor General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain gauge is one foot above the ground

Total for corresponding 5½ weeks of previous year	2 010 004½	21 80 7[illegible]5 15 0	93 46 [illegible] 10	[illegible] 116 5 0	1 71 5 6 13 2	84 35 439 0 2	597 7[illegible]5½	1 130 8[illegible]	1 728 [illegible]

(a) The increase is chiefly in outward traffic from stations on the [illegible] Districts consequent on the movements of pilgrims and marriage parties
(b) The decrease is chiefly due to heavy upward despatches of food grains in the corresponding period of 1900

REVENUE DEPARTMENT—(LAND REVENUE).

NOTIFICATION—No. 1145L R

The 1st March 1901—Whereas an application has been made by Maharaja Bahadur Sir Jotendra Mohan Tagore, K C S I, proprietor of estate Mohanpur tauzi No 224, in the district of the 24 Parganas, for a survey and preparation of a record of rights in respect of all lands situated in the above estate, and whereas he has agreed to pay the cost of the operations, which has been estimated at Rs 150

24-Parganas

In exercise of the powers conferred by section 101 (2) (*a*) of the Bengal Tenancy Act, VIII of 1885, as amended by Act III (B C) of 1898, the Lieutenant Governor of Bengal is pleased to direct that a survey shall be made and a record of rights prepared in respect of all lands included within the external boundaries of the said estate

The particulars to be recorded in the survey and record of rights shall be the following —

(*a*) The name of each tenant or occupant
(*b*) The class to which each tenant belongs, that is to say, whether he is a tenure holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non occupancy raiyat, or under raiyat, and if he is a tenure holder, whether he is a permanent tenure holder or not, and whether his rent is liable to enhancement during the continuance of his tenure
(*c*) The situation, quantity and one or more of the boundaries of the land held by each tenant or occupier
(*d*) The name of each tenant's landlord
(*e*) The rent payable at the time the record of rights is being prepared
(*f*) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise
(*g*) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases
(*h*) The special conditions and incidents, if any, of the tenancy
(*i*) If the land is claimed to be held rent-free, whether or not rent is actually paid, and if not paid, whether or not the occupant is entitled to hold the land without payment of rent, and, if so entitled, under what authority
(*j*) The name of each proprietor, with the character and extent of his interest, and the situation, quantity and one or more of the boundaries of each proprietor's private lands, as defined in Chapter XI of the Act.

C E BUCKLAND,

Offg Chief Secy to the Govt of Bengal

NOTIFICATION No 1698J

The 28th February 1901—The following draft rules which it is proposed to insert in place of the existing rules (*b*) 8, (*c*) 12, (*e*) 17, and (*f*) 23 of the rules for the manufacture, possession, and sale of explosives are published, as required by section 18 of the Indian Explosives Act (IV of 1884), and the Government of India, Home Department, Notification No 1964, dated the 2nd September 1887, for the information of persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Lieutenant Governor after one month from the date of this notification

2 Any objection or suggestion which may be received from any person with respect to the draft within that period will be considered by the Lieutenant Governor

DRAFT RULES

(*b*) *Licensing of the manufacture, possession, and sale of small quantities of gunpowder and certain explosives*

8 Licenses to manufacture, possess, and sell, or to possess and sell, or to possess, or to sell from stock kept in a magazine in respect of which a license has been granted under Rule 17, an explosive of the first (gunpowder) class, or of the first division of the sixth (ammunition) class, or of the seventh (firework) class, may be granted in a Presidency town and its suburbs by the Commissioner of Police, and elsewhere by the District Magistrate in accordance with the following provisions —

(1) The license shall not entitle the license holder to possess at the same time more than 200lbs of gunpowder, 500lbs of explosive contained in ammunition of the first division of the sixth (ammunition) class, and 200lbs of fireworks, or any such less quantity of any of these explosives as the licensing officer may think fit to specify in the license

(2) The license shall specify the place in which alone the explosives referred to in it may be kept, and such place shall (except in the case of a license to sell from stock kept in a magazine in respect of which a license has been issued under Rule 17) be approved by the licensing officer

(*c*) *Licensing of the manufacture of explosives generally*

12 Licenses to manufacture explosives in cases not provided for by Rule 8 shall be granted by the Governor General in Council on payment of such fees, in such form, for such term, and subject to such conditions, as the Governor-General in Council may in each case prescribe

* * * * * * *

(*e*) *Licensing of the possession of explosives generally*

17 Licenses for the possession of explosives in cases not provided for by Rules 8 and 14 may, if the explosive is not one of the fifth (fulminate) class, be granted by the Local Government in accordance with the following provisions --

* * * * * * *

(*f*) *Licensing of the sale of explosives generally*

23 Licenses for the sale of explosives in cases not provided for by Rule 8 may be granted in a Presidency town and its suburbs by the Commissioner of Police, and elsewhere by the District Magistrate, to any person licensed to possess the same

C E BUCKLAND,

Offg Chief Secy to the Govt of Bengal

NOTIFICATION—No 1809J

The 5th March 1901 —The following draft rule, which it is proposed to substitute for rule 17 (2) (*f*) of the Rules for the manufacture, possession and sale of explosives, in the Lower Provinces of Bengal, is published as required by section 18 of the Indian Explosives Act (IV of 1884), and the Government of India, Home Department, Notification No 1964, dated the 2nd September 1887, for the information of persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Lieutenant Governor after the 5th April 1901 Any objection or suggestion which may be received from any person with respect to the draft before that date will be considered by the Lieutenant-Governor —

Draft Rule

On the completion of the inquiry, the District Magistrate or Commissioner of Police shall forward the application and draft license with his recommendation to the Local Government The Local Government shall then refer the aforesaid documents for approval to the Chief Inspector of Explosives, who will forward to the applicant a form H showing the distances which should, in his opinion, be kept clear round the magazine The form shall then be returned with the third column duly filled in by the applicant to the Chief Inspector of Explosives, who will submit it to the Local Government with his recommendation, and, if he recommends that a license be granted, a draft license accompanied by a schedule A showing the distances which, after considering any representation made by the applicant in returning the form to him, he thinks should be kept clear round the magazine The Local Government may thereupon grant the lisense as applied for or with such modifications or restrictions as may be deemed proper, or it may reject the application The table of distances which will ordinarily be followed is attached to these rules

Existing Instructions

(CRIMINAL)

This statement is meant to exhibit every sentence passed, and where two penalties are inflicted on the same offender to exhibit them both If a man has been sentenced to rigorous imprisonment with solitary confinement and fine, he will appear in columns 6 and 10, if to rigorous imprisonment without solitary confinement but with fine, then in columns 7 and 10 if to simple imprisonment and fine, then in columns 8 and 10, if to rigorous imprisonment and whipping, then in columns 6 and 7 and 12 if to rigorous imprisonment and to give recognizance to keep the peace under section 106 Criminal Procedure Code, then in columns 6 or 7 and 14 or 15 In adding together the entries to ascertain the total number of persons punished, it will be necessary to exclude columns 10 and 12 and the double entries in column 14 or 15 as the persons referred to will be accounted for in other columns Further, to reconcile the number of persons entered in this statement as punished with the number entered as convicted in statement 4, it is necessary to note cases such as those in which fulfilment of contract is ordered under Act XIII of 1859 or persons released on probation, &c, in a foot-note, no special columns being provided for them in the statement If a person has been sentenced at one trial to two or more punishments for distinct offences, and the Court has directed that such punishments shall run concurrently, he should be regarded as having been separately sentenced to each punishment The number of persons who have been so sentenced to two or more punishments running concurrently must also be noted at the foot of the statement

As regards persons whose cases were referred for higher punishment for orders under section 562, Criminal Procedure Code, or for confirmation of sentence, the punishment to be shown in this statement is that, if any, sanctioned by the higher Court, and the accused will be entered against such Court accordingly, and not against the Court making the reference

No 5 dated the 21st December 1900

Cancel the INSTRUCTIONS' and amendments thereto at the foot of the form of Annual Statement 5 (Criminal) reproduced in Chapter V at pages 266 and 267 of the High Court's General Rules and Circular Orders (Criminal), and *substitute* therefor the following —

INSTRUCTIONS —In the case of offences triable jointly under section 234 of the Code of Criminal Procedure the sentences passed should be exhibited separately if consecutive and once only if concurrent

The number of cases such as those in which fulfilment of contract is ordered under Act XIII of 1859 should be noted in a foot note

As regards persons whose cases have been referred for higher punishment for orders under section 562 of the Criminal Procedure Code or for confirmation of sentence the punishment if any sanctioned by the higher Court should be entered against such High Court and not against the Court making the reference

BOARD OF REVENUE, L P, CALCUTTA, *the 26th February 1901*

NOTIFICATION—No 437B

Excise

THE HON'BLE MR C W BOLTON C S I Member in charge

IN exercise of the powers conferred on them by section 35 of the Bengal Excise Act, VII of 1878, the Board of Revenue are pleased to make the following rules for the importation of *charas* from the Punjab into Bengal, in supersession of the rules in Section XXI of the Excise Manual, 1891 —

Permit required for all importations

1 A licensed vendor of *charas* intending to import the drug into Bengal shall obtain a permit in Form No 121 in Appendix A from the Collector of the district to which the *charas* is to be imported, on

prepayment of half the duty referred to in rule 5, together with a fee of Rs 2 for the permit

Permit in duplicate form

2 The permits are printed in duplicate—one part for delivery to the importer and the second part for retention in the office of the Collector of the importing district

Procedure in the exporting district

3 The importer, or his agent on arrival in the district from which the drug is to be exported, shall, within the time allowed in the permit, present it to the officer in charge of a bonded warehouse and apply for and obtain the requisite pass under the rules in force in the Punjab, a copy of the pass being at the same time sent by the District Officer to the Collector of the importing district After delivery from the warehouse, the *charas* shall be immediately taken to the nearest railway station by the importer or his agent, and shall be consigned by railway direct to the Collector of the importing district, to whom the railway receipt shall be sent by post in a registered cover

Examination of consignment on its arrival

4 On arrival of the consignment at the railway station in the importing district, the Collector will depute an Excise Officer to take delivery of it and produce it before the Excise Deputy Collector for examination, weighment, and comparison with the pass received from the exporting district in the Punjab The Deputy Collector shall see whether the package or packages are securely packed and sealed, or whether bulk has been broken during transit or the consignment has been tampered with in any other way

Time of paying duty

5 Duty shall be charged at the rate of Rs 12 per seer one half of which must be paid at the time of taking out the permit and the balance after the examination and weighment of the drug by the Excise Deputy Collector of the district in which the drug is to be sold or stored, as the case may be

Charas to be made over to the importer after levy of duty

6 After examination by the Excise Deputy Collector and realisation of the balance of duty, the drug will be made over to the importer for sale, an intimation being at once sent by post to the officer in charge of the exporting district of the due arrival of the consignment and realisation of the full duty on the same

Importer to apply for extension of time if necessary

7 If the *charas* does not arrive, and the pass be not returned within the time for which it is current the importer must apply to the Collector of the importing district for an extension of time, failing which the *charas* in transit will be liable to confiscation as being unprotected by a pass

Confiscation and penalties

8 The whole of a consignment will be liable to be dealt with under section 75 of the Bengal Excise Act, and the importer subjected to other penalties of the Excise laws if he imports a quantity greater or less than that shown to be the quantity covered by the pass, unless the difference is fully explained and full duty paid on the excess or deficiency, as the case may be

Importer to keep an account

9 Every importer of *charas* will be bound to keep an account in Form No 122, Appendix A, of the quantity received and expended by him The form is intended for use in his dealings with licensed vendors only

License required for retail sale

If, however, he wishes to dispose of the drug to persons other than licensed vendors he shall take out a separate retail license for the retail vend in Form No 123 The retail license will be granted either under the auction or the fixed license fee system, as the Board may generally or especially direct

Pass for transport to a retail shop in the district

10 If the importer disposes of any *charas* to a licensed vendor of the district in which the drug has been imported, he shall furnish such licensed dealer with a pass in Form No 123A, Appendix, under his own signature in order to protect the drug in transit to the retail shop

Pass for transit to another district

11 If the importer wishes to dispose of any *charas* to a licensed dealer of another district, he shall apply for and obtain a pass from the Collector of his own district in order to protect the drug in transit to such other district Such passes will be granted in duplicate free of charge in Form No 123B of Appendix A One part shall be given to the importer and other sent by post to the Collector of the district for which the drug is intended

Register of permits.

12 A register of permits for the importation of *charas* shall be kept in the Collector's Office in Form No 124, Appendix A

13 These rules apply only in the case of *charas* imported from the Punjab, and shall take effect from the 1st March 1901

CALCUTTA,

The February 1901

FORM No 123

(SEE SECTION XXI, CLAUSE 9)

License to sell charas by retail

NOTE — Counterfoil of this will be signed by the licensee and filed in the Collector s office.

District

Number of license in Register No 7B

Name of vendor

Locality of shop

Be it known that resident of

pargana district of is hereby

authorized by the Collector of to open a shop for the sale by

retail of *charas* at in from the date of this license

to the 1st March 190

It is required of the holder of this license as the condition of this license remaining in force that he duly and faithfully perform and abide by the following articles —

I —That he pay to Government a tax of Rs in the following instalments —

II —That he effect sales of *charas* only in the shop for which this license is granted, and that he do not sell it in any other place or establish a second shop without a separate license

III —That he do not sell more than five tolahs of *charas* to any person at one time

IV —That he do not receive any wearing apparel or other goods in barter for *charas*

V —That he do not open his shop nor effect sales therein before sunrise, that he do not keep it open nor effect sales therein after 8 P M in the cold season (16th October to 15th March) and 9 P M in the hot season (16th March to 15th October), and that he do not harbour any person therein during the night

VI —That he do not permit persons of notoriously bad character to resort to his shop, that he prevent gaming and disorderly conduct therein, and that he give information to the nearest Magistrate or police officer of any suspected persons who may resort to his shop

VII —That he have constantly fixed up at the entrance of his shop a signboard bearing the following inscription in the vernacular language of the country —

(NAME OF VENDOR)

"*Licensed Vendor of Charas*"

VIII —That he do not sublet his shop or transfer his license to any other party or allow any person to sell *charas* under this license unless the name of such person shall have been previously registered in the Collector s office and endorsed by the Excise Deputy Collector on this license

IX —That he only obtain his *charas* from a licensed importer or by importing it himself under the rules for the importation of *charas* into Bengal If he obtains the *charas* from a licensed importer of another district, it must be protected by a pass granted by the Collector of such other district if from an importer in the district for which his shop is licensed, he can transfer the *charas* to his shop under a pass signed by such importer

X.—That he keep a daily correct account of the receipt and sale of *charas* in the following form, to be balanced at the close of each day:—

Stock received						Stock sold

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below to the undermentioned estate situate in the district of Sonthal Parganas will be put up to sale at the Dumka Collectorate on 1st April 1901, corresponding with 19th Chaitra 1307 B S

Conditions of Sale

1st —The estate to be sold to the highest bidder above the upset price which will be fixed by the Deputy Commissioner at the time of sale The purchaser of this estate will be considered as the proprietor of the estate and the entire proprietary right of Government in such estate will be transferred to him, subject to the revenue fixed in perpetuity

2nd —The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd —If the amount of purchase money do not exceed Rs 100, the whole amount to be paid down at once.

4th —If the amount of purchase money exceed Rs 100 one fourth of the amount bid to be immediately deposited If the balance be not paid by noon of the 15th day after the sale reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day the sale is to be cancelled (the sum deposited being forfeited to Government) and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale

W A MARR Covenanted Deputy Collector in charge for Collector on tour

Midnapore Collectorate Arrear Collection Department the 15th February 1901

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estates situate in the district of Shahabad will be put up to sale at the Shahabad Collectorate Arrah on Monday the 25th March 1901 corresponding with 20th Chait 1308 Fasli

The purchasers will be subject to the following conditions of sale —

Conditions of Sale

1st —The estates to be sold to the highest bidders above the upset price which will be fixed by the Collector at the time of sale The purchasers of these estates will be considered as the proprietors of the estates and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs 100 one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the date of sale as one or if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estates to be again put up to sale at the risk of the defaulting purchasers after issue of advertisement, as in the case of original sale

The present rent of each estate will be fixed in perpetuity as the revenue: the upset price will be twice the amount of this rent

SURVEY OF INDIA DEPARTMENT

NOTIFICATION

Calcutta, the 28th February 1901

THE following rules and regulations relating to the Mathematical Instrument Office are published for the information and guidance of public officers

F B LONGE, *Major*, R E,
Assistant Surveyor General,
In charge Surveyor General's Office

RULES AND REGULATIONS

OF THE

MATHEMATICAL INSTRUMENT OFFICE, SURVEY OF INDIA DEPARTMENT

THE mathematical Instrument Office Survey of India Department, supplies new and serviceable instruments, etc , and repairs, examines, and adjusts, etc , old ones, on book-debit, for all branches of the public service *As a general rule, new instruments are not supplied, if serviceable instruments of the class required are available for issue*

2 All applications for instruments on the public service must be submitted on the following indent form, *which is not required in duplicate*, the specification of instruments and particular purposes for which required being made as full as possible Indent forms may be had on application to the Mathematical Instrument Office —

Indent No on the Calcutta Mathematical Instrument Office, S I Dept , for Instruments required for the use of , dated 190

Description of Instrument	Quantity or number in store	Quantity or number indented for	Purpose for which required	Average cost as per printed list		How and where to be despatched
				Rs	As	The address which should be affixed to the parcels or cases to be distinctly given in full Abbreviations sometimes lead to mistakes

I do hereby certify that the articles specified in this indent are indispensably necessary for the purposes set forth according to the best of my knowledge and belief after the most careful examination

Recommended

Countersignature of approving authority *Signature of Indenting Officer with designation of appointment in full*

3 All indents, before they can be supplied, must be duly approved and countersigned by the heads of departments, or of the Government under which indenting officers may be serving, *viz* —

Survey of India Dept , Topo Branch	by Deputy Surveyor General } or by Surveyor-General,
Ditto Rev do	, ditto
Ditto, Trig do	,, Supdt Trig1 Surveys,
Settlement Department	Boards of Revenue,
Public Works Department,	, Superintending Engineers or higher authorities,
Telegraph Department	,, Director General of Telegraphs,
Marine Department,	,, Superintendent of Marine,
Army Departments	,, Quartermaster General of the Army, ,, Lieutenant Generals Commanding the Forces in the Punjab, Bengal, Bombay, and Madras,
Artillery,	,, Officers in Command of Batteries and Districts,
All other Civil Officers or Military Officers in Civil employ,	,, Secretary to Governments under which serving or Secretary to Board of Revenue,

Forest Department,	by Provincial Conservators,*
Director of the Forest School at Dehra, Superintendent of Forest Survey,	„ Inspector General of Forests,
Meteorological Department,	„ Meteorological Reporter to Goverment of India
Excise Department, Bengal,	„ Commissioner of Excise in Bengal,
Geological Survey,	„ Director, Geological Survey,
State Railways,	„ Engineers in Chief,
Other Departments,	„ Heads of Departments,

and they should be addressed to the *Officer in charge Government Mathematical Instrument Office, No 15, Wood Street, Calcutta*

4 The mode of transit, and address, or station to which the instruments are to be consigned, must invariably be specified on indents in the proper column Indents should not be accompanied with forwarding letters, unless more explanation is necessary than can be given on the face of the indent

5 All officers, to whom instruments and other stores are issued on public service, have to account for them to the officer to whom their accounts are rendered, in such manner as may be by him directed

6 All instruments, and component parts of instruments, when no longer required, should be at once returned to the Mathematical Instrument Office, *except when the Officer in charge considers that their transit charges may nearly equal or exceed their actual value as material*, in which case he should refer to the Officer in charge Mathematical Instrument Office for instruction as to their disposal No unused instruments should be allowed to accumulate in any office, as if returned, they can be utilised for re issue

7 When instruments are considered unserviceable by any officer, a survey should be held on them by a committee of Government officers, whose reports should be forwarded to the Assistant Surveyor General in charge of Mathematical Instrument Office, who will issue instructions as to which of the articles are to be forwarded to the depot, Calcutta, and which should be sold by public auction to the best advantage The proceeds of all articles sold by auction must be deposited in the nearest treasury, and treasury receipt with auction account sale, and copy of the committee report, should be attached to the next cash account current, in which the transaction should appear both on the debit and credit sides †

8 When instruments, the value of which exceeds Rs 50, are received for final deposit in store a valuation receipt will be granted for them by the Officer in charge Mathematical Instrument Office, to enable officers, returning them to remove the item from their debit, by forwarding the receipt to the Comptroller of India Treasuries or other audit officer with the half yearly or other returns for stores submitted to him If the value of the instruments returned does not exceed Rs 50, a valuation statement is granted and the matter is adjusted by cash payment, in the month following that in which the instruments are received, except in the case of officers of the Survey of India Department, Government of India Secretariats, and officers in Berar

9 All Government instruments, etc, requiring repair, etc, should be forwarded with an official letter, stating the nature of the repair required A special requisition form for repairs can be supplied by this office on application

10 All instruments, etc, received from England and issued on book debit in the public service will be charged at their invoice cost, *plus* a percentage to cover freight, insurance, loss by exchange, etc

11 In the event of instruments, indented for by Government officers, not being in stock at the Mathematical Instrument Office, they will, if urgently required, be purchased by that office in the local market

12 Instruments made in the workshops, and those purchased locally for issue on book debit, will be charged at cost rates Instruments purchased locally for officers not entitled to receive them on book debit will be charged at cost price, *plus* 5 to 10 per cent for examining, testing, and incidental charges

---

* NOTE – Includes the principal Forest Officers in Coorg, the Andamans and in Baluchistan and the Commissioner of Ajmere Marwara in Ajmere

† NOTE —It seldom pays to return chains to store and as a rule they should be disposed of locally and the proceeds credited to Government in the nearest treasury merely informing the Mathematical Instrument Office

13 Instruments, when they can be spared, are sometimes sold to officers in the service of Government on payment of their value *plus* from 5 to 10 per cent, and instruments, the private property of officers, can be repaired on like terms In such cases the amount must be remitted to the Officer in charge Mathematical Instrument Office before the instruments can be despatched

14 Instruments returned into store will be valued according to their condition on arrival at the Mathematical Instrument Office *

15 It should be distinctly stated in the forwarding letters, or on the face of delivery vouchers, advising despatch of consignments to the Mathematical Instrument Office, whether the articles forwarded are ' for repair" or " for deposit "

16 All consignments for the Mathematical Instrument Office should be forwarded "*prepaid*" and that office does not pay the freight on instruments despatched by it

17 Instruments are issued and repaired on book debit for officers and departments entitled thereto when the cost exceeds Rs 50 When the cost is not more than Rs 50, cash payment is required and may be made either by Remittance Transfer Receipts, Money Orders, Cheques payable in Calcutta to the Officer in charge Mathematical Instrument Office, or cash In no case should money be paid into the Local Treasuries, and their receipts forwarded in payment of bills

18 In the case of book debit transactions, invoices are sent out in triplicate, one copy to be signed and returned as a voucher for the charge, and the others to be used by the indenting officer in accordance with paragraph 96, Chap VI, Vol I, Civil Account Code

19 When cash payment is required, the Mathematical Instrument Office sends an invoice and a bill The invoice should be signed by the indenting officer and returned to the Mathematical Instrument Office, and the bill should be paid as explained above, when a receipt in proper form will be issued by the Officer in charge Mathematical Instrument Office

20 It is particularly requested that the size and description of instruments, lengths of scales (how divided, and purposes for which required), and generally any information which will guide this Office in knowing, without further reference the exact wants of the indenting officer, be entered on the face of the indent, instead of in covering letters

21 The annexed list gives the nomenclature of the various instruments ordinarily kept in store in this Office for issue on public service, which should be strictly adhered to in all indents

22 To enable the indenting officer, as well as the officer who countersigns and finally passes an indent to know the cost involved thereby, the average ordinary price of each description of instrument is also given in the list Indenting officers should invariably enter the value of all instruments required by them in the column of the indent allotted for that purpose The lower prices are those of instruments which, although perfectly serviceable, are not new (see paragraph 1)

23 Indents should be regulated, not according to what an officer would like to have, but by what is absolutely necessary

24 For the rules for the supply, repair, return, and adjustment of cost of mathematical instruments supplied to corps, units, and field staff offices for mobilisation in accordance with the Field Service Equipment Tables, see G O C C, No 158, dated 9th March 1900

MATHL INSTL OFFICE,
CALCUTTA,
November 1900

F B LONGE, *Major*, R E,
Assistant Surveyor General,
In charge M I O,
Survey of India Dept

P S —An illustrated Catalogue, containing details and description of the Instruments as well as prices, can be obtained, Price Rs 2, and a price list of instruments obtainable is also available for free issue

* NOTE —Instruments purchased for survey of wards and private zamindaris estates if returned to the Mathematical Instrument Department will be received at a proper valuation on completion of the survey

List of Instruments generally kept in store, manufactured, or repaired at the Mathematical Instrument Office, Survey of India Department, Calcutta

Scales acre computing 16 = 1 mile	Each	From 14 0	to	27 8	Many scales require a careful description If there is the least doubt as to the correct denomination of a scale the indenting officer should specify the number of divisions and subdivisions in a given measurement and the method of numbering for instance 12 divided into 60 parts numbered successively from 1 to 60 each part to be subdivided into two Special scales can be manufactured if full description be given
, architect's box wood, sets in box containing six scales divided on the two edges to read $\frac{1}{16}$' and $\frac{1}{8}$' $\frac{3}{16}$" and $\frac{1}{4}$", $\frac{3}{8}$" and $\frac{3}{4}$ $\frac{1}{16}$' and $\frac{1}{2}$", $\frac{1}{2}$" and 1' $1\frac{1}{2}$" and 3"	,	10 0	,	37 0

Port Phillip Steam Pilot vessel established

THE British Admiralty has given notice (No 70 of 1901) that on and after 1st January 1901, the sailing vessels employed in the pilot service off Port Phillip heads would be replaced by a steam vessel The steam pilot vessel will have the same characteristics and observe the same regulations as those given for sailing pilot vessels in Australia Directory, Vol I, 1897, page 430, with the following exceptions —

a When under way, with pilots on board from sunset to sunrise, the pilot vessel will carry the usual side lights for steam vessels, but in addition a white light, at the masthead, and at a distance of 8 feet below it, a red light, both visible in all directions from a distance in clear weather of at least 2 miles

b When at anchor with pilots on board, the steam pilot vessel will carry the above lights, with the exception of the side lights

c When not engaged on pilotage duties, the pilot vessel will carry the same lights as an ordinary steam vessel.

When the steam pilot vessel leaves the cruising ground for coaling or provisioning, etc , a fore and aft schooner will do duty, but in the event of the steam vessel being absent for a longer period than 48 hours, a suitable steam vessel will be substituted (*Notice No 70 of* 1901)

This Notice affects Australia, Vol I, 1897, page 430

Port Curtis—Leading lights—Buoys moved

WITH reference to Notice to Mariners No 258, dated 12th October 1900, issued by this office, the British Admiralty has given further notice (No 64 of 1901) respecting the positions and particulars of the new leading lights at port Curtis —

1 Near the entrance to the Boyne river, two *white fixed* leading lights of the 4th order have been established the front light, elevated 73 feet above high water and visible from a distance of 12 miles, is shown from a skeleton tower 30 feet high, painted white, situated with the western extreme of Canoe point bearing N 85° W, distant 5 cables, the rear light, elevated 124 feet above high water, and visible from a distance of 14 miles, is shown from a square building, painted white, erected on a hill at a distance of 9½ cables S 75° W from the front light
These lights, in line S 75° W, lead through the South channel entrance

2 On the western slope of Gatcombe head two other *white fixed* leading lights have been established the front light, elevated 32 feet above high water, is shown from a small house, erected at a distance of 2¾ cables S 34° W from Gatcombe signal staff. The rear light, elevated 80 feet above high water, is exhibited from a skeleton tower 30 feet high, erected at a distance of 4¾ cables, N 54° W from the front light

Approximate position, front light, lat 23° 53′ S, long. 151° 22½′ E

DIRECTIONS —To enter port Curtis by night steer in through the South channel, with the leading lights near the Boyne river in line S 75° W until the leading lights on Gatcombe head are in line N 54 W , when alter course to N 54° W , keeping those lights in line until East point light is shut in or Gatcombe head light opens out bearing N 45° W then alter course to N 69° W , to pass about two cables South West of the light boat at the inner side of the North channel

3 The red can buoy, situated at a distance of 2$\frac{3}{10}$ miles S 56° E from Gatcombe signal staff, has been moved 4 cables N 50° W from its former position (*Notice No 64 of 1091*)

(*Variation 8° Easterly in 1901*)

NOTE —A new edition of Chart No 19 will be issued

This Notice affects the following Admiralty Charts —Sandy cape to Keppel islands, No 345, Port Curtis, No 1900 Also, List of Lights, Part VI, 1900, No 1265, page 206 and Australia Directory, vol II, 1898, page 178

AUSTRALIA—VICTORIA

Port Phillip entrance—Intended alteration of buoyage and lights in West channel

THE British Admiralty has given notice (No 50 of 1901) that it is intended, on 13th February 1901, to commence altering the lights and buoyage in the West channel to port Phillip as follows —

1 The Pile light on the West sand will show the following sectors *white* from the bearing of N 34° E through north to N 77° W , *red* from N 77° W through west to S 80° W , *white* from S 80° W through south to S 14° E, and *red* from S 14° E through east to N 34° E

Approximate position, lat 38° 11¾ S , long 144° 45¼′ E

2 Popes Eye bank —A *white occulting* light, elevated 24 feet above high water, and visible in clear weather from a distance of 7 miles, will be established and shown from a beacon near Popes Eye fort

3 Swanspit gas buoy, exhibiting a red occulting light, will be replaced by a can buoy

4 No 4 buoy (red conical) will be moved about 2 cables S 8° W from its present position to mark the south western extremity of the shoal

5 Swashway buoy (red conical) will be replaced by a gas buoy, exhibiting a *red fixed* light, at the northern extremity of Royal George shoal

6 No 2, Royal George shoal buoy, exhibiting white *occulting* light, will be altered to show a *red occulting* light

Approximate position, lat 38° 16′ S , long 144° 41½′ E

(*Variation 8° Easterly in 1901*)

Further Notice will be given when these alterations are carried out. (*Notice No 50 of 1901*)

This Notice affects the following Admiralty Chart —Port Phillip entrance, No 1171a, 2747a Also, List of Lights, part VI, 1900, No 1116, page 182, and Australia Directory, vol I, 1897, pages 445, 446, 447

NORTH PACIFIC OCEAN

Grampus islands—Non existence of—

The British Admiralty has given notice (No 54 of 1901) that the Commander of H I J M S *Kongō* reports that he passed under favourable conditions over the assigned position of the Grampus islands without seeing any indication of them

Approximate position, lat 25° 10′ N, long 146° 40 E

They were not seen by either of the U S ships *Alert* in 1881, or *Ropes* in 1893

The Grampus islands were originally reported by Captain Meares in 1788, *vide* "Meares Voyage," page 94 In the account of his voyage it appears that he placed the Freewill islands (New Guinea) 3° eastward of their position as now accepted, and that four days after he had passed the Grampus islands he saw Lots Wife, which he placed 2½° eastward of the position now accepted for that island Taking these facts into consideration, it appears highly probable that the islands he called Grampus were really some of the Volcano group

The Grampus islands have sometimes been thought to be the Sebastian Lobos islands originally reported as being in 25° 40 N, 154° 0 E, and the name Sebastian Lobos has been given, as well as Grampus, to the islands shown on the Admiralty chart in 25° 10′ N, 146° 40′ E, but as neither of these islands have been reported more than once and have never been seen since, it is considered they do not exist, and they have been consequently expunged from the Admiralty charts (*Notice No 54 of 1901*)

This Notice affects the following Admiralty Charts —Atlantic and Indian Oceans, No 2483, Pacific Ocean, Nos 2683 781 Also, China Sea Directory, vol IV, 1894, page 205, and Pacific Islands, vol I, 1900, page 451

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1900 1901

No 166B, dated Calcutta, the 19th February 1901

From—C J STEVENSON-MOORE, Esq, Offg Secy. to the Board of Revenue, L P,

To—The Secretary to the Government of Bengal, Financial Department

I AM directed to submit the following report on the state of the salt market for the third quarter of 1900 1901, comprising the months of October, November and December 1900

THE HON BLE MR C W BOLTON, C.S I

2 The quantity of salt of every description cleared during the quarter amounted to 25,89,478 maunds, as compared with 26,15,493 maunds in the previous quarter and 25,52,009 maunds in the corresponding quarter of the previous year, and the nett amount of duty levied thereon was Rs 60,39,424, as against Rs 60,96,387 in the previous quarter and Rs 59,82,021 in the corresponding quarter of the previous year

3 The quantity of locally made salt removed from the *golas* in Orissa during the quarter and the quantity which remained in store at its close are shown in table (I) below —

TABLE I

1	2
	Puri
	Mds
Balance at the close of the previous quarter	3,74 130
Manufactured or added during the quarter	
Total	3 74 130
Sold during the quarter	19 985
Wastage	2 354
Total	22 339
Balance at the close of the quarter	3 51 791

The total sales of locally made salt during the quarter amounted to 19,985 maunds, as compared with 14,868 maunds in the previous quarter and 14,048 maunds in the corresponding quarter of the previous year Duty was paid on the full quantity sold Owing to the reduction of the price of this salt, from two and one annas a maund to an all round rate of half an anna a maund, sanctioned in Government Order No 2003T —F, dated the 13th November 1900, the sales are increasing

4 The subjoined table (II) shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter, as compared with the figures of the corresponding quarters of the two years previous —

TABLE II

WHENCE IMPORTED	1898 99		1899 1900		1900 1901	
	3rd quarter		3rd quarter		3rd quarter

IV — Ceylon	1	1				
IV — Dingo Soavez (Madagascar)	3 667			5 482		
IV — Jeddah		2 100		2 082		
IV — East Africa					6	6
IV — Australia (Victoria)					4	4
IV — Port Said			2	2		
V — Coconada			3 000			
V — Madras		428				
VI —Bombay	2,60 259	1 56 097	1 62 216	1 37 162	1 26 190	1 53 162
Total	28 09 972	24 14 415	20 01 976	23 76 174	19 12 555	23 05 639

There has been a considerable decrease in the quantity of salt imported and a decrease, less marked, in the quantity cleared The only important exception is Aden The decrease in quantity cleared for English salt is very marked

5 Table III shows the quantity of sea imported salt remaining in the warehouses at the close of the quarter, as compared with the results of the previous four quarters —

TABLE III

Where stored	Third quarter of 1899-1900	Fourth quarter of 1899-1900	First quarter of 1900 1901	Second quarter of 1900 1901	Third quarter of 1900 1901
1	2	3	4	5	6
	Mds.	Mds	Mds	Mds	Mds.
Sulkea Government Salt Golas ..	24 85 905	18 76 801	10 08 927	13 98 890	9 61 08
Kidderpore Dock ditto	7 00 29	5 81 07	4 3 (93	5 73 14	3 81 8[illegible]
Chittagong Government Salt Golas	1 78 388	1 28 906	76 509	60 723	1 31 604
Ditto private ditto	14,512	3 928	2 310		
Narayanganj (private bonded salt warehouses)	51 201	54,440	43 4 7	13 491	47 265
Khulna (ditto ditto)	2 416	3 14	882	4 261	1 9 7
Balasore (ditto ditto)	599	6 040	7 08		
Chandbal (ditto ditto)	2 628	1 12	4 90	2 536	10 10
Bhairab Bazar (ditto ditto)	22 530	21 000	1 600	4 80	0 9 0
Jhalakati (ditto ditto)	31 138	25 378	16 213	29 590	8 [illegible] 37
Total	34 89 806	2 02 660	16,08 503	20 87 704	15 91 18

Stocks were more depleted at the end of this quarter than they have been for some time past The depletion is most noticeable in the case of the Sulkea and Kidderpore golas The inland bonded warehouses, on the whole, show an increased stock in hand

6 The despatches of salt from Calcutta by water and the three railways passing through the several pass stations into the interior of the country, both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter and the corresponding quarters of the last two years, are shown in table (IV) below —

TABLE IV

Period	By water						By rail		By steamers and flats	
	Viâ Balikhal	*Viâ* Sankrail	*Viâ* Cowan khali	*Viâ* Kidderpore	*Viâ* Balliaghatta.	*Viâ* Rathtala Ghat	By the East Indian Railway	By the Eastern Bengal Central and South Eastern Railways or *viâ* Chitpur	Quantity despatched into the interior (excluding Orissa)	Quantity to Orissa

7 The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter amounted to 4,455 maunds against 1,21[illegible] maunds in the previous quarter and 19,490 maunds and 30 seers in the corresponding quarter of the previous year

8 The quantity of saltpetre removed from the refineries during the quarter on payment of duty amounted to 3,187 maunds, as compared with 3,317 maunds in the previous quarter and 1,587 maunds in the corresponding quarter of the previous year

9 The shipments of Liverpool salt during the quarter for the port of Calcutta, according to the published market reports, amounted to 12,203 tons It is reported that two sailing vessels were *en route* for Calcutta at the close of the quarter with 2,800 tons of salt from Hamburg

10 Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter —

TABLE V

Description of Salt	Fortnight ending 15th October 1900	Fortnight ending 31st October 1900	Fortnight ending 15th November 1900	Fortnight ending 30th November 1900	Fortnight ending 15th December 1900	Fortnight ending 31st December 1900

	Total	3 97 100	3,56 421	[illegible],99 722	2 [illegible]3 854

The inland warehouses at Narayanganj, Chandbali and Bhairab Bazar carry on an increasing trade

No transactions in sea imported salt have been reported for the quarter from Cuttack and Puri

WEATHER AND CROP REPORT

For the week ending the 4th March 1901

Burdwan —No rain Weather seasonable Pressing of sugarcane continues Condition of *rabi* crops fair Fodder and water sufficient Common rice selling as follows —

	Srs	
Sadar	12	per rupee
Kalna	$10\frac{5}{16}$	
Katwa	$12\frac{5}{8}$	
Raniganj	$12\frac{1}{2}$	

Birbhum —No rain Weather cloudy Pressing of sugarcane continues *Rabi* crops doing well Price of rice at Sadar 12 seers and at Rampur Hât 13½ seers per rupee Fodder sufficient

Bankura —No rain Weather occasionally cloudy Pressing of sugarcane in progress Harvesting of *rabi* has commenced Sporadic cases of cow pox reported Fodder dear Price of common rice at Bankura 11 seers 14 chitaks and at Vishnupur 12 seers per rupee

Midnapore —No rain *Aman* being harvested Sugarcane being pressed *Rabi* looks good Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Contai	13	
Tamluk	11	
Ghatal	12	

Hooghly —Rainfall at Sadar nil, Serampore nil, Arambagh 01 Pressing of sugarcane continues Prospect of standing crops good Common rice sells at 10 seers 10 chitaks per rupee

Howrah —No rain Weather seasonable Harvesting of *rabi* finished Fodder and water sufficient Common rice sells at 10 seers per rupee

24 Parganas —Rainfall nil Weather seasonable Lands are being ploughed for *aus* paddy and jute *Rabi* crops are being harvested Cattle disease reported from Sadar and Basirhat subdivisions Fodder and water sufficient Common rice sells as follows —

	Srs	Ch	
Sadar	10	¼	per rupee
Barasat	10	0	
Basirhat	10	0	
Diamond Harbour	10	½	

Nadia —No Rain Weather seasonable Harvesting of *rabi* crops still going on Lands being cultivated for early rice Fodder and water sufficient except in Chuadanga Common rice sells as follows —

Sadar	$11\frac{3}{4}$	per rupee
Kushtia	13	
Meherpur	$11\frac{3}{8}$	
Chuadanga	12	
Ranaghat	10	

Murshidabad —No rain Weather seasonable Prospects of *rabi* crops favourable Cattle-disease reported from Hoorshi outpost of Sadar subdivision Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	13	per rupee.
Jangipur	14	
Kandi	$14\frac{1}{2}$	
Lalbagh	12	

Jessore —No rainfall. Weather seasonable Prospects of the crops good Peas, rapeseed and linseed being harvested Harvesting of mustard completed Pressing of sugarcane going on Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	$12\frac{1}{2}$	per rupee
Jhenida	12	
Magura	12	
Narail	10	
Bangaon	$12\frac{4}{16}$	

Khulna.—Rainfall nil Weather getting hot Transplantation of *boro* still continues Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	11½	per rupee
Bagerhat	9¾	
Satkhira	11	

Rajshahi Weather seasonable Prospects of crops good No cattle disease Fodder and water sufficient Common rice selling at 13 seers per rupee

Dinajpur.—Rainfall nil Weather seasonable No cattle disease Fodder and drinking water plentiful Rice 11 seers a rupee in Dinajpur town and 13 seers at Thakurgaon

Jalpaiguri.—Rainfall nil Weather seasonable Prospect of *rabi* crops satisfactory Harvesting of tobacco commenced in place Fields are being prepared for *bhadoi* and jute Common rice sells at 12 seers per rupee Fodder and water sufficient

Darjeeling.—Rainfall nil Weather seasonable *Hills—torі*, wheat, barley, potatoes progressing *Terai*—harvesting of mustard proceeding Potatoes doing well Common rice sells as follows —

	Srs	
Hills	10	per rupee
Terai	14	

Bhutia sells at Darjeeling 19 seers and at Kalimpong 20 seers per rupee

Rangpur.—Rainfall nil Weather seasonable Harvesting of *rabi* crops almost finished Sowing of *aus* going on Water and fodder sufficient Price of common rice stationary

Bogra.—No rain Cultivation for *aus* and jute still going on Rain wanted Fodder and water sufficient Prices unchanged

Pabna.—Rainfall nil Weather seasonable Prospects of crops good Land being prepared for paddy and jute Prices unchanged Fodder and water sufficient

Dacca.—Rainfall nil Weather seasonable Prospects of crops fair Fodder available No cattle disease Common rice 10½ seers per rupee

Mymensingh.—Rainfall nil Weather seasonable Prospects of standing crops fair Common rice sells as follows —

	Srs	
Sadar	10	per rupee
Jamalpur	10	
Kishoreganj	9⅞	
Tangail	Report not received	
Netrakona	10	

Faridpur.—No rain Weather warm in day, still cold at night State and prospects of crops good Common rice sells at 12 seers a rupee

Backergunge.—Rainfall at Sadar nil Weather seasonable Prospects of crops good Fodder and water sufficient No cattle disease reported Common rice sells at 11¼ seers (new *aman*) per rupee

	Inches
The mean pressure of the seven days	30 005
The average pressure of the corresponding period for 24 years, Surveyor General's Office	29 889
	Hours
The total number of hours of bright sunshine	60 5
The maximum possible number of hours of sunshine	81 3
The mean temperature of the seven days	69 4
The average temperature of the corresponding period for 24 years, Surveyor General's Office	76 8
The extreme variation of temperature	34 0
The maximum temperature	87 1
	Miles
The highest velocity of the wind in one hour	20
	%
The mean relative humidity	60
The average relative humidity of the corresponding period for 24 years, Surveyor General's Office	64
	Inches
The total fall of rain from 24th February to 2nd March 1901	Nil
The average fall of the corresponding period for 24 years, Surveyor General's Office	0 42
The total fall from 1st January to 2nd March 1901	3 26
The average fall of the corresponding period for 24 years, Surveyor General's Office	1 72

The mean pressure, temperature &c, are deduced from the traces of the Barograph and Thermograph, and from eye observations

The maximum and minimum temperatures are obtained from self registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard Newman's No 86, formerly at the Surveyor General's Office

The hygrometric elements are obtained from Tables III IV and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain gauge is one foot above the ground

o, overcast, ⌓, dew

Total for corresponding 6¾ weeks of previous year	2 396 179	25 64 67 11	3 41,53 352 0	1 313 1 5	2 02 94 10 7	99 84 0 7 14 11	698 472¼	1 341 908½	2,040 380

(a) The increase is due to movements of marriage parties and Siva Ratra Mela
(b) The decrease is chiefly due to heavier upward despatches of food grains in the corresponding period of 1900

REVENUE DEPARTMENT—(LAND REVENUE)

NOTIFICATION—No 1285L R

The 12th March 1901 —Whereas an application was made by the proprietor of villages Palashi, Mahammadpur, Moharajpur, Madhabpur and Pashbarbatia, appertaining to estate Palashi, pargana Turkachar, tauzi No 2272, in the district of Midnapore, for a survey and preparation of a record of-rights in respect of

Midnapore

all lands situated in those villages, and whereas he agreed to deposit the cost of the operations which was estimated at Rs 1,316

In exercise of the powers conferred upon him by section 101 (2) (a) of the Bengal Tenancy Act, VIII of 1885, as amended by Act III (B C) of 1898, the Lieutenant Governor of Bengal is pleased to direct that a survey shall be made and a record of rights prepared in respect of all lands included within the boundaries of villages Palashi, Mahammadpur, Moharajpur Madhabpur and Kalbarbatia, estate Palashi, pargana Turkuchar, tauzi No 2272, in the district of Midnapore

The particulars to be recorded in the said survey and record of rights shall be the following, namely —

(a) The name of each tenant or occupant

(b) The class to which each tenant belongs, that is to say, whether he is a tenure holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non occupancy raiyat or under raiyat, and if he is a tenure holder, whether he is a permanent tenure holder or not, and whether his rent is liable to enhancement during the continuance of his tenure

(c) The situation and quantity and one or more of the boundaries of the land held by each tenant or occupier

(d) The name of each tenant's landlord

(e) The rent payable at the time the record of rights is being prepared

(f) The mode in which that rent has been fixed whether by contract by order of a Court or otherwise

(g) If the rent is a gradually increasing rent, the time at which, and the steps by which it increases

(h) The special conditions and incidents, if any, of the tenancy

(i) If the land is claimed to be held rent free, whether or not rent is actually paid, and if not paid whether or not the occupant is entitled to hold the land without payment of rent, and if so entitled, under what authority

F A SLACKE,
Secy to the Govt of Bengal

F A SLACKE,
Secy to the Govt of Bengal.

GENERAL DEPARTMENT—(EDUCATION)

Note on the books required to be prepared in connexion with the new Vernacular Education Scheme sanctioned by Government in Resolution No 1, dated the 1st January 1901

NOTIFICATION—No 1284

The 12th March 1901 —The books to be prepared can be classed under two heads, namely (*a*) those for the use of the teachers in the schools, and (*b*) those to be used by the pupils in the schools Under section (*a*) there will be wanted—

Teachers' Manuals | Drill book
Drawing book (in parts)

Two Teachers' Manuals will be required—one for the use of Lower Primary school teachers or teachers of classes of similar standards up to standards I and II of the new scheme, and a second to be used by Upper and Middle school teachers or by teachers of other schools or classes of similar standards to III and IV and V and VI of the new scheme (*i e* the Upper Primary and Middle school standards)

In the preparation of the Junior Vernacular Teachers' Manual it must be remembered that in the infant stage of education practically everything depends upon the teacher It is, therefore necessary to supply each of the Lower Primary gurus with a manual giving *very full* instructions as to how the teacher should conduct the training of the senses and how he should proceed with object lessons etc This manual would also indicate more briefly how the remaining subjects up to the Lower Primary standard (*i e* up to standards I and II) are to be taught, and the whole manual should not exceed 200 pages (12mo) in length The following are the subjects laid down in the Government Resolution which are to be treated in this manual (see pages 61 and 62 of Government Resolution No 1 of 1901, *Calcutta Gazette*, dated 2nd January 1901) —

The Teachers Manual for the Lower Primary Standard (200 pages)

1 *Introduction* —A short and simple statement of the principles of the Kindergarten method of training young children (ten pages)

2 The Kindergarten occupations and action songs (eight pages)

3 The requirements of the syllabus for the Infant and Lower Primary standards of vernacular education (ten pages)

4 The school room and arrangement of children (3 pages)

5 Methods of giving lessons on particular subjects, full notes of lessons containing detailed instructions as to how to give lessons on form, colour, writing, reading, arithmetic etc, so that the pupils might thoroughly learn the subjects taught, and that at the same time their senses might be trained, and their power of expression and all the faculties—physical, mental, and moral—be duly developed (162 pages)

6 Qualifications and duties of a good teacher and his conduct towards the pupils, punctuality and discipline corporal punishment (six pages)

The second or senior Vernacular Teachers' Manual should go rather more fully into the methods of managing the classes of a school into the methods of maintaining discipline, the methods of keeping school registers and accounts the requirements as to cleanliness and sanitation in school rooms and school houses and other matters of the same kind, and, in addition, it will explain in detail the principles upon which the teaching of the classes of an Upper Primary and of a Middle school should be conducted

The following are the headings under which the various subjects are to be treated in this manual as defined in the Government Resolution The book should not exceed 250 pages (12mo) (see page 61 of Government Resolution No 1 of 1st January 1901) —

The Teachers' Manual for the Upper Primary and Middle Vernacular Standards (250 pages)

1 *Introduction* —The principles of Froebel s method, the principles underlying school education the English Public School system, the Hindu method (20 pages)

2 The requirements of the syllabus for the Upper Primary and Middle Vernacular standards (10 pages)

3 *Class teaching* —Instruction and education collective instruction, attention to individuals, analysis and synthesis oral teaching and questioning the Socratic method answering, proceeding from the known to the unknown, from the concrete to the abstract, the verbal, material and pictorial illustration the use to be made of analogy and contrast, the use of the black board, learning by heart, repetition, home exercises, examining (30 pages)

4 Methods of teaching particular subjects, together with notes of lessons, selected from the prescribed subjects, such as science, literature, history, geography, etc (155 pages)

5 Moral training (five pages)

6 *Organisation* —The organisation of a good school, time tables, the arrangements into sections and classes, the standard of classification, the teaching staff, the apparatus and furniture the register and account books, drill and recreation, sanitation of the school house, etc (10 pages)

7 The qualities desirable in a pupil, necessity of punctuality, discipline, rewards and punishment, drill as an aid to discipline (15 pages)

8 Qualifications and duties of a good teacher and his conduct towards his pupils (five pages)

All teachers in charge of the various standards of education as prescribed in the Government Resolution No 1 of the 1st January 1901 will be required to possess the Teachers' Manual or Manuals dealing with the classes they are in charge of

Authors and publishers are invited to submit, on or before the 1st of September 1901, to the Director of Public Instruction, Calcutta, printed or type written copies of such Teachers' Manuals They will then be examined by the Calcutta Central Text Book Committee (or by a special Committee at the option of Government) and, if approved, will be included in a list of approved Teachers' Manuals, and only books from such list will be allowed to be used in schools supported from public funds or receiving public or Government aid or encouragement in any form

The books submitted may be printed in English or any vernacular of Bengal but if in a vernacular, they should be accompanied by a type written literal English translation of the work

The cost of the printed Junior Teachers' Manual should be about 8 annas, and that of the Senior Teachers Manual about 10 annas, or, if in stout binding, this cost may be slightly exceeded

The Government of Bengal will be prepared to award premia or prizes as follows to the authors of such manuals if it is decided that any of the books submitted are of sufficiently high standard to merit such distinction —

1 Premium of Rs 500 } for the Junior Vernacular Teachers' Manual
1 „ „ 250 }

and

1 Premium of Rs 500 } for the Senior Vernacular Teachers' Manual
1 „ „ 250 }

The copy right of all these works, including those for which a premium is awarded, will remain with the authors, but the maximum price to be charged for each work will be decided by Government Authors and publishers must make their own arrangements for the printing, publication, and sale of all such approved works On being placed on the list of approved Teachers' Manual, they will be allowed to remain there for at least three years, but after that period, will be subject to re examination, if necessary, and to supersession by better books, if such are submitted in the meantime

Of the other books required by the teachers, the Drill book (in English) is already in existence, and steps will be taken by Government to have this work translated into the four vernaculars—Bengali Hindi, Urdu and Uriya

The Drawing book required by the teachers is in course of preparation under orders of Government It will be issued separately for the use of different classes or grades of schools In the Teachers' Manuals instructions will be given to the teachers as to the best method of imparting elementary instruction in this subject

Under the heading (*b*), *i e*, books for the use of the pupils in schools, the following books have to be prepared —

I —For the Lower Primary schools and for the similar classes in other schools (Upper Primary, Middle and High schools)—

One alphabet and spelling book	1 anna
One Lower Primary Reader	3 annas
One Arithmetic book	3 „

II —For the Upper Primary classes (including the corresponding classes in Middle and High schools)—

1 Upper Primary Science Reader	4 annas.
1 „ „ Literature book	3 „
1 „ „ Historical Reader (Bengal)	3 „
1 „ „ Geographical Reader	3 „
1 „ Arithmetic book (included with the Middle School course)	8 „
1 „ „ English Spelling book (optional)	2 „

III —For Middle School classes (including the corresponding classes of High schools which may take up this course)—

1 Middle Vernacular Science Reader	7 annas
1 „ „ Literature book	6 „
1 „ „ Historical Reader (India)	4 „
1 „ „ Geographical Reader	4 „
1 „ „ Arithmetic book (included with the Upper Primary Arithmetic book)	8 „
1 Euclid (1st book) optional	4 „
1 English Reader, optional	6 „

NOTE —Drawing and Drill books will be provided for the teachers only, and not for pupils These books will be

The details of the subjects which are to be included in the Science Readers and in the books on all other subjects and their limits are exhaustively laid down in the Government Resolution No 1 of the 1st January 1901, pages 42 to 62 All subjects not specifically included in the separate books as above indicated are to form part of the Science Readers for the various stages

Authors and publishers are invited to submit, on or before the 1st November 1901, to the Director of Public Instruction, Calcutta, printed or type written copies of all books intended for use in the courses of instruction laid down by the Government of Bengal in the Resolution referred to Such works may be printed or type written in English or in any vernacular used in Bengal, but if submitted in a vernacular, they should be accompanied by a type written literal English translation of the work

Works thus submitted will be examined by the Calcutta Central Text Book Committee (or by a special Committee at the option of Government), and if approved, will be included in a list of approved books for use in schools, and from the year 1902 only such works will be allowed to be used in those schools which teach the new courses of instruction for the scholarship examination for the year 1904 onwards

The copyright of all books approved will remain with the authors and publishers, who will make their own arrangements for printing, publishing, and distributing such works, but Government reserves to itself the right of fixing the maximum price to be charged for such books The prices indicated above are to be taken as approximate only On being placed on the approved list, works will be allowed to remain there for at least three years, but after that period Government will reserve to itself the right of re examining the books, if thought desirable, and of deciding on such re examination whether the books are to be retained in the list or to give way to better books if such have been submitted

RAILWAY DEPARTMENT

The 6th March 1901

No 36R—Notification—With reference to Appointment Department Notification No 1364A, dated 25th February 1901, Babu Rasik Lal Sen, Deputy Magistrate and Deputy Collector, Gaya, is appointed to acquire land for the Bankura portion of the Midnapore Jherria Extension of the Bengal Nagpur Railway

The 19th March 1901

No 37R—Declaration—Whereas it appears to the Lieutenant Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz, for staff quarters for the construction of the Bengal Duars Railway Extension, Lalmonirhat towards Deomoni, in the village of Saptana, pargana Kakina, zilla Rangpur, it is hereby declared that for the above purpose a plot of land 400 × 370′ measuring, more or less, 9 bighas 17 cottahs and 6 3 chitaks of standard measurement, bounded by nicks in the ground, is required within the aforesaid village of Saptana

Mines of coal, iron stone, slate or other minerals lying under the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern

A plan of the land may be inspected in the office of the Manager and Engineer in Chief, Bengal Duars Railway, at Jalpaiguri

No 38R—Declaration—Whereas it appears to the Lieutenant Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for an assisted siding at Joiramdanga off Sitarampur Domahani Extension to the New Birbhum Coal Company's colliery, in the village of Joiramdanga, pargana Sherghur, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 18 bighas 4 cottahs and 9 77 chitaks of standard measurement (corresponding to 6 acres and 4 26 poles), bounded on the north by Railway lands, coal depôt and danga lands of New Birbhum Coal Company and the lands of Digoo Majhi, Madhob Show, Bonowari Ghose, Nimai Ghose, Nayan Mondal, Gopi Gowala, Goyaram Mondal, Dinoo Mondal and a village

road, on the south by the lands of Udoy Mondal, Gopi Tanti, Bonowari Ghose, Ramoo Chutor, Nimai Ghose, Narayan Mondal, Kolpa Mondal, Kangal Majhi, Romogoria tank, a village road and a coal depôt and tram line of New Birbhum Coal Company, on the east by the Railway lands, and on the west by the paddy lands of Nayan Mondal, is required within the aforesaid village of Joyramdanga.

Mines of coal, iron stone, slate or other minerals lying under the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern

A plan of the land may be inspected in the office of the District Engineer, East Indian Railway, Asansol

No 39R —Declaration —Whereas it appears to the Lieutenant Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz, for manufacturing ballast at Belghurriah on the Eastern Section of the Eastern Bengal State Railway System in the mauza Belghurriah, pargana Calcutta, zilla 24 Parganas, it is hereby declared that for the above purpose a plot of land measuring, more or less, 4 bighas 9 cottahs 9 chitaks and 15 square feet of standard measurement, bounded on the north by land belonging to Eastern Bengal State Railway and by that occupied by Autool Chunder Gangooly and Brothers, on the east by land belonging to Eastern Bengal State Railway on the south by land occupied by Bhuban Mohan Banerjee, Autool Chunder Gangooly and Brothers and Shib Nath Roy, and on the west by land occupied by Autool Chunder Gangooly and Brothers, Bhuban Mohan Banerjee and Kedar Nath Ghose, is required within the aforesaid mauza of Belghurriah

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern

A plan of the land may be inspected in the office of the Executive Engineer, Calcutta.

No 40R —Declaration —Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz, for Jamebari assisted siding in the village of Jamebari, pargana Sherghur, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less 4 bighas 7 cottahs 4 11 chitaks of standard measurement (corresponding to 1 acre 1 rood 30 76 poles), bounded on the north by the land of Bikram Majhi, on the south by the East Indian Railway land, on the east by the lands of Bikram, Roghu, Kishon, Jitoo, Dukhan Majhi and others, and on the west by the lands of Bikram, Roghu, Jitoo, Kishon, Dukhan Charon Majhi and others, is required within the aforesaid village of Jamebari

Mines of coal, iron stone, slate or other minerals lying under the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern

A plan of the land may be inspected in the office of the District Engineer, East Indian Railway, Asansol

D JOSCELYNE,
Secy to the Govt of Bengal

MARINE DEPARTMENT.

The 7th March 1901

No 26Marine —In exercise of the powers conferred by section 50A of the Inland Steam Vessels Act, 1884, as amended by the Inland Steam Vessels Act (1884) Amendment Act, 1899, and with the previous sanction of the Governor General in Council, as required by section 69, sub section (5) of the said Act, the Lieutenant Governor is pleased to make the following revised preamble of the rules for the protection of inland steam vessels from danger by collision in supersession of that sanctioned under the Notification of this Government, No 148Marine, dated the 23rd August 1900 —

"These rules are applicable to, and shall be followed by, all inland steam vessels, and all other vessels hereinafter specified, on all inland waters in Bengal, on which steam vessels ply, excepting the Hooghly river between a line drawn west of Saugor Island Light House and the north boundary of the Port of Calcutta, to which the rules under the Merchant Shipping Act, 1894 (57 and 58 Vict, Chapter 60) apply"

R B BUCKLEY,
Secy to the Govt of Bengal

The 9th March 1901

No 27Marine —Mr I S Wells, Senior Master Pilot, is granted privilege leave, under Article 746 (*a*) of the Civil Service Regulations, from the 12th to the 22nd February 1901

R B BUCKLEY,
Secy to the Govt of Bengal.

The 11th March 1901

No 28 Marine—In exercise of the power conferred by section 9 of the Indian Petroleum Act, 1899, the Lieutenant Governor proposes to make the following rules to regulate the importation, possession, sale and transport of Carbide of Calcium in the Lower Provinces of Bengal. The rules will be taken into consideration after the expiry of two months from their first publication in the Gazette, and the Lieutenant-Governor will be glad to consider any suggestions or observations that may be made by any person concerning them within that period

R B BUCKLEY,
Secy to the Govt of Bengal

Draft Rules to regulate the importation, possession, sale and transport of Carbide of Calcium

I —IMPORTATION

1 Carbide of calcium may be imported only at the ports of Calcutta and Chittagong

2 The master of every vessel arriving at any such port and carrying carbide of calcium for discharge thereat shall, on entering the harbour and before landing any cargo, declare in writing to the Collector of Customs the quantity and description of such carbide of calcium

3 On receipt of the declaration referred to in rule 2, the Collector of Customs shall, on the production of a license to import carbide of calcium granted under these rules, permit the carbide of calcium to the amount permitted thereby to be landed and conveyed to the place appointed for its storage

4 As soon as the carbide of calcium has been deposited under rule 2, a sample shall be taken of each consignment and forwarded to the Chemical Examiner to be tested

5 Each consignment of the carbide of calcium shall be separately tested, and for that purpose a sample shall be taken from one drum or case in every two hundred drums or cases

6 If after test any consignment is pronounced by the Chemical Examiner to be commercially pure, *i e*, to contain no impurities liable to generate phosphoretted or siliciuretted hydrogen so as to render the gas evolved liable to ignite spontaneously, it may be removed, under a license to transport carbide of calcium granted under Part III, to premises in respect of which a license to possess carbide of calcium has been granted under Part II

7 If after test any consignment is pronounced by the Chemical Examiner to be not commercially pure, notice shall be given to the importer to destroy the consignment within 7 days, and, if the importer fails to do so, the Collector of Customs shall cause the consignment to be destroyed by immersion in at least twenty times its bulk of water

8 The fee for testing each consignment shall be five rupees

9 Carbide of calcium shall be landed only between sunrise and sunset and at such place or places as the Collector of Customs shall direct

10 Carbide of calcium may be imported only under a license granted under these rules Such licenses shall be either general or special in Form A or Form B in the schedule, and may be granted by the Commissioner of Police in the town of Calcutta and the District Magistrate elsewhere

11 A general license to import carbide of calcium may be granted only to a person owning, or having a lease for at least one year of, a building fulfilling the requirements of rules 16 to 18

12 A special license to import carbide of calcium may be granted for a particular consignment and for a specified period not exceeding six months, if the importer satisfies the licensing officer that the carbide of calcium will be stored in such a building as aforesaid

13 The fee for a license to import carbide of calcium shall be five rupees

II —POSSESSION AND SALE

14 No license shall be required for the possession or sale of carbide of calcium in any quantity not exceeding five pounds, if it is kept in separate

vessels, each containing not more than one pound, of the nature described in, and labelled as required by, rule 43

15 Carbide of calcium in any quantity exceeding five pounds may be kept only under a license to possess carbide of calcium granted under these rules. Every application for such a license shall be in Form C in the schedule, and, where the applicant proposes to engage in the manufacture of acetylene gas, the nature of the generating apparatus to be used by the licensee shall be such as to satisfy the licensing officer

16 Carbide of calcium shall be stored,—

(1) if in quantities aggregating not more than four hundred and fifty pounds,—in a suitable uninhabited building at least twenty feet away from any other premises,

(2) if in quantities aggregating more than four hundred and fifty pounds and not more than three thousands pounds,—in a suitable uninhabited building at least forty feet away from any other premises,

(3) if in quantities aggregating more than three thousand pounds and not more than ten tons,—in an uninhabited building at least two hundred feet away from any other premises

Not more that ten tons of carbide of calcium shall be stored in any one building

17 Every building for the storage of carbide of calcium shall be—

(*a*) constructed with stone, brick or iron walls with terraced, tiled or iron roofs, and with tiled, paved or cemented floors raised at least a foot above the ground level, and

(*b*) well ventilated and water tight to the satisfaction of the licensing officer

18 Carbide of calcium shall be stored only on racks or trestles standing at least one foot above the level of the ground and at least one foot away from any wall, and no articles of an inflammable or combustible nature shall be kept in the same building

19 Licenses to possess carbide of calcium shall be in Form D in the schedule, and may be granted by the Commissioner of Police in Calcutta, and by the District Magistrate elsewhere

20 Such licenses shall be in force for one year from the dates of issue

Provided that the licensing officer may, at any time, for good and sufficient reasons, cancel any such license

21 The fee for a license to possess carbide of calcium shall be five rupees

22 Every application for the renewal of a license to possess carbide of calcium shall be made in the same manner as an application for an original license

23 Every such application shall be made at a date not less than fifteen days prior to the date on which the original license expires The same fee shall be charged for the renewal of a license as for an original license

24 Every retail vendor of carbide of calcium, selling any quantity exceeding half a pound to a purchaser, shall deliver it to him in an air-tight tin or drum, packed and marked in accordance with these rules, and bearing the name of the vendor plainly printed on the package.

25 Every retail vendor shall keep his carbide of calcium in a receptacle which can be easily opened and closed again so as to be air-tight, and shall open, for the purposes of sale, not more than one drum at a time

III —TRANSPORT

26 No license shall be required for the transport of carbide of calcium in any quantity not exceeding five pounds if it is packed in separate vessels, each containing not more than one pound, of the nature described in, and labelled as required by, rule 43

27 Carbide of calcium in any quantity exceeding five pounds may be transported only under a license to transport carbide of calcium granted under these rules, and shall not be deposited at any time during transit in any building other than a building fulfilling the requirements of rules 16 and 17, and shall not be stored in any such building except in accordance with the conditions as to storage prescribed by rule 18.

28 (1) Where carbide of calcium is transported by passenger train, no quantity exceeding four hundred and fifty pounds shall be carried by any one train, and the wagons shall be well ventilated and protected from rain

(2) Under no circumstances shall a lamp or other artifical light be taken into a wagon, vessel or conveyance containing carbide of calcium

29 Licenses to transport carbide of calcium shall be either general or special in Form E or Form F in the schedule and may be granted by the Commissioner of Police in Calcutta and the District Magistrate elsewhere

30 A general license to transport carbide of calcium may be granted only to a person who holds an annual license to possess a quantity exceeding four hundred and fifty pounds of carbide of calcium

31 A special license to transport carbide of calcium may be granted to any person for a particular consignment at the discretion of the licensing officer

32 The fee for a general license to transport carbide of calcium shall be five rupees

33 An application for a general license to transport carbide of calcium shall state—

(a) the number and date of the license to possess carbide of calcium held by the applicant, and

(b) the period of currency of that license

34 A general license to transport carbide of calcium shall be in force for not more than one year, and shall in no case remain in force after the date on which the license to possess carbide of calcium held by the applicant expires

35 An application for special license to transport carbide of calcium shall state—

(a) the place from which the carbide of calcium is to be transported,

(b) the place to which it is to be transported,

(c) the number of drums or cases,

(d) the quantity in each drum or case,

(e) the name and address of the consignee,

(f) whether the consignee has a license to possess carbide of calcium sufficient to cover the amount transported, and

(g) the date on which it is proposed to despatch the consignment

36 A special license to transport carbide of calcium shall be in force for such period, not exceeding one month from the date of the grant of the license, as may be specified on the same

37 The fee for a special license to transport carbide of calcium shall be one rupee

38 The holder of a general license to transport carbide of calcium shall, with each consignment exceeding four hundred and fifty pounds conveyed under cover of his license, issue a pass in Form G in the schedule, specifying—

(a) the places from and to which the carbide of calcium is to be transported,

(b) the quantity of carbide of calcium covered by the pass,

(c) the name and address of the consignee, and

(d) whether the consignee has a license to possess carbide of calcium sufficient to cover the amount transported

IV —INSPECTION

39 The Commissioner of Police, or, in a district, the District Magistrate or any Police officer of rank not lower than that of Sub Inspector appointed by the District Magistrate in writing, or any other officer appointed by the Local Government in this behalf, may at any time enter any premises in respect of which a license to possess carbide of calcium has been granted, for the purpose of inspecting the same.

40 Any officer so inspecting may require a sample or samples to be delivered to him from any drum or case of carbide of calcium stored in the premises inspected.

41. The licensee of any premises inspected shall personally or through a representative show to the officer so inspecting every place and every vessel in which carbide of calcium in his possession is kept, deliver any samples required, and give such assistance as that officer may require

42 Where a license to transport carbide of calcium has been granted, any officer authorized under rule 39 may, at any time and on or before the arrival of the carbide of calcium at its destination, board any vessel, or detain any conveyance, used for such transport, for the purpose of inspecting the pass granted to the licensee and seeing whether the provisions of these rules and the conditions of the license have been complied with

V — GENERAL

43 Where carbide of calcium—

(a) is imported or kept at any place after seven days from the date of its importation, or

(b) is transported, or

(c) is sold or exposed for sale,

it shall be contained in substantial hermetically closed metal vessels containing not more than one hundred and fifty pounds, having no copper in their construction and having attached to them labels stating in conspicuous characters the words—"CARBIDE OF CALCIUM—DANGEROUS IF NOT KEPT DRY," together with the following caution —

"*The contents of this package are liable, if brought into contact with moisture, to give off a highly inflammable gas,*"

and with the addition,—

(d) in the case of a vessel kept, of the name and address of the consignee or owner,

(e) in the case of a vessel transported, of the name and address of the sender, and

(f) in the case of a vessel sold or exposed for sale, of the name and address of the vendor

44 A licensing officer may, for reasons to be reported to the Local Government, refuse a license in any case, the reasons for refusal being communicated to the applicant if a request to that effect is preferred by him

45 Any explosion or accident occurring in connection with the importation, transport, possession, or sale of carbide of calcium shall be reported without delay at the nearest police station

46 Where a licensee dies or becomes bankrupt or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Act or these rules for acting under the license during such time as may reasonably be necessary to allow him to make an application for a new license in his own name for the unexpired portion of the original license Such new license shall be granted on payment of one rupee

47 Where a license granted under these rules is lost or accidentally destroyed, a duplicate may be granted on payment of a fee of eight annas

48 The fees leviable under these rules shall be levied by means of impressed stamps If licenses and renewals of licenses are issued on impressed stamps, applications therefor may be written on plain paper Otherwise the application for a license or renewal shall be written on an impressed stamp of value equal to the amount of the fee leviable in respect of such license or renewal, the license itself being issued on plain paper Where an application for a license is written on an impressed stamp and the license is refused, the value of the stamp will, on application, be refunded to the applicant

49 Any person holding a license or acting under a license granted under these rules shall be bound to produce the same when called upon to do so by any Magistrate, or Police officer of rank not lower than that of an officer in charge of a police station

ENDORSEMENT ON FORM D

RULES

[Here enter rules 14 to 25 and 39 to 49]

CONDITIONS.

1 This license is given subject to the provisions of the Indian Petroleum Act, 1899 (VIII of 1899), and the above-mentioned rules for the possession and sale of carbide of calcium made thereunder

2. If the licensing officer or any officer appointed under rule 39 calls on the license holder, by notice in writing, to execute any repairs to the building licensed which may, in the opinion of such officer, be necessary for the safety thereof, the license-holder shall execute the repairs within such period, not being less than one week from the date of receipt of the notice, as may be fixed by the notice

3 The licensee shall not deliver any quantity of carbide of calcium exceeding five pounds to any one who has not a license under section 5 or 6 of the Act or any quantity of such carbide of calcium, except in accordance with the rules as to the manner in which carbide calcium is to be packed

4 Vessels containing carbide of calcium shall be opened only for the time necessary for the removal of any quantity of carbide of calcium or for the refilling of other vessels During such removal or refilling every reasonable precaution shall be adopted for preventing moisture being brought into contact with the carbide of calcium, as well as for guarding against the risk of ignition of any gas which may be liberated

5. Every storage vessel of a greater storage capacity than two pounds shall be secured with a lock or be kept in a locked receptacle, so as to prevent unauthorized persons having access to the contents

6 Due precaution shall at all times be taken for the prevention of accidents from fire, and no smoking, light, or fire in any form shall be permitted at any time within or near the building in which the carbide of calcium is stored

7 If carbide of calcium is used for the manufacture of acetylene gas, the following precautions for ensuring safety shall be adopted —

(a) No apparatus shall be used unless the licensing authority is satisfied that it is of a safe and suitable character

(*b*) Every apparatus for generating and storing acetylene gas other than a portable apparatus holding a charge of less than two pounds of carbide of calcium shall be placed in an outbuilding, which shall be separated as far as may be practicable, from any inhabited building, and shall be well ventilated.

(*c*) No fire or such artificial light as would ignite inflammable gas shall be taken into or near the building in which a gas making apparatus is placed.

8 Every apparatus (including generator and gas holder) used for the manufacture of acetylene gas shall, as far as practicable, be constructed and used so as to provide against special risks, that is to say —

(*a*) Copper shall not be used in any part of the apparatus

(*b*) The various parts shall be of adequate strength

(*c*) The escape of gas from the apparatus shall be carefully guarded against

(*d*) Satisfactory provision shall be made against the dangerous develop ment of heat

(*e*) Satisfactory provision against undue pressure shall be made by the employment of an adequate safety valve connected with a pipe discharging into the open air, and a suitable pressure gauge shall be attached to the apparatus

(*f*) Provision shall be made for the residue of the carbide of calcium being mixed with at least ten times its bulk of water on being removed from the apparatus

(*g*) No person shall have charge of an apparatus unless he has been properly instructed in its management

RESOLUTION

No 911Ex, dated Calcutta, the 18th February 1901

READ—

Resolution by the Government of India Finance and Commerce Department No 2422Ex dated the 31st May 1897 and the rules appended thereto

Despatch from Her Majesty s Secretary of State for India No 201 (Financial) dated the 8th November 1900

RESOLUTION —Under Rule VII of the Rules issued with the Resolution quoted above, exchange compensation allowance is calculated with reference to the market rate of exchange, which is notified by the Comptroller and Auditor General for each quarter

2 As the market rate of exchange value of the rupee now varies little from 1*s* 4*d*, His Excellency the Governor General in Council is pleased to direct that the market rate of exchange for the calculation of this allowance shall, until further orders, be taken as 1*s* 4*d* per rupee, with effect from the 1st quarter of 1901 1902 The percentage on salary admissible at this rate is Rs 6 4 0 and the maximum monthly allowance Rs 138 14 3

NOTIFICATION

No 948M—The 7th March 1901—In exercise of the power conferred by section 17, sub section (1) of the Cantonments Act, 1889 (XIII of 1889), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of Bengal is pleased to impose a tax on holdings in the Cantonment of Darjeeling at 7 per cent. on the annual value of such holdings.

Darjeeling

E N BAKER,
Secy to the Govt of Bengal

NOTIFICATION

No 949M—The 7th March 1901—In exercise of the power conferred by section 17, sub section (2), of the Cantonments Act, 1889 (XIII of 1889), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of Bengal is pleased to apply, for the assessment and recovery of the tax on holdings imposed in the Cantonment of Darjeeling by Notification No 948M of this date, the following provisions of Part IV of the Bengal Municipal Act, III of 1884, in the adapted form herein set forth

Darjeeling

E N BAKER,
Secy to the Govt of Bengal

Cantonment Committee to determine the valuation of holdings
Section 96

1 The Cantonment Committee, after making such enquiries as may be necessary, shall determine the valuation of all holdings within the Cantonment as hereinafter provided

Duration of assessment
Section 97

2 Save as is herein otherwise provided, such valuation shall be valid for five years from the date on which it first takes effect in the Cantonment and until the beginning of the year next after the date on which a new valuation may be made, or until the valuation be revised and amended

Effect of alteration of percentage.
Section 97A

3 If within the period prescribed in the last preceding section the percentage on the valuation of holdings at which the rate is to be levied is altered by the Cantonment Committee under the provisions of rule 8, the amount of the rate and the amount of the quarterly instalments thereof payable in each case shall be altered accordingly in the rating list, but the Cantonment Committee shall not thereby be deemed to have made a new or revised assessment list

Buildings exempted from tax
Section 98

4 The rate on the value of holdings shall not be assessed or levied on any holding which is used exclusively as a place of public worship, or which is registered as a public burial or burning ground by the owner thereof in the office of the Cantonment Committee for which registry no fee shall be charged

Exemption of charitable holdings from assessment.

The Cantonment Committee at a meeting may, with the sanction of the Local Government, exempt from assessment any holding used for purposes of public charity

What returns may be required for ascertaining annual value
Section 99

5 The Cantonment Committee, in order to prepare the valuation list, may, whenever they think fit, by notice, require the owners or occupiers of all holdings to furnish them with returns of the rent or annual value thereof, and the Cantonment Committee, or any person authorised by them in writing in that behalf, at any time between sunrise and sunset, may enter, inspect, and measure any such holding after having given forty eight hours' previous notice of their intention to the occupier thereof

Provided that where an assessor is appointed, such assessor shall not be competent to authorise any other person to enter, inspect, and measure any such holding

Penalty for default in furnishing return
Section 100

6 Whoever refuses or fails to furnish any such return for the space of one week from the day on which he shall have been required to do so, or knowingly makes a false or incorrect return, shall be liable to a fine not exceeding twenty rupees, and to a further daily fine not exceeding five rupees for each day during which he shall omit to furnish a true and correct return, and whoever hinders, obstructs, or prevents any Member of the Cantonment Committee, or any person appointed by the Cantonment Committee, as aforesaid, from entering, or inspecting, or measuring any such holding shall be liable to a fine not exceeding two hundred rupees

Annual value of holding how to be ascertained.
Section 101.

7 The gross annual rent at which any holding may be reasonably expected to let shall be deemed to be the annual value thereof and such value shall accordingly be determined by the Cantonment Committee, and entered in the valuation list

Provided that, if there be on a holding any building or buildings, the actual cost of erection of which can be ascertained or estimated, the annual value of such holding shall, in no case, be deemed to exceed an amount which would be equal to seven and a-half per cent on such cost, in addition to a reasonable ground rent for the land comprised in the holding

Provided also that, where the actual cost so ascertained shall exceed one lakh of rupees, the percentage on the annual value to be levied in respect of so much of the cost as is in excess of one lakh of rupees shall not exceed one-fourth of the percentage determined by the Cantonment Committee under rule 8

Provided further that, in estimating the annual value of a holding under this section, the value of any machinery that may be on such holding shall not be taken into consideration.

Determination of rate of tax on holdings.
Section 102

8 The Cantonment Committee, at a meeting to be held before the close of the year next preceding the year to which the rate will apply, shall determine the percentage, not exceeding 7½ per cent, on the valuation of holdings at which the rate shall be levied, and the percentage so fixed shall remain in force until the order of the Cantonment Committee determining such percentage shall be rescinded, and until the Cantonment Committee at a meeting shall determine some other percentage on the valuation of holdings at which the rate will be levied from the beginning of the next year

Provided that the first rate may be levied from the beginning of the quarter next after that in which the percentage has been fixed by the Cantonment Committee at a meeting

Preparation of valuation and rating list
Section 103

9 As soon as possible after the percentage at which the rate is to be levied for the next year shall have been determined under the last preceding section, the Cantonment Committee shall cause to be prepared a valuation and rating list, which shall contain the following particulars, and any others which the Cantonment Committee may think proper to include —

(a) name of the street or road in which the holding is situated,
(b) number of the holding on the register,
(c) description of the holding
(d) annual value of the holding,
(e) name of owner,
(f) amount of rate payable for the year,
(g) amount of quarterly instalment,
(h) if the holding is exempted from assessment, a note to that effect

The rate upon holdings shall be payable in quarterly instalments by the owner of the holding

Power to assess upon house consolidated tax for house and land on which it stands
Section 104

10 If any house belongs to one owner, and the land on which it stands and any adjacent land which is usually occupied therewith belongs to another, the Cantonment Committee may value such house and land together, and may impose thereon one consolidated rate

The total amount of the rates shall be payable by the owner of the house who shall thereafter be entitled to deduct from the rent which he pays for the land such proportion of the rates so paid by him as is equal to the proportion which such rent bears to the annual value of the holding

If the owner of the house and the owner of the land do not agree in respect of the proportion of the rate so deducted by the owner of the house, the Cantonment Committee shall, on the application of either party, make an award declaring the amount payable by each, and such award shall be final

Tax due from non resident owner may be recovered from occupier and deducted by him from his rent.
Section 105

11 If the sum due from the owner of any holding remains unpaid after the notice of demand has been duly served, and such owner be not resident within the Cantonment, or the place of abode of such owner be unknown, the same may be recovered from the occupier for the time being of such holding, who may deduct, from the next and following payments of his rent, the amount which may be so paid by, or recovered from, him

Provided that no arrear of rate which has remained due from the owner of any holding for more than one year shall be so recovered from the occupier thereof

Power of Cantonment Committee in cases of excessive hardship
Section 106

12 Whenever, from the circumstances of the case, the levy of the rate on any holding in the Cantonment would be productive of excessive hardship to the person liable to pay the same, the Cantonment Committee at a meeting may reduce the amount payable on account of such holding, or may remit the same

Application for reduction of assessment
Section 107

13 If the value of any holding shall be diminished from any cause beyond the control of the owner thereof, the owner thereof may apply for reduction of the valuation of the same

Power to revise valuation and assessment
Section 108

14 The Cantonment Committee may, at any time after the publication of the notice required by rule 18, value and rate any holding which was, without authority, omitted from the valuation and rating list, or which has become liable to valuation and rating after the publication thereof, and may enhance the valuation and rating of any holding which may appear to have been insufficiently valued or rated through mistake, oversight, or fraud, and may re value and re-assess any holding the value of which has been increased by additions or alterations to any building thereon

Any rate imposed, or enhancement made, under this section shall take effect from the beginning of the quarter next following that in which the rate shall be imposed or enhancement made

Power to revise assessment list.
Section 109

15 The Cantonment Committee may, at any time, substitute, for any name mentioned in the valuation and rating list, the name of any person to whom any holding mentioned therein shall have been transferred.

Such person shall be liable to pay the rate payable on such holding from the first day of the quarter next after the date of the transfer

16. (1) When any holding has remained unoccupied and unproductive of rent throughout the year, or the period in respect of which any instalment is payable, the said tax or instalment for the said year or period, as the case may be, shall not be levied in respect of such holding

Remission or refund on account of vacant holdings.
Section 110 (modified)

(2) When any holding has not been occupied or productive of rent for any period of not less than thirty consecutive days, so much of the said tax or instalment as is proportionate to the number of days during which such holding has not been occupied or productive of rent, shall not be levied in respect of such holding

(3) No relief under these rules shall be granted, unless notice in writing of the circumstances under which it is claimed has been given to the Cantonment Committee within the first fourteen days of the period in respect of which it is so claimed

(4) The burden of proving the facts entitling any person to claim relief under these rules shall lie upon him

(5) For the purpose of these rules—

(a) neither the presence of the care taker nor the mere retention in an otherwise unoccupied dwelling house of the furniture habitually used in it shall constitute occupation of the house, and

(b) a holding shall be deemed to be productive of rent if let to a tenant who has a continuing right of occupation thereof, whether it is actually occupied by such tenant or not

17 Whoever, being the owner of any holding for which a remission or refund of the rate has been made under the last preceding section, fails to give notice of the re occupation of such holding within ten days of such re occupation, shall be liable to a fine not exceeding three times the amount of rate payable quarterly on such holding

Penalty
Section 111

18 When the valuation and rating list of the rate on the annual value of holdings shall have been prepared or revised, the President shall sign the same, and shall cause it to be deposited in the office of the Cantonment Committee, and shall cause the notice in Form A of the First Schedule to be published, as far as possible, in the manner prescribed by section 354* of the Bengal Municipal Act, 1884

Publication of notice of assessments
Section 112

19 Any person who is dissatisfied with the amount assessed upon him, or with the valuation or rating of any holding, or who disputes his occupation of any holding, or his liability to be assessed or rated, may apply to the Cantonment Committee to review the amount of valuation or rating, or to exempt him from the rate

Application for review
Section 113

20 Every application presented under the last preceding section shall be heard and determined by not less than three members of the Cantonment Committee, who shall be appointed in that behalf by the Committee at a meeting The members so appointed, after taking such evidence and making such enquiries as they may deem necessary, may pass such order as they shall think fit in respect of such application

Procedure upon review
Section 114

The decision of such members or of a majority thereof, in such cases shall be final

21 Unless good cause shall be shown to the satisfaction of such Cantonment Committee for extending the time allowed, no such application shall be received after the expiration of one month from the date of publication of the notice required by rule 18 relating to the list containing the valuation or rating in respect of which the application is made, or after the expiration of fifteen days from the date of service of the first notice of demand for payment at the rate in respect of which the application is made, whichever period shall last expire

Limitation of time for application of review
Section 115

Assessment to be questioned only under these rules
Section 116

22 No objection shall be taken to any rating in any other manner than is provided for in these rules

23 By notification to be posted up in their office, the Cantonment Committee shall declare at what hours of each day (not being a Sunday or other recognised holiday) the office shall be open for the receipt of money and the transaction of business

Office hours for payment of taxes
Section 117

24 The amount due by any person on account of the rate on holdings, shall be deemed to be the amount entered in the lists, the notice relating to which is published under rule 18, unless the amount entered in such lists is subsequently altered by the Cantonment Committee as provided in these rules, in which case the amount to which the rating is so altered shall be deemed to be the amount due

Tax payable in advance
Section 118

---

* Section 354 Every bye law, order notice or other document directed to be published under this Act shall be written in or translated into the vernacular of the district and deposited in the office of the Commissioners and a copy shall be posted up in a conspicuous position at such office, and in such other public places as the Commissioners may direct

And a public proclamation shall be made throughout such municipality, by beat of drum notifying that such copy has been so posted up, and that the original is open to inspection in the office of the Commissioners.

Every instalment of such rate shall be deemed to be due on the first day of the quarter in respect of which such instalment is payable

25 For all sums paid on account of the tax a receipt, stating the amount and the rate on account of which it is paid, shall be given, signed by the tax collector, or by some other officer authorised by the Cantonment Committee to grant such receipts

Receipts to be given
Section 119

26 At any time within six months after any sum has become due on account of any tax or rate, the Cantonment Committee shall cause to be presented to the person liable to the payment thereof a bill for the said sum which shall contain a statement of the period and of the rate on account of which the charge is made

Bill and notice of demand to be presented
Section 120

If the amount mentioned in such bill be not paid on presentation thereof, a notice of demand, in the form marked A in the Second Schedule, with copy of the bill appended thereto, shall be served on the person liable to pay the same, and such notice of demand may be served at any subsequent time

Provided that no charge shall be made in respect of the service of such notice

Such notice shall be signed by the President or an officer authorised in that behalf, and shall be served by the person authorised to receive payment

27 If any person, after service upon him of such bill and notice shall not, within fifteen days of the service of such notice, or from the date of any order made on an application for review under rule 20, pay the sum due, either to the Cantonment Committee at their office or to some person authorised by them to receive the money, or show to the Cantonment Committee sufficient cause for not paying the same, the amount of the arrear due, with costs on the scale shown in the table of fees marked B in the Second Schedule, may, at any time within three months after the date of service of the said notice, or of the order made on an application for review as aforesaid, be levied by distress and sale of any moveable property belonging to the defaulter, except ploughs, plough-cattle, tools, or implements of agriculture or trade, wherever found, or of any moveable property belonging to any other person, subject to the same exceptions, which may be found within the holding in respect of which such defaulter is liable to such rate

If not paid in fifteen days, process of distress may issue
Section 121

Provided that when the holding in respect of which the default is committed is a place of business and the moveable property distrained is shown to the satisfaction of the Cantonment Committee to have been left there for repairs or safe custody in the ordinary course of business it shall be released

Provided also that if the said property or any part thereof, belong to any person other than the defaulter, the defaulter shall be liable to indemnify the owner thereof for any damage he may sustain by reason of such distress, or by reason of any payment he may make to avoid such distress or any sale under the same

28 Every warrant of distress and sale under the last preceding section shall be issued by the Cantonment Committee and shall be in the form marked C in the Second Schedule

Distress how to be made
Section 122

Distress shall be made by actual seizure of moveable property and the officer charged with the execution of the warrant shall be responsible for the due custody thereof

Such officer shall make an inventory of all moveable property seized under the warrant, and shall give not less than ten days previous notice of the sale and of the time and place thereof, by beat of drum, in the Cantonment and by serving on the defaulter a notice in the form marked D in the Second Schedule

Provided that, if the property is of a perishable nature, it may be sold at once with the consent of the defaulter, or without such consent at any time after the expiry of six hours from the seizure

29 The officer charged with the execution of the warrant may, under the special order of the Cantonment Committee between sunrise and sunset, break open any outer or inner door or window of a house, in order to make the distress, if he has reasonable ground for believing that such house contains any moveable property belonging to the defaulter, and if, after notification of his authority and purpose and demand of admittance duly made, he cannot otherwise obtain admittance

Officer may break open door
Section 123

Provided that he shall not enter or break open the door of any room appropriated for the zanana, or residence of women, which by the usage of the country, is considered private, except after three hours' notice and opportunity given for the retirement of the woman

30 If the sum due be not paid with costs before the time fixed for the sale, or the warrant be not discharged or suspended by the Cantonment Committee the moveable property seized shall be sold by auction at the time and place specified, in the most public manner possible, and the proceeds shall be applied in discharge of the arrears and costs.

Sale how to be conducted
Section 124

The surplus sale proceeds (if any) shall be credited to the Cantonment Fund, and may be paid on demand to any person who establishes his right to the satisfaction of the Cantonment Committee or in a Court of competent jurisdiction

Return of sales.

The tax collector, or other officer authorised in that behalf, shall make a return of all such sales to the Cantonment Committee in the form marked E in the Second Schedule.

Certain persons prohibited from purchasing at sales
Section 125

31 All officers and servants of the Cantonment Committee and all chaukidars, constables and other officers of police are prohibited from purchasing any property at any such sale

Penalty

Whoever, not being a public servant within the meaning of section 21 of the Indian Penal Code, contravenes the provisions of this rule shall be punished with simple imprisonment for a term which may extend to two months, or with fine, or with both

Cantonment Committee to keep account of distress and sales
Section 126

32 The Cantonment Committee shall cause a regular account to be kept of all distresses levied, and sales made, for the recovery of taxes under these rules

Sale of property beyond limits of Cantonment
Section 127

33 If no sufficient moveable property belonging to a defaulter, or being upon the premises in respect of which he is rated, can be found within the Cantonment, the Deputy Commissioner of Darjeeling, or any other Magistrate having jurisdiction over the Cantonment may, on the application of the Cantonment Committee, issue his warrant to any officer of his Court for the distress and sale of any moveable property or effects belonging to the defaulter within any other part of the jurisdiction of the Magistrate, or for the distress and sale of any moveable property belonging to the defaulter within the jurisdiction of any other Magistrate exercising jurisdiction within the territories administered by the Lieutenant Governor of Bengal, and such other Magistrate shall endorse the warrant so issued, and cause it to be executed, and the amount, if levied, to be remitted to the Magistrate issuing the warrant, who shall remit the same to the Cantonment Committee

Distress or sale not unlawful for want of form
Section 128

34 No distress or sale made under these rules shall be deemed unlawful, nor shall any party making the same be deemed a trespasser on account of any error defect, or want of form in the bill, notice, summons, warrant of distress, inventory or other proceeding relating thereto

Commissioners may bring suit instead of distraining or on failure of distress
Section 129

35 Instead of proceeding by distress and sale, or in case of failure to realise thereby the whole or any part of any tax, the Cantonment Committee may sue the person liable to pay the same in any Court of competent jurisdiction

Irrecoverable taxes
Section 130

36 The Cantonment Committee may order to be struck off the books the amount of any tax which may appear to them to be irrecoverable

Powers of President.
Section 44.

37 The President of the Cantonment Committee shall for the transaction of business under these rules exercise all powers vested in the Cantonment Committee, but not any power directed to be exercised by the Cantonment Committee at a meeting

---

THE FIRST SCHEDULE

FORM A

CANTONMENT OF

Whereas a valuation and rating list of the rate on the annual value of holdings has been deposited in the office of the Cantonment Committee as required by rule 18 of the rules for the assessment and recovery of the rate

Notice is hereby given that the said list is open to the inspection of all persons desiring to inspect the same at the office of the said Cantonment Committee during office hours on any day not being a close holiday, and that the several owners of the holdings included therein are hereby required to pay the quarterly instalments set opposite to their names with regularity at the office appointed by the Cantonment Committee for the receipt of the same, or to the tax collector or other officer authorised to receive payment, the first payment to be made on the first day of (   ) and every subsequent payment on or before the first day of (   ), the first day of (   ), and the first day of (   ), and in default thereof, any arrear that may be due will be realised by distress and sale of the moveable property belonging to the defaulter, or which may be found on the holding in respect of which the valuation is made, and by such other proceedings as are allowed by law

Dated this day of

A. B.,
President of the Cantonment Committee

THE SECOND SCHEDULE.

FORM A.

Notice of Demand

To

CANTONMENT OF

Take notice that the sum of Rs   , being the amount due from you, as shown in the accompanying bill, is hereby demanded from you, and that if you do not, within fifteen days,

pay the same to an officer authorised to receive payment, or into the office of the Cantonment Committee, the amount together with costs will be levied by distress and sale of your goods and chattels, or otherwise as provided by law

A B,

President of the Cantonment Committee

[The following note will be added at the foot of the above notice in those cases only in which the notice is to be addressed to a person who has not already paid one instalment of the tax at the rate at which the demand is made]

Note —If you have any objection to make against this demand you may, instead of paying the amount which is hereby demanded, present a petition to the Cantonment Committee [illegible] (or stated). Such petition must be presented within fifteen days of the service of this notice, otherwise it will not be received. If you present such petition no amount will be levied from you until the Cantonment Committee shall have passed an order on your petition [illegible] the amount due by you with such costs as the Committee may direct will be levied unless it has been previously paid

FORM B

Table of Fees payable upon Distraint

Sums distrained for				Fee	
				Rs	A
Under 1 rupee				0	4
1 and under		5	rupees	0	8
5	"	10	"	1	0
10	"	15	"	1	8
15	"	20	"	2	0
20	"	25	"	2	8
25	"	30	"	3	0
30	"	35	"	3	8
35	"	40	"	4	0
40	"	45	"	4	8
45	"	50	"	5	0
50	"	60	"	6	0
60	"	80	"	7	8
80	"	100	"	9	0
Above 100 rupees				10	0

The above charge includes all expenses, including the service of notice of demand, except when peons are kept in charge of property distrained in which case three annas must be paid daily for each man. If the amount demanded be paid or the warrant discharged before the sale is held so that no sale is necessary, one fourth of the fees specified in the above table shall be remitted

---

FORM C

Distress Warrant

To (here insert the name of the officer charged with the execution of the warrant)

Whereas of has not paid or shown sufficient cause for the non payment of the sum of rupees due for taxes mentioned in the margin, although the said sum has been duly demanded in writing from the said and fifteen days have elapsed since the service of the notice of demand. This is to require you to distrain the moveable property of the said wherever it may be found within the Cantonment, except ploughs, plough cattle tools or implements of trade or agriculture or any other moveable property, subject to the same exceptions which may be found within the holding specified in the margin to the amount of the said sum of and the further sum of to defray the charges of taking, keeping, and selling such property, and if within ten days next after such distress the said sum of shall not be paid, to sell the said property, and having paid and deducted out of the proceeds of the sale the said sum of and the charges of taking keeping and selling such property, to return the surplus (if any) on demand to the person whom you shall have found in possession of the said property, and if no demand be made, to pay the same to the Cantonment Committee. If distress cannot be made of sufficient property of the said , you are to certify the same to us in returning this warrant

A B,

President of the Cantonment Committee

FORM D

,,	151	,,	200	8	0	,, ,,
,,	201	,,	250	9	8	,, ,,
,,	251	,,	300	11	0	,, ,,
,,	301	,,	400	13	0	,, ,,
,,	401	,,	500	15	0	,, ,,
,,	501	,,	600	17	0	,, ,,
,,	601	and upwards		3 per cent on annual value.		

(2) At one anna per head per mensem on people living in the Commissariat Department and Military Works Department Lines.

E N BAKER,
Secy to the Govt of Bengal.

NOTIFICATION.

No 951M—The 7th March 1901—In exercise of the power conferred by section 17, sub-section (*2*), of the Cantonments Act, 1889 (XIII of 1889), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of Bengal is pleased to apply for the assess-

Darjeeling

Notification No 950M of this date, the following provisions of Part IX of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), in the adapted form hereinafter set forth —

1 (1) The scavenging tax shall be payab'e in quarterly instalments by the occupier for the time being of the holding, or by the owner thereof as the Cantonment Committee may direct, and shall be recoverable in the manner prescribed for the recovery of the rate on the value of holdings in the Bengal Municipal Act, 1881

Recovery [Bengal Act III of 1884, s. 322.]

(2) Every instalment of the said tax shall be deemed to be due on the first day of the quarter in respect of which it is payable

(3) The net proceeds of the said tax, after deducting a proportionate share (to be fixed by the Cantonment Committee in meeting) of the cost of the staff employed in collecting, and in supervising the collection of the fees and in keeping and auditing the accounts thereof shall be applied to the maintenance of the conservancy establishment

(4) A list of the persons liable to pay the said tax shall be prepared, and a copy shall be posted up once a year in a conspicuous position at the office of the Cantonment Committee and in such other places as the Cantonment Committee may direct, and a public proclamation shall be made throughout the Cantonment by beat of drum notifying that such copy has been so posted up and that the original is open to inspection in such office

Provided that no such tax shall be levied in respect of any shop or place of business which does not contain any privies or cess pools, if the tax is levied from the occupier thereof in respect of his dwelling house within the Cantonment

2 Where the tax is levied by the Cantonment Committee from the owner of a holding, the owner may recover it from the occupier (if any), or where there are more than one person occupying the holding in severalty, may recover from each occupier such sum as shall bear to the entire amount of the tax so levied the same proportion as the value of the part of the holding in the occupation of such person bears to the entire value of the holding

In certain cases fee may be levied from owner who may recover from occupier [Bengal Act III of 1884 s. 323]

3 Every owner who, under the provisions of the last foregoing section, is entitled to recover any sum from the occupier of any part of a holding shall have for the recovery of the said sum all such and the same remedies, powers, rights, and authorities as if such sum were rent payable to him by the occupier in respect of such portion of the holding as may be in his occupation

Owner may recover fees from occupier as rent [Bengal Act III of 1884, s 324]

4 The Cantonment Committee at their discretion may compound, for any period not exceeding one year, with any occupier or owner as aforesaid of any railway premises or of any premises used as a factory, dockyard, workshop, cooly depot, school, hospital, market, court house or other similar place for a certain sum to be paid by such occupier or owner in lieu of the said tax

Cantonment Committee may compound with occupier or owner of certain premises for fee [Bengal Act III of 1884 s 325]

W A MARR Covenanted Deputy Collector in charge for Collector on tour

Midnapore Collectorate Arrear Collection Department the 15th February 1901

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estates situate in the district of Shahabad will be put up to sale at the Shahabad Collectorate, Arrah, on Monday the 25th March 1901 corresponding with 20th Chait 1308 Fasli

The purchasers will be subject to the following conditions of sale —

Conditions of Sale

1st —The estates to be sold to the highest bidders above the upset price which will be fixed by the Collector at the time of sale The purchasers of those estates will be considered as the proprietors of the estates and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity

2nd—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd—If the amount of purchase money do not exceed Rs 100 the whole amount to be paid down at once

4th—If the amount of purchase money exceed Rs 100 one fourth of the amount bid to be immediately deposited If the balance be not paid by noon of the fifteenth day after the sale reckoning the date of sale as one or if that day be a close holiday then by noon of the first succeeding office day the sale is to be cancelled (the sum deposited being forfeited to Government) and the estates to be again put up to sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale

The present rent of each estate will be fixed in perpetuity as the revenue the upset price will be twice the amount of this rent

Port Phillip Steam Pilot vessel established

THE British Admiralty has given notice (No 70 of 1901) that on and after 1st January 1901, the sailing vessels employed in the pilot service off Port Phillip heads would be replaced by a steam vessel The steam pilot vessel will have the same characteristics and observe the same regulations as those given for sailing pilot vessels in Australia Directory, Vol I, 1897, page 430, with the following exceptions —

a When under way, with pilots on board from sunset to sunrise, the pilot vessel will carry the usual side lights for steam vessels, but in addition a white light, at the masthead, and at a distance of 8 feet below it, a red light, both visible in all directions from a distance in clear weather of at least 2 miles

b When at anchor with pilots on board, the steam pilot vessel will carry the above lights, with the exception of the side lights

c When not engaged on pilotage duties, the pilot vessel will carry the same lights, as an ordinary steam vessel

When the steam pilot vessel leaves the cruising ground for coaling or provisioning, etc, a fore and aft schooner will do duty but in the event of the steam vessel being absent for a longer period than 18 hours, a suitable steam vessel will be substituted (*Notice No 70 of* 1901)

RESOLUTION OF THE FINAL REPORT ON THE SURVEY SETTLEMENT OF THE CHAKLA ROSHNABAD ESTATE

REVENUE DEPARTMENT—LAND REVENUE

Calcutta, the 5th March 1901

RESOLUTION—No 1368

READ—

Mr J G Cumming's Final Report on the Survey and Settlement of the Chakla Roshnabad Estate in the districts of Tippera and Noakhali

Read also—

The Director of the Department of Land Records and Agriculture, Bengal's, letter No 115 L R S, dated the 15th May 1900, to the Board of Revenue, Lower Provinces, reviewing the above report, and the Board's letter No 766A, dated the 27th June 1900, submitting it to Government

Preliminary

CHAKLA ROSHNABAD, the estate of the Raja of Hill Tippera, is composed of four compact blocks, of which the northern one lies in Sylhet, the two middle ones in Tippera, and the southern one in Noakhali Excluding the Sylhet portion, the area which was settled is made up of a tract 5 to 15 miles broad, bordering Hill Tippera for about 80 miles The areas of the latter three blocks, which naturally form administrative divisions, are 205, 221, and 129 square miles, respectively

Early history

2 This report contains a brief enquiry into the early history of the estate, which in its origin was the level (and therefore fertile) portion of the State of Hill Tippera. It came into the final possession of the Muhammadans about 1739 The conquerors, though they maintained their sovereign authority over the entire State, never troubled themselves about the hill country, and were content to assess to revenue the adjoining plains—a practice which was followed by the British on their acquisition of the Raja's territories in 1761 At the time of the Permanent Settlement, the settlement was made with the Raja for the plains only, at an aggregate annual revenue of Rs 1,39,676 *sicca* The hill tracts are independent, and subject to mere political control

Physical condition

3 The estate is described as presenting the appearance of a vast rice producing plain, dotted with villages The soil is of alluvial origin, being composed of clay and sand in varying proportions Of the 508 square miles of land comprised within the estate, about 400 square miles are cultivated, 40 are culturable waste, and the rest is made up of unculturable lands and water Rice covers four-fifths of the cultivated area, and the other crops occupy comparatively insignificant areas, namely,—jute, 8 000 acres, chillies, 6,700 acres, mustard, 4,750 acres and sugarcane, 2,300 acres Irrigation is only occasionally resorted to by the cultivators, and is never looked upon as an essential part of the system of agriculture A striking feature of the estate is the absence of wells and the existence of an unusually large number of tanks Out of 6,398 tanks, covering 15,671 acres, or 3 42 per cent of the whole area of the estate recorded at the time of the survey operations, only 3,155 contain whole some water and only 4,208 are perennial The attention of the Raj will be drawn to the desirability of re excavating those which have deteriorated as sources of drinking water, or have otherwise ceased to be of use The recom mendations of the Settlement Officer for improving communications also deserve the consideration of the local authorities

Population

4 The population of the estate in 1891 was about 467,000, or 837 per square mile and 1,167 per cultivated square mile This dense population, in which the Muhammadan greatly outnumbers the Hindu element, is supported almost entirely by agriculture The only other industries are of the ordinary village kind, directed to the supply of the local demand for pots, brass utensils, jewellery, &c The extraordinary fertility of the soil is proved by the fact that the cultivators can afford to hire labour for the ordinary agricultural operations from other districts, and yet continue to raise their standard of comfort The Lieutenant Governor has read with regret the Settlement Officer's remarks about the cattle of the cultivators, but the matter is one in which improvement cannot be expected till the raiyats cease to use cows for ploughing and recognise the necessity of growing fodder crops It is disappointing to find that habits of thrift are so uncommon, but professional money lenders are practically unknown, and the Settlement Officer reports the standard of comfort to have generally and substantially risen Education is in a most backward condition, as is usually the case among the Muhammadans of Eastern Bengal, and the Lieutenant Governor trusts that more will be done by the Raja to foster it

Survey

5 The survey and *khanapuri* were carried out, under the joint super vision of the Director of the Department of Land Records and Agriculture, Bengal, and the Superin tendent of Provincial Surveys, Bengal, by Mr McHatton, of the Survey of India Department, who was vested with the powers of an Assistant Superin tendent of Survey under the Bengal Survey Act The entire survey settlement operations lasted for a little over seven years from the commencement of the traverse survey in April 1892 to the final publication of the record of-rights in June 1899 In consideration of the area of the estate and the number of tenancies which had to be dealt with, the time occupied by the operations was excessive, but the slow progress was due to causes which were beyond the control of the Survey and Settlement Departments The Raj emphasised the difficulty of following up the work, if a larger staff of officers were to be appointed and more

rapid progress attempted, the litigation between the Raj and its tenants for the settlement of fair rents was of an unusually prolonged and extensive character; and there was excessive delay before the orders of the Appellate Courts were announced in connection with the earlier decisions of the Revenue Officers

6 Moreover, the repeated changes of the officers in charge of the settlement tended not only to retard progress, but inevitably affected the character of the earlier work Mr J G Cumming, C.S, joined in October 1894, when the survey and *khanapuri* work had been completed, and the previous inadequate inspection increased his difficulties very appreciably However, there is every reason to believe that the record-of rights, as it finally passed from his hands, will compare very favourably with those made in other tracts

Demarcation of village boundaries and boundary disputes

7 The demarcation of village boundaries, which, under the order of Government, had to be carried out on the basis of the revenue survey maps, was attended with great difficulties, inasmuch as there was found to be no practical correspondence between the revenue survey village of the Collector's *mauzawar* register and the villages represented by the *malik's jamabandis* The final course adopted was to prepare the cadastral maps according to the latter basis, and to show the boundaries of the revenue survey villages by means of red lines on those maps On the proposal of the Director of Land Records to bring the Collector's registers into conformity with the survey records the Board have called for a special report from the Commissioner of Chittagong Attestation too was not unattended with grave difficulties and the Settlement Officer has drawn a lamentable picture of the dishonesty and fraud which were disclosed in this settlement, due largely to the evil effects of the *izara* system which the Lieutenant Governor is glad to see is being rapidly abandoned

8 The total number of villages surveyed was 1 511 and the total area extracted by the Survey Department was 357,529 acres Deducting from this area 2,063 acres, the area of the Saidabad and other zamindaries, the net area of the Chakla Roshanabad estate actually brought under settlement was 355,467 acres, in nearly 9 lakhs of plots, which was thus distributed among the proprietor and the various classes of tenure holders, &c —

Class of Landlord	Northern Division	Central Division	Southern Division	Total	Percentage
1	2	3	4	5	6
Held by Government	1 096	1,623	335	3,054	0 9
Held directly by the Raj	18,599	80,481	62,288	161,368	45 4
Held by tenure holders at fixed rents	15,220	20,482	510	36,212	10 2
Held by tenure holders at rents liable to enhancement	89,863	28,747	14,694	133,304	37 5
Held by rent free tenure-holders	8,036	8,488	5,005	21,529	6 0

Land tenure

9 The Settlement Officer has distinguished no less than 17 different classes of rent paying tenures and temporary leases in the estate He found that 403 are held at fixed and 2,614 at variable rents The prevailing tendency of these tenures is towards subdivision, and not sub infeudation, as in the neighbouring districts of Backergunge and Noakhali, and this is explained by the Director of Land Records as due to the comparatively early agricultural development of the estate, and its consequent present unsuitability for the operations of land speculators, which depend for their success on rapidly-increasing values

10 Of the total area of the estate, about 1,063 acres, comprising 190 holdings, are held by raiyats at fixed rents, 270,361 acres, comprising 79,700 holdings, by settled and occupancy raiyats, 1,959 acres, comprising 2,614

holdings, by non occupancy raiyats, and 4,675 acres, comprising 7,603 holdings, by under raiyats The figures show that by far the largest proportion of the tenancies is held by the occupancy raiyats, amounting to 89 per cent of the whole in the central division and 70 per cent in the other two divisions Only 2 per cent of the tenancies are in the possession of the non occupancy raiyats Theoretically the custom of transferring occupancy rights does not exist in the estate, though in practice such transfers are occasionally made by the raiyats with the consent of the proprietor on payment of a fee to him, calculated at 12 per cent of the purchase money of the holding transferred Little has been said in the report about the condition of the under raiyats and labourers, but apparently the omission is due to the smallness of their numbers Information, however, about the former class would have been interesting It is observed that in the south, where labour is more abundant, the difference between occupancy rents and those paid by under raiyats is most marked, the latter being nearly 50 per cent more than the former A common feature in the whole tract is that the average rental per cultivated acre is much lower in the case of non occupancy than in that of settled raiyats The remarkable preponderance of occupancy raiyats is, as the Director of Land Records observes, a matter for congratulation, and the rights are on an average worth Rs 57 per acre, which is nearly the same as in Muzaffarpur

11 The following table shows the average rates of rent paid by the different classes of raiyats —

Divisions.	Raiyats at fixed rates		Settled and Occupancy raiyats		Non occupancy raiyats		Under-raiyats.	
	Average rent per acre of holding	Incidence of rent per cultivated acre of holding	Average rent per acre of holding	Incidence of rent per cultivated acre of holding	Average rent per acre of holding	Incidence of rent per cultivated acre of holding	Average rent per acre of holding	Incidence of rent per cultivated acre of holding
1	2	3	4	5	6	7	8	9
	Rs A P	Rs A P	Rs A P	Rs A P	Rs A P	Rs A P	Rs A P	Rs A P
Northern Division	0 15 2	2 1 3	3 5 4	4 1 7	2 1 2	3 4 0	3 3 8	4 4 3
Central Division	1 13 0	2 3 7	3 4 10	3 11 2	1 11 9	2 6 0	3 15 11	4 12 6
Southern Division	1 12 6	2 2 0	3 10 4	4 4 8	0 10 8	1 4 2	5 3 3	6 6 4

The average area of the lands held by a raiyat is believed to be about 3¼ acres, as a raiyat very often holds more than one tenancy or holding, and his net income therefrom is estimated at Rs 133 6 a year

12 The following table compares the gross annual renting value of the estate and the gross rental payable to the Raj before and after the settlement operations —

The financial results of the operations

Holdings	Assets			Rental		
	For area held by raiyats	Assumed rental of the *khas* cultivations of tenure holders	Total	For areas held directly by the Raj	For areas settled with tenure-holders	Total
1	2	3	4	5	6	7
	Rs	Rs	Rs	Rs	Rs	Rs
Before settlement	8,63,233	49,067	9,12,300	4 89,457	94,732	5,84,189
After settlement	9,23,248	49,067	9,72,315	5,48 769	1,27,079	6,75,848
Net increase	60,015		60,015	59,312	32,347	91,659
Percentage of increase	7		7	12	34	15 69

13 The settlement of rents was a work of very great difficulty In the first place, in most of the tenures the cultivated area had increased since the contract by which the existing rent was fixed, but owing to the diverse views of the special Judges, increase of area could not be taken generally as a ground of enhancement Secondly, the number of fair rent cases instituted by the Raj reached the great total of 1,288 raiyati cases, involving 29,004 tenancies and 1,560 tenure cases Compromises were almost unknown, and appeals were indulged in as a matter of course, and the litigious tendencies of the prosperous tenancy were gratified to satiety The officers did their work with commendable care, for less than 1 per cent of their decisions were reversed and only 16 3 per cent were modified in appeal

Case work

14 The increase of rent in the raiyati tenancies, which were the subjects of suits, averaged 21 per cent It is not clear how much of this was due to excess area It would seem that the bulk of the increase was based on the rise in prices, though the full amount legally allowable under this ground for enhancement was not taken

Rental

In the case of taluks the rental has been increased by Rs 32,347, almost the whole of which has fallen on the holders of the ordinary taluks, whose rental has been increased from Rs 41,323 to Rs 69,886, *i e*, by Rs 28,563, or by 69 1 per cent It was found during the settlement operations that the holders of these taluks were paying on an average 25 per cent of the assets as rent In the kabuliyats given by them occurred the words "das hissa," and much litigation took place as to the meaning that should be attached to these words On behalf of the Raj it was contended that the phrase meant that the talukdars were entitled to the collection expenses *plus* 10 per cent of the profits and the Raj to the rest The talukdars contended that the phrase meant their right to have $\frac{10}{16}$ths, or 62 per cent of the profits There can be little doubt that in theory the Raj was in the right, and this was the view taken not only by the Settlement Officer, but by the Civil Court in a case brought before it At the same time the theory had never been brought into practice From the first, the share of the profits enjoyed by the talukdar was in all cases very much larger, and the Settlement Officer made an adjustment, which seems to have been very fair to all parties, when he decided upon taking 50 per cent of the assets as a general standard for the settlement of the talukdar's rents The same standard was independently taken by the Civil Court, when a case came before it for distribution between the Raj and its talukdar of compensation for the acquisition of railway land

But the rise was severe, 69 per cent on the former rent, and as the report was silent on the matter, the Lieutenant Governor considered it necessary to enquire whether any measures had been taken to mitigate the suddenness of the enhancement He is pleased to find that this has been done The cases of enhancement numbered 1,212 In 435 cases the new rent was introduced by a progressive enhancement, spread over two to five years, in 19 cases the enhancement was postponed from two to three years, and in 49 cases, where the rise was exceptionally large, it was spread over three to nine years, partly by entire postponement, partly by a graduated introduction of the enhancement These adjustments were made with the careful attention to detail, which has characterized this settlement No complaints have been made, and the Lieutenant Governor is satisfied that the Settlement Officer's action in the matter was fair to both parties in the controversy and carried out with full consideration to prevent hardship

15 The total cost of the operations amounted to Rs 5,28,002 This sum, distributed over an area of 355,467 acres, actually surveyed and settled, gives a cost rate of Re 1-8 per acre, approximately, or three times as much as the standard rate of 8 annas an acre After deducting, however, from the total cost the sums noted on the margin, for which due credits are to be given to the Raj and its tenants, the net cost stands at Rs 4,73,072, or, approximately, Re 1-6 per acre Many causes have contributed to bring about this high incidence

Cost

	Rs
Traverse surveys	13,979
Court-fees	37,865
Miscellaneous receipts	3,086
Total	54,930

of cost—the slow progress made in the writing of the record and in the attestation of the same, due partly to the wish of the proprietor and partly to the inherent difficulties of the work, such as the large number of disputes as to tanks and rent free lands, the slow progress in the settlement of rents, due partly to the absence of compromise and the mass of litigation involved, and partly to the expenditure of time which the formalities of the Civil Procedure Code necessitated The absence of compromise was, to a great extent, caused by the uncertainty as to the final views of the Appellate Courts, as well as to the position taken up by the tenantry The Lieutenant Governor, therefore, is of opinion that though the cost was high, there were good reasons for it

Settlement Officer's suggestions for improvements &c to be carried out in the Raj estates

16 Mr Cumming's suggestions for the improvement of the present system of management of the estate deserve the consideration of the Raja, and in particular that proposing a change in the present system of collecting rents in seven *lists* which appears not only to be excessively troublesome, but also disadvantageous to every one concerned Enquiries will be made by the Political Department as to the action taken by the Raj with regard to the adjustment of the rents of the raiyats who have not as yet obtained remissions on account of the lands which have been taken from them for the railway The Settlement Officer's remarks as to what is happening, owing to the Railway Company not having completed the erection of permanent boundary marks, will be duly communicated to the latter His Honour endorses the Board's recommendation of Mr Cumming's suggestions for the maintenance of the settlement records of the estate, which appear to be very simple and inexpensive Sir John Woodburn is glad to notice that the magisterial staff of Comilla and Feni have already begun to utilise the settlement records in the disposal of criminal cases, which, so far as the Sadar subdivision of the district of Tippera is concerned, are reported to have considerably diminished in number It is doubtful, however, whether their legal and practical value is thoroughly appreciated in all the Subordinate Civil Courts The Commissioner of the Chittagong Division is desired to make early enquiries into, and report, the circumstances which have led to their comparative neglect by the magisterial staff of Brahmanbaria

Conclusion

17 This arduous settlement received close attention in its earlier stages from Colonel Sandeman, the late Director of Bengal Surveys, and throughout from the two Directors of the Department of Land Records, Mr W C Macpherson and Mr P C Lyon The immediate organisation and control has fallen on Mr J G Cumming, who has throughout earned the warmest praise from his superior officers, and has completed a successful survey in the face of great difficulties His final report is a complete account of the agrarian and social state of a most interesting part of the province The Lieutenant Governor records with pleasure his appreciation of the excellent work done by Mr Cumming The praise given to his subordinates will be noted in the Appointment Department

ORDER—Ordered that the Resolution be published in the *Calcutta Gazette* and copies of it forwarded to the Board of Revenue, Lower Provinces, to the Commissioner of the Chittagong Division, and to the Political and the Appointment Departments of this Government

By order of the Lieutenant Governor of Bengal,

F A SLACKE,

Secretary to the Govt of Bengal

WEATHER AND CROP REPORT

For the week ending the 11th March 1901

Burdwan.—Rainfall at Katwa 0 25 Weather seasonable Pressing of sugarcane continues. *Rabi* doing well. Fodder and water sufficient. Common rice sells as follows —

	Srs	
Sadar	12½	per rupee
Kalna	10½	
Katwa	12⅝	
Raniganj	12	

Birbhum—Rainfall at Sadar 50, Rampur Hât 0 52 Weather cloudy Pressing of sugarcane continues Harvesting of *rabi* crops commenced Price of rice at Sadar 12 seers and at Rampur Hât 13½ seers per rupee Fodder sufficient

Bankura—Rainfall at Bankura 02, Vishnupur 02 Weather occasionally cloudy Pressing of sugarcane going on Harvesting of *rabi* continues Sporadic cases of cow pox reported Water sufficient Fodder dear Price of common rice at Bankura 11 seers 14 chitaks and at Vishnupur 12 seers per rupee

Midnapore—Rainfall at Sadar 1 18, Contai 0 13 Sugarcane being pressed. Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Contai	13	
Tamluk	11	
Ghatal	12	

Hooghly—Rainfall at Sadar nil, Serampore 19, Arambagh nil. Sugarcane pressing continues. Prospect of standing crop favourable Common rice sells at 10 seers 7 chitaks per rupee

Howrah—No rain Weather seasonable *Boro* doing well Fodder and water sufficient Common rice sells at 10 seers per rupee

24 Parganas—Rainfall at Sadar nil, Barasat 16, Basirhat nil, Diamond Harbour nil. Weather seasonable Harvesting of *rabi* crops going on briskly Transplantation of *boro* in Barasat subdivision is in progress Cattle-disease reported from thana Baduria in Basirhat subdivision Fodder and water sufficient Common rice sells as follows —

	Srs	Ch	
Sadar	10	5	per rupee
Barasat	10	0	
Basirhat	10	0	
Diamond Harbour	10	8	

Nadia.—Rainfall at Sadar 0 15, Kushtia 0 98, Meherpur 0 01, Chuadanga 0 14 Weather seasonable *Rabi* still being harvested Prospects indifferent Fodder and water sufficient except in Chuadanga Common rice sells as follows —

	Srs	Ch	
Sadar	13	0	per rupee
Kushtia	13	0	
Meherpur	11	6	
Chuadanga	12	0	
Ranaghat	10	0	

Murshidabad—Rainfall at Sadar 0 50, Kandi 0 20, Jangipur 0 19, Lalbagh 0 55 Weather seasonable Prospects of *rabi* crops less favourable, grain is being destroyed by worm in thanas Manullabazar, Bhagwangola and Asanpur of Lalbagh subdivision. No cattle-disease Fodder and water sufficient Common rice sells as follows —

	Srs.	
Sadar	13	per rupee.
Jangipur	13¾	
Kandi	14½	
Lalbagh	12½	

Jessore—Rainfall nil. Weather seasonable. Prospects of the crops good Linseed, barley and peas being cultivated Pressing of sugarcane going on. Fodder and water sufficient Common rice sells as follows —

	Srs.	
Sadar	11	per rupee.
Jhenida	12	
Magura	10½	
Narail	10	
Bangaon	12$\frac{1}{16}$	

Khulna.—Rainfall nil. Weather getting hot Transplantation of *boro* over Prospect fair Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	12	per rupee.
Bagerhat	9¾	
Satkhira	11	

Rajshahi—Rainfall at Sadar 16, Natore 16, Naugaon 02 Prospects of crops good. No cattle disease Fodder and water plentiful Common rice sells at 13½ seers a rupee

Dinajpur—Average rainfall 27 Weather seasonable No cattle-disease Fodder and drinking water plentiful. Rice 15 seers a rupee in Dinajpur town and 13½ seers at Thakurgaon

Jalpaiguri—Rainfall at Sadar 64, Alipur Duars 40 Weather seasonable Harvesting of tobacco going on Fields are being prepared for *bhadoi* and jute Common rice sells at 12 seers per rupee Fodder and water sufficient

Darjeeling—Rainfall at Darjeeling 1 41, Kurseong 53, Siliguri nil, Kalimpong 73 Weather seasonable. *Hills—tori, phapor*, wheat, barley, potatoes progressing *Terai*—harvesting of tobacco, mustard, sugarcane proceeding Common rice sells as follows —

	Srs	
Hills	9	per rupee
Terai	13	

Bhutta sells at Darjeeling 19 seers and at Kalimpong 24 seers per rupee.

Rangpur—Rainfall at Sadar 0 17, Gaibanda 0 01, Kurigram 0 22, Nilphamari 0 85 Weather seasonable Sowing of *aus* and jute going on. Water and fodder sufficient Common rice sells as follows —

	Srs	
Sadar	11	per rupee
Gaibanda	12	
Kurigram	10	
Nilphamari	13	

Bogra—Average rainfall 0 08 Cultivation for *aus* and jute going on More rain wanted Fodder and water sufficient Common rice sells at 13½ seers per rupee

Pabna—Rainfall at Sadar 0 32, Sirajganj 0 08 Weather seasonable. Prospects of crops good Prices unchanged. Fodder and water sufficient

Dacca.—Rainfall at Sadar 35, Manikganj 17, Munshiganj nil, Naraingani 94 Weather seasonable Prospects of crops fair No cattle-disease Fodder available Common rice 10½ seers per rupee.

Mymensingh—Rainfall at Sadar 0 15 Weather mid-days hot Prospects of crops fair Common rice sells as follows —

	Srs.	
Sadar	10	per rupee.
Jamalpur	10	
Kishoreganj	9¾	
Tangail	10¾	
Netrakona	8½	

Faridpur—Rainfall at Sadar 0 36, Goalundo nil, Madaripur nil Weather still cool. State and prospects of crops good Common rice sells at 11½ seers a rupee

Backergunge—Rainfall at Sadar nil Weather seasonable Prospects of crops good. Fodder and water sufficient. No cattle-disease reported. Common rice sells at 11½ seers (new *aman*) per rupee

Tippera—Rainfall at Brahmanbaria 20 Weather warm State and prospects of standing crops indifferent Rain badly wanted Fodder and water sufficient Cattle-disease reported from Nabinagar Common rice sells at 11½ seers per rupee

Noakhali—No rain Rain wanted Prospect of standing crops fair No cattle disease reported Fodder and water sufficient Prices stationary

Chittagong—No rain Harvesting of winter rice completed Outturn 12 annas Water and fodder scarce Common rice sells at 12½ seers

Patna—Rainfall at Sadar 0 48, Bihar 0 18, Barh 0 50, Hilsa 0 50, Dinapore 58, Bikram 0 57 The cloudy state of the weather has affected the *rabi* crop to some extent. Sowing of poppy continues Sugarcane pressing going on Fodder and water for cattle sufficient Common rice sells at 14 seers per rupee in Patna town

Gaya—Rainfall at Sadar 22, Jahanabad 47, Aurangabad 16 *Rabi* damaged by recent rains Poppy being lanced Common rice selling at 12 seers per rupee

Shahabad—Rainfall at Arrah 0 70, Buxar 0 54, Bhabua 0 42, Sasaram 0 70 Weather unsettled The standing *rabi* crops damaged by the recent rain Fodder and water sufficient Rice 13 seers a rupee at Sadar

Saran—Rainfall at Sadar 0·61 Weather seasonable and appreciably warmer Harvesting of *rabi* has commenced Standing crops good Fodder and water sufficient. Common rice 13 seers 15 chitaks and maize 22 seers 6 chitaks per rupee

Champaran—Rainfall at Motihari 66, Bettiah 39 Harvesting of *rabi* continues Lands being cultivated for *bhadoi* crops Fodder and water sufficient Prices of common rice and maize at Sadar are 14½ and 22¾ seers per rupee, respectively

Muzaffarpur—Rainfall at Sadar 50, Hajipur 83, and Sitamarhi 39 There was a slight hailstorm in Sitamarhi subdivision, which has done slight damage to the standing crops, otherwise prospect good Prices are—Common rice 13 seers, wheat 7 seers, barley 20 seers, maize 22 seers, *gohun* 13 seers, and *arhar* 12 seers a rupee

Darbhanga.—Rainfall at Sadar 0 45, Samastipur 0 55 Madhubani 0 74 Fodder and water sufficient No cattle disease reported Common rice sells as follows —

	Srs.	Ch	
Sadar ...	14	8	per rupee
Samastipur ...	15	0	per rupee
Madhubani ...	15	9	per rupee

Monghyr—Rainfall at Monghyr 0 14 Begusarai nil, Jamui nil Occasionally cloudy Standing crops doing well Sugarcane pressing and poppy lancing nearly finished Common rice sells as follows —

	Srs	Ch.	
Sadar	12	13	per rupee
Begusarai	13	0	per rupee
Jamui	12	0	per rupee

Bhagalpur—Rainfall at Sadar 0 35 Weather seasonable Prospects of *rabi* continue to be favourable No cattle disease Fodder and water sufficient Prices stationary

Purnea.—Rainfall at Sadar 0 64, Kishanganj and Araria nil Weather seasonable Harvesting of tobacco going on Lands are being ploughed for next *bhadoi* and jute crops No cattle-disease Fodder and water sufficient Common rice sells as follows —

	Srs	
Sadar	14	per rupee
Kishanganj	13	per rupee
Araria	16	per rupee

Malda.—Rainfall at Sadar 09 Chanchal 21, Shibganj 37, Gazole 18 Weather seasonable Prospects of standing crops reported to be good. No cattle disease Price of rice stationary Fodder and water sufficient

Sonthal Parganas—Average rainfall 41 Weather cool Prospect of *rabi* favourable Fodder and water-supply ample No cattle-disease. Rice sells at 14 and maize 21 seers per rupee.

Cuttack.—Rainfall at Jajpur 52, Banki 14 Weather seasonable *Dalua* and tobacco growing Sugarcane and *rabi* being harvested. Condition of cattle generally good Fodder and water sufficient Common rice sells as follows —

	Srs	Ch	
Sadar	13	12	per rupee.
Jajpur	15	12	
Kendrapara	15	12	
Banki	15	12	

Balasore —Rainfall at Sadar 30 Harvesting of *kandha*, *sarad*, and *rabi* continues. Cotton flowering *Dalua* being reaped. Sugarcane pressing in progress Ploughing continues Rice sells at 16⅝, 13½ and 17 seers per rupee in interior, Balasore, and Bhadrak, respectively Fodder and water sufficient

Angul —Rainfall at Sadar 55, Bissipara 1 34, Tikerpara 19 Weather seasonable Sugarcane being planted Price of rice remains stationary Fodder and water sufficient

Puri —Rainfall at Sadar 0 02, Khurda nil Weather seasonable Ploughing continues *Dalua* paddy in ear and in some parts ripening *Mung* and other miscellaneous crops doing well Fodder and water sufficient Price of rice stationary

Hazaribagh —Rainfall at Sadar 27, Giridih 1 53 Weather seasonable Fodder and water sufficient No cattle disease reported Common rice sells at Sadar 12 seers and at Giridih 12½ seers per rupee

Ranchi —Rainfall 0 27 Weather cloudy Ploughing continues *Mahua* crop suffered a little from cloudy weather Average price of common rice is 16 seers per rupee No cattle disease reported Fodder and water sufficient

Palamau.—Sugarcane doing well *Rabi* being injured by insects Rice selling at Sadar at 9½ seers per rupee

Manbhum —Rainfall at Sadar 0 06, Gobindpur 09 Weather seasonable Prospects of crops on ground good Fodder and water sufficient Cattle disease reported from Jhalda, Barabazar Purulia, Topchanchi, Katras Average price of common rice at Sadar 13 seers 4 chitaks and at Gobindpur 12 seers per rupee Supply sufficient

Singhbhum —Rainfall 0 10 Average price of rice is 15 seers 1 chitak in the district, at Chaibassa 14 seers

General Summary —Rain fell in small quantities in every district except in Howrah, Jessore, Khulna, Backergunge, Noakhali, Chittagong and Palamau The rain and the cloudy state of the weather has affected the standing crops to some extent in a few districts The harvesting of the *rabi* crops is proceeding rapidly Spring rice is being transplanted and doing well Cultivation of lands for *bhadoi* rice and jute is in progress Fodder and water generally sufficient Cattle disease continues to be reported from some districts. The price of common rice has risen in 12 districts, fallen in 10, and is stationary in the rest (24)

STATISTICAL DEPARTMENT,
The 12th March 1901

F A SLACKE,
Secy to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of February 1901

	Inches	Date	Hour
The mean pressure of the month	29 998		
The average pressure of February from 24 years' registers	29 945		
The highest pressure in the month	30 175	18th	10
The lowest pressure in the month	29 817	11th	16
The range of pressure	0 358		
	Hours.		
The total number of hours of bright sunshine during the month	204 4		
The maximum possible number of hours of sunshine	318 0		
	°		
The mean temperature of the month	70 3		
The average temperature of February from 24 years' registers	73 0		
The highest temperature in the month	87 1	4th & 5th	
The lowest temperature in the month	53 1	26th & 27th	
The range of temperature during the month	34 0		
The mean daily range of temperature	20 0		
The greatest range of temperature in one day	29 0	4th	
	Per cent		
The mean humidity of the month	73		
The average humidity of February from 24 years' registers	67		
	Inches		
The mean vapour tension of the month	0 531		
The average vapour tension of February from 9 years' registers	0 538		
The mean cloud proportion of the month	3 48		
The average cloud proportion of February from 24 years' registers	2 00		
	Inches.		
The total rainfall of the month	1 95		
The total rainfall indicated by a Beckley's self registering rain-gauge (mouth of the gauge about 53 feet above the ground)	1 81		
The average fall of February from 24 years' registers	0 87		
The greatest fall in 24 hours	1 20	13th	
	Days.		
The number of rainy days in the month	5		
The average number of rainy days in February from 24 years' registers	3		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	134 0		
The mean difference of sun and air temperatures	52 5		
The greatest sun temperature	144 5	9th	
The greatest excess of sun over air temperature	61 5	12th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	57 7		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	3 8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	6 2	25th	
	Miles		
The mean movement of the wind per day	98 7		
The greatest movement of the wind in one day	175 0	24th	
The greatest movement of the wind in one hour	20 0	24th 10 to 11 A M	

The number of hours with winds from each of the 8 points—
N 135, N E 64, E. 63, S E 10, S 37, S W 113, W 74, N W 150, Calm 26

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory) The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore 003 lower The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2 1 lower, and, finally, the thermometer, which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards, is found to read 0 6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory

G W KUCHLER,
For *Meteorological Reporter to the Govt of India, and Director-General of Indian Observatories*

METEOROLOGICAL OFFICE, GOVT OF INDIA,

	Inches.
The mean pressure of the seven days	29 947
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29 847
	Hours
The total number of hours of bright sunshine ..	57 8
The maximum possible number of hours of sunshine	82 3
The mean temperature of the seven days	7$\overset{2}{5}$ 1
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	78 0
The extreme variation of temperature	29 6
The maximum temperature	88 9
	Miles.
The highest velocity of the wind in one hour	14
	%
The mean relative humidity	64
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	69
	Inches.
The total fall of rain from 3rd to 9th March 1901	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0 46
The total fall from 1st January to 9th March 1901	3 26
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2 18

The mean pressure, temperature, &c, are deduced from the traces of the Barograph and Thermograph, and from eye observations

The maximum and minimum temperatures are obtained from self-registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground.

⩍, dew, o, overcast, ≡ fog

* The canals were opened from 19th September to 3rd October 1900 under special circumstances for giving water free of charge, to irrigate the kharif crop. The area irrigated was 4,500 acres. They were closed on the 4th October 1900 owing to heavy rainfall.
† The canals were closed during the year 1899-1900.

NOTIFICATION—No 1521L R

The 19th March 1901 —Whereas a survey is being made and a record of rights prepared in respect of lands in the district of Monghyr (north)

Monghyr

In exercise of the powers conferred upon him by section 101 (1) of the Bengal Tenancy Act VIII of 1885, as amended by Act III (B C) of 1898, and with the previous sanction of the Governor General in Council, the Lieutenant-Governor of Bengal is pleased to direct that a survey shall be made and a record of rights prepared in respect of the lands situated in thanas Tegra and Beguserai, in the district of Monghyr, with the exception of those for which a record of rights has already been prepared in connection with the survey and settlement of the Narhan Ward's Estate and the Srinagar and Banaili Raj Estates

The particulars to be recorded in the survey and record of rights shall be the following —

(*a*) The name of each tenant or occupant
(*b*) The class to which each tenant belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, settled raiyat, occupancy raiyat, non occupancy

raiyat, or under raiyat, and if he is a tenure holder, whether he is a permanent tenure holder or not, and whether his rent is liable to enhancement during the continuance of his tenure

(c) The situation and quantity and one or more of the boundaries of the land held by each tenant or occupier

(d) The name of each tenant's landlord

(e) The rent payable at the time the record of rights is being prepared.

(f) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise

(g) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases

(h) The special conditions and incidents, if any, of the tenancy

(i) The name of each proprietor, including rent-free owner, with the character and extent of his interest, and the situation, quantity and boundaries of the proprietor's private lands, as defined in Chapter XI of the Act

(j) If the land is claimed to be held rent-free, whether or not rent is actually paid, and if not paid, whether or not the occupant is entitled to hold the land without payment of rent, and if so entitled, under what authority

This cancels Notification No 2456T R, dated the 9th November 1900, published at pages 1255 56, Part I of the *Calcutta Gazette* of the 14th November 1900

MARINE DEPARTMENT

The 13th March 1901

No 33Marine—Whereas it appears that the estimated income of the Commissioners of the Port of Calcutta, under Act III of 1890, from the 1st of April 1901 to the 31st of March 1902, after deducting therefrom the estimated expenditure for the above period, will be insufficient for the payment of the sums which, under the provisions of the said Act, are payable during the year to the Secretary of State for India in Council and to holders of debentures under the said Act, it is hereby notified that from the 1st April 1901, the Port Commissioners will charge upon all goods landed from or shipped into any sea-going vessel lying or being within the limits of the Port, whether such goods shall or shall not be so landed or shipped at any dock, wharf, quay, stage or jetty belonging to the Commissioners, in addition to or other than those prescribed by any scale of tolls, dues, rates and charges now in force, a toll which shall approximate four annas per ton, except for export and bunker coal which shall be free Goods transhipped within the Port are exempt, also ballast with the exception of dressed stone For the purpose of levying such toll on miscellaneous general cargo landed or shipped at the Kidderpore Docks or at the Jetties, the Commissioners will follow the schedules of charges prescribed for the Docks and the Jetties, and charge one-fifth of the rates therein specified, but where the landing or shipping charge is in these schedules levied on the ton by weight, then the special charge under this notification shall be four annas per ton For the purpose of levying such toll on goods landed or shipped over the Inland Vessels' Wharves or otherwise than through the Docks or Jetties, the ton shall be reckoned at the actual weight where such is ascertainable Where the weight is not declared, then the ton shall be reckoned at the respective weights and measurements given in the schedule in force for the Inland Vessels' Wharves

R B. BUCKLEY,
Secy to the Govt of Bengal

The 16th March 1901

No 34Marine—The services of Mr E R Gardiner, Executive Engineer, first grade, are replaced at the disposal of the Public Works Department, with effect from the afternoon of the 15th March 1901

R B BUCKLEY,
Secy to the Govt of Bengal

The 16th March 1901

No 35Marine—Intimation having been received of the outbreak of plague in Hong-Kong, it is hereby notified, for general information, that Hong-Kong is declared to be infected under the definition given in the Venice Sanitary Convention Regulations, and that all vessels leaving Hong-Kong shall, on arrival at Chittagong, be examined and dealt with under the rules prescribed in this Department Notification No 65Marine of the 25th April 1898

R B BUCKLEY,
Secy to the Govt of Bengal

PREVENTION OF THE INTRODUCTION OF PLAGUE BY SEA

The 18th March 1901

No 36Marine—In exercise of the power conferred by section 2 of the Epidemic Diseases Act, III of 1897, and by the Notification of the Government of India, in the Home Department, No. 302, dated the 4th February 1897, and in supersession of all previous rules in force in the Ports of Calcutta and Chittagong, the Lieutenant-Governor of Bengal has been pleased to prescribe the following rules in respect of arrivals by sea at all ports in Bengal for the medical inspection, isolation, observation, and surveillance of persons suffering from, or suspected of being infected with, plague

These rules shall take effect at once

1 DEFINITIONS—

(1) *Health Officer*—In these rules "Health Officer" means the Health Officer of the Port, and includes an Additional or Assistant Health Officer, and any person appointed by name, or in virtue of his office, to perform the duties of a Health Officer under these rules

(2) *Infected ship*—Any ship with plague on board, or on board which one or more cases have taken place within 12 days before her arrival, will be considered *infected*

(3) *Suspected ship*—Any ship, on board which there has been a case of plague at the time of departure, or during the voyage, but on which no fresh case has occurred for 12 days before her arrival, will be considered *suspected*

(4) *Healthy ship*—Any ship, even though coming from an infected port, which has had no death or case of plague on board, either before departure, during the voyage, or on arrival, will be considered *healthy*

(5) *Observation*—The term "observation" means that the persons subjected to it will be segregated in a lazaretto or isolation camp, till they have obtained free *pratique*

(6) *Surveillance*—The term "surveillance" means that the persons subjected to it will not be isolated, they will at once obtain free *pratique*, but, on arriving at their destination, they will be kept under medical supervision

2 *Compliance with general directions*—The Commander of every vessel, including buggalows or other native craft, (*a*) arriving from an infected port, or (*b*) having plague on board, or (*c*) on board of which one or more cases of plague have taken place within 12 days of her arrival shall, on arrival at any port in Bengal, comply with such directions with respect to hoisting a yellow flag, indicating, by signal, the port from which she has come, stopping communication with the shore, stopping the ship at any place that may be ordered, and any similar measures necessary for giving effect to these rules, as may be notified by the Local Government

3 *Inspection by Health Officers*—On the arrival of a vessel of the classes referred to in Rule 2 at any healthy port in Bengal, the Health Officer shall, as soon as possible visit it and make such enquiries and inspection as he thinks necessary, and may require a declaration, on oath, from the Medical Officer of the vessel (if any) or the Commander, or both, as to whether any death from or case of plague has occurred on board the vessel, either during the voyage or before its departure He shall then class the vessel as 'Infected,' 'Suspected,' or 'Healthy' as the case may be

4 A vessel arriving at an infected port on board which no case of suspicious sickness has occurred within 12 days of arrival, may notify this fact by signal Such intimation shall *ordinarily* be accepted by the Port authorities, in which case the visit of the Port Health Officer will be dispensed with

5 *Healthy ships*—Healthy ships arriving at any port in Bengal shall, provided no case of sickness has occurred on board within 12 days of arrival, be given free *pratique* without further formalities

6 Healthy ships on board of which a case of sickness has occurred within 12 days of arrival shall be given free *pratique* at once, but the passengers may, if the sickness is regarded as suspicious, be kept under surveillance for 10 days

7 *Suspected ships*—The crew and passengers of suspected ships will be medically inspected, and the parts of the ship which have been occupied by plague patients disinfected Passengers who are passed as healthy will be allowed to proceed to their destination Passengers suspected by the Health Officer to be infected with plague may be detained under observation for 10 days

8 *Infected ships*—In the case of infected ships arriving at any port in Bengal, the sick, if any, shall be landed and isolated, the personal luggage of the crew and passengers and the ship itself shall be disinfected, and the healthy passengers shall be landed and kept under observation or surveillance for 10 days Only those who cannot be kept under surveillance should be detained in a camp

9 Any ship objecting to submit to the obligations imposed by these rules, or by orders passed under rule 2 of this Regulation, will be free to put back to sea Such objection must be notified on arrival at such place as may be separately directed in the case of each port

NOTIFICATION

Calcutta.

No 1100M—The 16th March 1901—In exercise of the power conferred by sub-section (*1*) of section 624 of the Calcutta Municipal Act, 1899, the Lieutenant Governor is pleased to prescribe the fees indicated in column 2 of the following table, to be paid on applications, appeals and references made under the portions of that Act specified in column 1 of that table to a Court of Small Causes —

1	2
Application under section 41 or section 622	Ten rupees
Appeal under section 162 against a valuation made under Chapter XII for the purpose of assessing land or buildings or both to the consolidated rate	The fee which would for the time being be levied in the Court of Small Causes of Calcutta on a plaint in a suit valued at six times the difference between— (*i*) the amount of the consolidated rate which would be payable, in pursuance of the directions for the time being in force under Chapter IX of the said Calcutta Municipal Act, 1899 upon the valuation which the appellant seeks to have substituted for the valuation against which he appeals, and (*ii*) the amount of the consolidated rate which would be payable if the maximum rates authorised by section 147 of the said Act were imposed upon the valuation against which the appeal is made EXPLANATION—*If the consolidated rate is fixed at 19½* per cent *on the value of land and buildings, and if the appellant seeks to have his land and buildings valued at Rs 50, the amount of the consolidated rate which would be payable, for the purposes of clause (i) would be Rs 9 12* *The maximum rates authorised by section 147 are equivalent to 25 per cent on the value of land and buildings and, if the valuation against which an appeal is made be Rs 100, the amount of the consolidated rate which would be payable, for the purposes of clause (ii), would be Rs 23* *The difference between these amounts being (23—9 12) Rs 13 4, the value of the appeal is (6 × 13 4) Rs 79 8 The fee levied under section 71 (a) of the Presidency Small Clause Courts Act, 1882, on a plaint in a suit valued at Rs 500 or less being two annas in the rupee the fee payable on an appeal, in the case put in this Explanation, would be (79 8 — 8) Rs 9 15*
Reference under section 616 as to expenses claimed by the Chairman	The fee which would for the time being be levied in the Court of Small Causes of Calcutta on a plaint in a suit valued at the same sum as the amount of the expenses claimed
Application under section 617 as to the amount of expenses or compensation payable, and as to the apportionment (if any) thereof	The fee which would for the time being be levied in the Court of Small Causes of Calcutta on a plaint in a suit valued at the same sum as the amount of the expenses or compensation claimed Provided that in no case shall a higher fee be payable than would be levied on a plaint in a suit valued at Rs 2,000
Appeal under rule 13 of Schedule II, against an order or notice directing the appellant to take out a license or licenses	The fee which would for the time being be levied in the Court of Small Causes of Calcutta on a plaint in a suit valued at the same sum as the fee or fees payable for such license or licenses

II —In further exercise of the power conferred by sub section (1) of the said section 624, the Lieutenant-Governor is pleased to direct that previous to the issue of any summons or other process in any inquiry or proceeding of a Court of Small Causes under the said Calcutta Municipal Act, 1899, there shall be paid the fee which would be levied on a like process if issued in any other inquiry or proceeding of the Court of Small Causes of Calcutta.

W A MARR Covenanted Deputy Collector in charge for Collector on tour

Midnapore Collectorate Arrear Collection Department the 15th February 1901

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estates situate in the district of Shahabad will be put up to sale at the Shahabad Collectorate Arrah on Monday the 25th March 1901 corresponding with 20th Chait 1308 Fasli

The purchasers will be subject to the following conditions of sale —

Conditions of Sale

1st —The estates to be sold to the highest bidders above the upset price which will be fixed by the Collector at the time of sale The purchasers of these estates will be considered as the proprietors of the estates and the entire proprietary right of Government in such estates will be transferred to them subject to the revenue fixed in perpetuity

2nd—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and the purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd—If the amount of purchase money do not exceed Rs 100 the whole amount to be paid down at once

4th—If the amount of purchase money exceed Rs 100 one fourth of the amount bid to be immediately deposited If the balance be not paid by noon of the fifteenth day after the sale reckoning the date of sale as one or if that day be a close holiday then by noon of the first succeeding office day the sale is to be cancelled (the sum deposited being forfeited to Government) and the estates to be again put up to sale at the risk of the defaulting purchasers after issue of advertisement as in the case of original sale

The present rent of each estate will be fixed in perpetuity as the revenue the upset price will be twice the amount of this rent

PART V

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Act of the Governor General of India in Council received the assent of the Governor General on the 9th March, 1901, and is hereby promulgated for general information —

ACT No V OF 1901

An Act further to amend the Indian Forest Act, 1878

WHEREAS it is expedient further to amend the Indian Forest Act, 1878, It is hereby enacted as follows —

Short title and commencement

78 1 (1) This Act may be called the Indian Forest (Amendment) Act, 1901, and

(2) It shall come into force at once

Addition to section 32 Act VII of 1878.

78 2 To section 32 of the Indian Forest Act, 1878, the following clause shal be added, namely —

"Whenever fire is caused wilfully or by gross negligence in a protected forest, the Local Government may (notwithstanding that any penalty has been inflicted under this section) direct that in such forest or any portion thereof the exercise of any right of pasture or to forest produce shal be suspended for such period as it thinks fit"

Amendment of section 33 Act VII of 1878

3 In section 33 of the said Act, after the words and figures ' except as regards any portion of a forest closed under section 29" the words and figures "or any rights the exercise of which has been suspended under section 32" shall be inserted

Amendment of section 78 Act VII of 1878

4 From section 78 of the said Act the words "demanding his aid ' shall be omitted before clause (a), and after clause (b) the following shall be inserted, namely —

"and shall assist any Forest officer or Police-officer demanding his aid—'

J M MACPHERSON,

Secretary to the Government of India

NOTIFICATION—No 1637

The 26th March 1901 —The following Report of the Bruce Institution for the year 1900 is published for general information

F A SLACKE,
Secy to the Govt of Bengal

REPORT OF THE BRUCE INSTITUTION FOR THE YEAR 1900

I —*Control* —During the year under review, the Rev A Kitchin was appointed to be a governor *vice* the Ven'ble Archdeacon Stone resigned The Rev Bishop Warne and Mr Geo Irving were absent from India during the greater part of the year, while the Hon'ble Mr Justice Sale was absent from India for about three months and Mr Bamford for four months

The following is a list of the governors at the close of the year —

The Hon'ble the Chief Justice of Bengal } *Ex-officio*
The Most Rev the Lord Bishop of Calcutta } *Ex-officio*
The Inspector-General of Civil Hospitals } *Ex-officio*
The Chairman of the Calcutta Municipality } *Ex-officio*
The Director of Public Instruction, Bengal, *Honorary Secretary* } *Ex-officio*
The Hon'ble Mr Justice Sale
L P Pugh, Esq (Barrister-at-Law)
The Very Rev Father V Marchal, S J
The Rev A Kitchin
H A Bamford, Esq

II —*Capital and Income* —The capital of the Institution stood as in the previous year at Rs 10,46,200, and is held in the form of a stock certificate of the year 1865, by the Comptroller General It yields at the rate of $3\frac{1}{2}$ per

cent per annum, *less* commission at ½ per cent charged by the Comptroller-General, an annual net interest of Rs 36,525 7 4, paid half yearly, which is placed to the credit of the Institution in the Bank of Bengal

III —*Election, Vacancies, etc* —The annual election was held in the month of August as usual For the 13 vacancies advertised, 72 applications were received, but, another vacancy having occurred just before the election, 14 of the most deserving girls were elected on the recommendation of the Sub-Committee, consisting of the Very Rev Father Marchal, s j , the Rev A Kitchin, L P Pugh, Esq , and H A Bamford, Esq Of the girls elected, 3 were placed in the Loreto Boarding School, Entally, 3 in the Loreto Orphanage, Entally, 3 in the Pratt Memorial School, 3 in LaMartinière, and 2 in the Calcutta Free School The month of August having been found to be inconvenient for holding the annual election, specially on account of the fact that the foundationers elected have to join the schools in the middle of a session, it was decided to change the date of elections in future to January, when the new term begins in all schools working under the European Code Of the girls who ceased to belong to the foundation during the year, two found places as teachers, while a third has learnt type writing and hopes to secure an appointment soon Another was retained in the school hospital to learn sick nursing During the year there were 16 vacancies caused by the withdrawal of children by their parents or guardians, of whom 12 had attained the age of 17 years, the limit ordinarily allowed under the rules If, however, a girl elects to take up teaching, some extension of time is generally allowed, if the governors consider her fit to take up higher studies One such extension was granted during the year Three girls who were in poor health were, at the request of school authorities, transferred temporarily to the Dow Hill Girls' School at Kurseong, while another girl, who had recovered from a severe attack of illness, was sent for a short time to the Eden Sanitarium at Darjeeling for a change Another girl who was suffering from consumption was placed in St Vincent's Home

At the close of the year there were 146 girls on the foundation against 148 in the preceding year They were distributed as follows —

Loreto Convent, Entally—		
Boarding School	19	
Orphanage	37	
		56
Calcutta Girls' School		39
Pratt Memorial School		17
Calcutta Free School		12
La Martinière Girls		9
St Paul's Mission School		8
European Protestant Orphanage, Cuttack		4
St Vincent's Home		1
Total		146

The following table affords particulars as to the class and religion of the foundationers at the close of the year —

Class	Roman Catholics	Church of England	Non-Conformists	Total
1	2	3	4	5
1 Orphans or deserted by the parents	30	21	8	59
2 Fatherless or deserted by the father, or father incapable	28	43	12	83
3 Father, or both parents alive	1	1	2	4
Total	59	65	22	146

IV —*Education and Maintenance* —The nature of the education imparted to the girls on the foundation is that prescribed for primary and middle schools for Europeans In exceptional cases a higher education is given A girl is not ordinarily allowed to remain in school after she has attained the age of seventeen years, when an outfit grant of Rs 50 is usually given to enable her to start in life The end sought is to fit the girls for a respectable and useful station in life

The average monthly cost for the education and maintenance of each girl on the foundation amounted to Rs 19 0 9 against Rs 19 1 0 in the preceding year. The year opened with a balance of Rs 22,398 and closed with a balance of Rs 22,606 The total amount paid under the different heads of expenditure was as under —

1899	Rs	A	P
Education and maintenance	33,939	8	0
Office establishment	822	0	0
Contingencies	24	2	0
Advertisement and Printing	165	2	3
Outfits	760	0	0
Funeral expenses	32	0	0
Other charges	52	0	0
Total	35,794	12	3

1900	Rs	A	P
Education and maintenance	34 019	7	0
Office establishment	822	0	0
Contingencies	31	4	0
Advertisement and Printing	203	13	5
Outfits	1,278	0	0
Other charges	36	8	0
Total	36,391	0	5

V —*Inspection* —Mr C Russell, Officiating Inspector of European Schools, visited the schools in which the Bruce foundationers are, for the first half of the year, and Mr H A Bamford was appointed Visiting Governor for the second half of the year Their reports were satisfactory Mr Russell reported that he had received a complaint of ill-treatment and neglect in the case of one of the foundationers, but that after investigating the matter he was satisfied that the charge was groundless Mr Bamford reported that in all the schools he found the Bruce foundationers were well treated, and, on the whole, making satisfactory progress Good accounts continue to be received from the school authorities in regard to the general conduct, application, progress, health and attendance of the foundationers

VI —*Meetings* —Four meetings were held during the year, and among the various resolutions passed, the following may be noted —

That in future the outfit money allowed to foundationers on leaving school, should be paid over to the school authorities for the benefit of the children and not paid direct to the parents or guardians of the children

CALCUTTA,
The 28th February 1901

A PEDLER, I R S,
(*Director of Public Instruction,*)
Honorary Secretary to the Governors

NOTIFICATION—No 1638

The 26th March 1901 —It is hereby notified that the Lieutenant Governor, in exercise of the powers conferred by sections 4 and 5 of the Charitable Endowments Act, 1890, and upon the application and with the concurrence of Babu Hira Lall Mukerji, of Sridharpur, in the district of Burdwan doth hereby order and direct that the Government Promissory Notes, of which the particulars are contained in the first Schedule hereunder written, shall as from the date of the first publication of this notification vest and be henceforth vested in the Treasurer of Charitable Endowments for the territories subject to the Government of Bengal, to be held by him and his successors (subject to the provisions of the Charitable Endowments Act, 1890, and any rules from time to time framed thereunder by the Governor General in Council) upon trust for ever hereafter to receive the interest of the said securities when and as the same shall become due and payable, and from time to time to apply the same in terms of the scheme for the creation of an endowment and maintenance of a Sanskrit tol in the said village of Sridharpur, of which the particulars are contained in the second Schedule hereunder written, and it is hereby further notified that the said scheme, of which the particulars are contained in the second Schedule hereunder written,

shall come into operation on the vesting of the said securities in the Treasurer of Charitable Endowments for the territories subject to the Government of Bengal —

The first Schedule above referred to

	Rs
3½ per cent. Government Promissory Note of 1854-55, No 026535, for	1,000

3½ per cent. Government Promissory Note of 1865, No 106639, for	1,000
3½ per cent Government Promissory Note of 1865, No 031240, for	1,000
3½ per cent Government Promissory Note of 1865, No 031632, for	1,000
3½ per cent Government Promissory Note of 1842 43, No 028486, for	1,000
3½ per cent Government Promissory Note of 1842-43, No 054367, for	1,000
3½ per cent Government Promissory Note of 1842 43, No 028485, for	1,000
3½ per cent, Government Promissory Note of 1842 43, No 053457, for	1,000
Total	10,000

The second Schedule above referred to

1 The endowment hereby created shall be called "The Hira Lal Mukerji Tol Fund," and its object is and shall be the establishment and maintenance of a Sanskrit tol in the village of Sridharpur, in the district of Burdwan, to be called "The Hira Lal Mukerji Chatuspathi"

2 The Trustee to be appointed under section 5 (1) of the Charitable Endowments Act, 1890, to administer the property vested by the above notification shall be the Principal for the time being of the Sanskrit College, Calcutta

3 The interest of the securities vested by the above notification shall be paid by the Treasurer of Charitable Endowments to the Principal for the time being of the Sanskrit College, Calcutta, as such Trustee as aforesaid, who shall apply the same in the following manner, namely —

(a) in paying the sum of Rs 20 per mensem as salary to a pandit, who shall be duly qualified to instruct, and shall instruct in Kavya and Smriti free of charge all persons who shall desire to receive such instruction at the said tol,

(b) in paying the sum of Rs 3 per mensem each as a stipend to two pupils under tuition in the said tol,

(c) in paying the sum of Rs 2 per mensem as wages to a tol servant and shall apply the balance of such interest in defraying any other expenses of the said tol

The said Trustee shall have power from time to time to select and appoint a proper person to act as such pandit as aforesaid, and to dismiss any person acting as such pandit if the said Trustee shall consider him to be incompetent or to be unable to perform his duties in an efficient manner or for any other reason

4 The said tol shall be accommodated in the outer portion of the dwelling house of the donor, Babu Hira Lal Mukerji, at Sridharpur, until such time as the donor shall at his own cost have erected a separate building therefor, when it shall be accommodated in such building

5 The local management of the said tol and the distribution of the interest of the said securities in manner provided in clause 3 hereof shall be entrusted to the donor and after his death to his heir as Secretary, and such Secretary shall keep proper accounts of all moneys received and expended by him, and shall submit such accounts annually to the Principal of the Sanskrit College, Calcutta, as such Trustee as aforesaid

HIGH COURT NOTICE.

General Letter No 2, dated Calcutta, the 27th February 1901

From—E P CHAPMAN, ESQ, Registrar, High Court,
To—The District Judge of

IN my General Letter No 1, dated the 1st February 1900, it was stated that when a Court in India is satisfied that the evidence of a person residing in England or Ireland is necessary, the proper course is for that Court to appoint a Commissioner or Commissioners and to issue a Commission for the examination of the witness under section 387 of the Code of Civil Procedure I am directed now to say that the Judges have been informed that when a Court in India issues a Commission or other process for the examination of witnesses in England, the High Court in England will itself appoint an examiner to take the evidence, if application be made to it for the purpose But the High Court in England cannot act in any way, unless put in motion by a proper application, therefore, in every case in which it is desired to obtain the appointment of an examiner by the High Court in England, the parties interested must instruct a Solicitor to apply to the High Court in England to make the necessary orders

Sheriff's Office, the 20th March 1901

NOTICE is hereby given that the Second Criminal Sessions of the year 1901 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William, and the places subordinate thereto, will be held at the Court house, in the Town of Calcutta, on Wednesday, the first day of May next, at 11 o'clock in the forenoon, and thenceforward from day to day until the said Sessions be over And it is hereby proclaimed that all persons who are to prosecute any of the prisoners to be brought up for trial at the said Sessions be present then and there to prosecute

Darjeeling

E N BAKER,
Secy to the Govt of Bengal

NOTIFICATION

No 1291M —The 26th March 1901 —It is hereby notified for general information that, in exercise of the powers vested in the Local Government by section 9 (c) of the Bengal Municipal Act, III of 1884, as modified up to 1st November 1896, and in accordance with the recommendation of the Commissioners of the Jalpaiguri Municipality, made at a meeting, the Lieutenant Governor intends to include within the limits of the said Municipality the following plot of land, unless good reasons are shown to the contrary within six weeks from the date of publication of this notification within the Municipality —

Jalpaiguri

The land proposed to be included within the Municipality is bounded on the east by the existing western boundary of the Municipality, on the north by the Berubari road, on the west by the Berubari road, and on the south by a line drawn from a point on the Berubari road about 200 yards from Messrs Ralli Brothers' godown and premises and passing south of the Adarpara tank till it meets the Eastern Bengal State Railway line at the culvert to the south east of that tank

The revised boundaries of the Municipality after the inclusion of the above area will be as follows —

On the North—A line drawn due east from the ditch on the north of the Bykantpur Zamindar's house to the bank of the Teesta river, and west in a straight line to a point on the bank of the river Kurla, and thence along the western bank of the Kurla until it reaches a point about 400 yards west of the old jail and thence to the Silliguri road

On the South—By a line drawn from a point on the Berubari road about 200 yards from Messrs Ralli Brothers' godown and premises and passing south of the Adarpara tank till it meets the Eastern Bengal State Railway line at the culvert to the south east of the said tank, and thence passing along the western boundary of the railway line till it meets the level crossing of the Teesta Pandarpara road, and thence along that road to the Teesta river

On the East—The Teesta river

On the West—By a line drawn from the point where the northern boundary touches the Silliguri road passing outside the Mahut's village, including Sher Mohamed's village, and passing to the east of Cherkutto's house until it meets the Eastern Bengal State Railway line at a point about 440 yards above the Sitalyah road, and passing along the western boundary of the railway line till it meets the level crossing of the Berubari road and thence passing along that road to a point about 200 yards from Messrs Ralli Brothers' godown and premises to the south west of it

This supersedes Government Notification No 1287M, dated the 15th March 1900, published at page 51, Part IB of the *Calcutta Gazette* of the 21st idem

E N BAKER,
Secy to the Govt of Bengal

DECLARATION

No 1258M —The 25th March 1901 —Whereas it appears to the Lieutenant Governor of Bengal that land is required to be taken up by Government at the expense of the Serampore Municipality for a public purpose, viz, for a Muhammadan burial ground at Konnagore, in the village of Konnagore, pargana Boro, zilla Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighas of standard measurement, is required The land is bounded on the north by drain bordering garden lands of Babu Sattya Churn Banerjee, on the east by drain bordering Deb Bagan Lane, on the south by parts of garden lands of Srimati Kadambini Dassi, which are not to be acquired, and on the west by the drain bordering garden lands of Dena Nath Kulpi

Hooghly

Comilla, the 16th February 1901 — J J PATEL Covenanted Deputy Collector in charge

Advertisement of Sale

NOTICE is hereby given that the proprietary right of Government as specified in the conditions of sale below to the undermentioned estates situate in the district of Burdwan will be put up to sale at the Burdwan Collectorate on the 2nd April 1901 corresponding with 9th Baisakh 1308 B S

Conditions of Sale

1st —The estates to be sold to the highest bidders above the upset price which will be fixed by the Collector at the time of sale The purchasers of these estates will be considered as the proprietors of the estates and the entire proprietary right of Government in such estates will be transferred to them with effect from 1st April 1901 as revenue free, or subject to the revenue fixed in perpetuity

2nd —The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities

3rd —If the amount of purchase money do not exceed Rs 100 the whole amount to be paid at once

4th —If the amount of purchase money exceed Rs 100 one fourth of the amount bid to be immediately deposited If the balance be not paid by noon of the fifteenth day after the sale reckoning the day of sale as one or if that day be a close holiday then by noon of the first succeeding office day the sale will be cancelled (the sum deposited being forfeited to Government) and the estate will be again put up for sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale

The Indian Law Reports

Published under Authority

THE Indian Law Reports published under the authority of the Governor General in Council appear in monthly parts published as soon as possible after the first of each month at Calcutta Madras Bombay, and Allahabad and comprise four series—one for the Calcutta High Court a second for the Madras High Court a third for the Bombay High Court and a fourth for the Allahabad High Court The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt and the Madras Bombay and Allahabad Series are distributed direct from Madras Bombay and Allahabad respectively

In supersession of the previous advertisements on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the reports from 1876 —

PART V

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Act of the Governor General of India in Council received the assent of the Governor General on the 22nd March, 1901, and is hereby promulgated for general information —

ACT No VII OF 1901

An Act to place Native Christians in the same position as Hindus, Muhammadans and Buddhists in the matter of obtaining letters of administration and for other purposes

WHEREAS it is expedient to place Native Christians on the same footing as Hindus, Muhammadans and Buddhists in the matter of obtaining letters of administration to exempt them from the operation of certain provisions of the Administrator General's Act, 1874, from which Hindus, Muhammadans, Parsis and Buddhists are exempted, and to enable them to obtain certificates under the Succession Certificates Act, 1889, in certain cases, It is hereby enacted as follows —

Short title and commencement

1 (1) This Act may be called the Native Christian Administration of Estates Act, 1901, and

(2) It shall come into force at once

Definition

2 In this Act, the expression "Native Christian" means a native of India who is, or in good faith claims to be, of unmixed Asiatic descent and who professes any form of the Christian religion

Exemption of Native Christians from sections 190 and 239 Act X 1865

X of 1865

3 Sections 190 and 239 of the Indian Succession Act, 1865, shall not apply to any part of the property of a Native Christian who has died intestate

Exemption of Native Christians from certain sections of Act II of 1874

II of 1874

4 In sections 16, 17, 18 37 and 64 respectively of the Administrator General's Act, 1874, before the word "Hindu" wherever it occurs, the word "Native Christian" shall be inserted

Provided that nothing contained in this section shall affect any probate, letters of administration or certificate granted or vested under the said Act

Grant of certificates under Act VII of 1889 to Native Christians in certain cases

VII of 1889

5 Nothing contained in section 1, sub-section (4) of the Succession Certificates Act, 1889, shall be deemed to prevent the grant of a certificate to any person claiming to be entitled to the effects of a deceased Native Christian or to any part thereof, with respect to any debt or security by reason that a right thereto can be established by letters of administration under the Indian Succession Act, 1865

X of 1865

J M MACPHERSON,
Secretary to the Government of India

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

The following Act of the Governor General of India in Council received the assent of the Governor General on the 22nd March, 1901, and is hereby promulgated for general information —

ACT NO VIII OF 1901

An Act to provide for the Regulation and Inspection of Mines

WHEREAS it is expedient to provide for the regulation and inspection of mines, It is hereby enacted as follows —

Preliminary

Short title extent and commencement

1 (*1*) This Act may be called the Indian Mines Act, 1901

(*2*) It extends to the whole of British India including British Baluchistan the Santhal Parganas and the Pargana of Spiti and

(*3*) It shall come into force at once

Saving of Regulation VII 1887

2 Nothing in this Act shall be construed to affect the provisions of the Upper Burma Ruby Regulation, 1887

Definitions

3 In this Act, unless there is anything repugnant in the subject or context,—

(*a*) "agent" when used in relation to a mine, means any person appointed as the representative of the owner in respect of the management of the mine or of any part thereof, and as such superior to a manager under this Act

(*b*) "child" means a person under the age of twelve years

(*c*) a person is said to be "employed in a mine who works, under appointment by or with the knowledge of the manager, whether for wages or not, in any mining operation, or in cleaning or oiling any part of any machinery used in or at the mine, or in any other kind of work whatsoever incidental to, or connected with, mining operations

(*d*) "mine" includes every shaft in the course of being sunk, and every level and inclined plane in the course of being driven for commencing or opening any mine or for searching for or proving minerals, and all the shafts, levels, planes, works, machinery, tramways and sidings, both below ground and above ground in and adjacent to and belonging to the mine, but it does not include any pit, quarry or other excavation the depth of no part of which measured from the level of the adjacent ground exceeds twenty feet and no part of which extends beneath the superjacent ground

(*e*) "owner" when used in relation to a mine, means any person who is the immediate proprietor or lessee or occupier of the mine or of any part thereof, and does not include a person who merely receives a royalty rent or fine from the mine, or is merely the proprietor of the mine subject to any lease, grant or licence for the working thereof, or is merely the owner of the soil and not interested in the minerals of the mine but any contractor for the working of a mine or any part thereof shall be subject to this Act in like manner as if he were an owner but not so as to exempt the owner from any liability

(*f*) "prescribed" means prescribed by rules made under this Act and

(*g*) "shaft" includes pit

Inspectors

Inspectors

4 (*1*) The Governor General in Council shall, by notification in the Gazette of India, appoint a duly qualified person to be Chief Inspector of Mines throughout British India

(*2*) The Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, appoint persons, qualified by experience, to be Inspectors of Mines within such local areas or for such groups or classes of mines as it may assign to them respectively

(*3*) Every Inspector of Mines appointed under sub section (*2*) shall, in the performance of his duties, be subordinate to the Chief Inspector of Mines appointed under sub section (*1*) in such respects and to such extent as may be prescribed by the Governor General in Council

(*4*) The Chief Inspector and every Inspector of Mines appointed under this section shall be deemed to be a public servant within the meaning of the Indian Penal Code, and shall be subordinate to such authority as the Governor General in Council or the Local Government, as the case may be, may direct

(*5*) No Chief Inspector or Inspector of Mines shall be a partner or have any interest, direct or indirect, in any mine or mining rights in India

(*6*) When rules are made under this Act, the Inspector of Mines shall give information to owners, agents and managers of mines within the local area, or the group or class of mines for which he has been appointed as to any rules which concern them respectively, and as to the places where copies of such rules may be obtained.

5 The District Magistrate may exercise such of the powers and perform such of the duties of an Inspector of Mines as the Local Government may, by general or special order, direct

Powers of District Magistrate

Provided that nothing in this section shall be deemed to empower a District Magistrate to exercise any of the powers conferred by section 15 or section 21

6 The Chief Inspector of Mines may, anywhere within British India, and an Inspector of Mines may, within the local area or with respect to the group or class of mines for which he is appointed,—

Powers of Inspectors of Mines.

(a) make such examination and inquiry as he thinks fit in order to ascertain whether the provisions of this Act and of the rules and orders made thereunder are observed in the case of any mine,

(b) enter with such assistants (if any) as he thinks fit, inspect and examine any mine and any part thereof at all reasonable times by day or by night but not so as unreasonably to impede or obstruct the working of the mine,

(c) examine into, and make inquiry respecting, the state and condition of any mine or any part thereof, the ventilation of the mine, the sufficiency of the special rules for the time being in force in and at the mine and all matters and things connected with or relating to the safety of the persons employed in or about the mine,

(d) order that any person shall not be employed in or admitted to, or shall be removed from, a mine where there is ground for believing that his employment in or admission to or presence in such mine would be dangerous to himself or others Provided that an appeal shall lie to such authority as the Governor General in Council or the Local Government, as the case may be, may direct from any order made under this clause, and that the order shall be complied with until the decision of such authority shall be received at the mine,

(e) do all other things required of him by or under this Act

7 Every owner, agent and manager of a mine shall furnish the Chief Inspector and every Inspector of Mines on requisition, with the means necessary for making any entry, inspection, examination or inquiry in relation to the working of the mine under this Act

Facilities to be afforded to Inspectors

8 (1) All copies of, and extracts from, registers or other records appertaining to any mine, and all other information acquired by the Chief Inspector or an Inspector of Mines, or by any one assisting him, in the inspection of any mine under this Act, shall be regarded as strictly confidential

Information acquired to be deemed official secrets within meaning of Act XV 1889

(2) If any such person discloses to any one, other than a Magistrate or an officer to whom he is subordinate any such information as aforesaid without the consent of the Governor General in Council or the Local Government, as the case may be, he shall be guilty of a breach of official trust, and shall be punishable in the manner provided by section 4 of the Indian Official Secrets Act, 1889

(3) No Court shall take cognizance of any offence under this section unless on a prosecution at the instance of the Governor General in Council, or the Local Government, or of a person aggrieved by the same

Mining Boards and Committees

9 (1) The Local Government may constitute for the Province, or for any part of the Province or for any group or class of mines in the Province, a Mining Board consisting of—

Mining Boards

(a) a public officer, not being the Chief Inspector or an Inspector of Mines, nominated by the Local Government to act as chairman,

(b) the Chief Inspector or the Inspector of Mines,

(c) one other person, not being the Chief Inspector or an Inspector of Mines, nominated by the Local Government, and

(d) two persons nominated by owners of mines or their representatives in such manner as the Local Government may direct

(2) The Chairman shall appoint a person to act as secretary of the Board

(3) The Local Government may give directions as to the payment of travelling expenses incurred by the chairman, secretary or any member of a Mining Board in the performance of his duty as such chairman, secretary or member

10 (1) Where under this Act any question relating to a mine is referred to a Committee, the Committee shall consist of—

Committees

(a) a chairman nominated by the Local Government or by such officer or authority as the Local Government may direct,

(*b*) one or more persons qualified by experience to dispose of the question referred to the Committee and nominated by the chairman, and

(*c*) one or more persons equal in number to the person or persons nominated under clause (*b*) and nominated by the owner, agent or manager of the mine concerned

(*2*) The Inspector of Mines shall not serve as Chairman or member of a Committee appointed under this section

(*3*) No person employed in or in the management of the mine concerned shall serve as chairman or member of a Committee appointed under this section

(*4*) Where an owner, agent or manager fails to exercise his power of nomination under sub section (*1*), clause (*c*), the Committee may, notwithstanding such failure, proceed to inquire into and dispose of the matter referred to them

(*5*) The Committee shall hear and record such information as the Chief Inspector or the Inspector of Mines or the owner, agent or manager of the mine concerned may place before them and shall intimate their decision to the Chief Inspector or the Inspector of Mines and to the owner agent or manager of the mine concerned, and shall report their decision to the Local Government, or where a Mining Board has been constituted to the Local Government through the Mining Board

(*6*) On receiving such report the Local Government may, if the Inspector of Mines, or the owner, agent or manager, has lodged an objection to the decision of the Committee, proceed to review such decision and to pass such orders in the matter as it may think fit

(*7*) The Local Government may give directions as to the remuneration (if any) to be paid to the members of the Committee or any of them, and as to payment of the expenses of the inquiry, including such remuneration

11 (*1*) A Mining Board constituted under section 9 or a Committee appointed under section 10 may exercise such of the powers of an Inspector of Mines as they may think it necessary or expedient to exercise for the purpose of deciding or reporting upon any matter referred to them

Powers of Mining Boards and Committees

(*2*) A Mining Board constituted under section 9 or a Committee appointed under section 10 shall have the powers of a Civil Court for the purpose of enforcing the attendance of witnesses and compelling the production of documents, and every person required by any such Committee to furnish information before it shall be deemed to be legally bound to do so within the meaning of section 176 of the Indian Penal Code

50

12 When the Local Government directs that the expenses of any inquiry conducted by a Mining Board constituted under section 9 or by a Committee appointed under section 10 are to be borne in whole or in part by the owner, agent or manager of the mine concerned, the amount so directed to be paid may be recovered on application by the Chief Inspector or the Inspector of Mines to a Magistrate having jurisdiction at the place where the mine is situate or where such owner, agent or manager is for the time being resident by the distress and sale of any moveable property within the limits of the Magistrate's jurisdiction belonging to such owner, agent or manager

Recovery of expenses

Mining Operations and Duties and Responsibilities of Owners, Agents and Managers

13 (*1*) For every mine there shall be a manager, who shall have the prescribed qualifications

Managers

(*2*) The manager shall be responsible for the superintendence of all parts of the mine

14 (*1*) The owner, agent and manager of every mine shall be responsible that all operations carried on in connection therewith are conducted in accordance with the provisions of this Act and the rules and orders made thereunder

Duties and responsibilities of owners agents and managers

(*2*) In the event of any contravention of, or failure to comply with, any such provisions on the part of any person whomsoever the owner, agent and manager shall each be liable to be found guilty of an offence against this Act, unless he proves that he had taken all reasonable means, by publishing and to the best of his power enforcing the said provisions to prevent such contravention or non compliance, and that such contravention or non compliance occurred without his consent

15 (*1*) If, in any respect which is not provided against by any express provision of this Act, or of the rules or orders made thereunder, the Chief Inspector or any Inspector of Mines finds that any mine, or any part thereof, or any matter thing or practice in or connected with the mine, or with the control management or direction thereof is dangerous to human life or safety, or defective so as to threaten, or tend to, the bodily injury of any person, he may give notice in writing thereof to the owner, agent or manager of the mine, and shall state in the notice the particulars in which he considers the mine, or part thereof, or the matter thing or practice, to be dangerous or defective, and require the same to be remedied

Powers of Inspector when causes of danger not expressly provided against exist or when employment of women or children is dangerous

(*2*) If, for reasons to be recorded in the order, the Chief Inspector or the Inspector of Mines is of opinion that there is urgent and immediate danger to the life or safety of women or children employed in or at any mine, he may, by order in writing, prohibit the employment of such women and children

(3) The Chief Inspector or the Inspector giving notice under sub section (1) or making an order under sub-section (2) shall forthwith report the same to the Mining Board, or, where there is no Mining Board, to such officer or authority as the Local Government may by general or special order appoint in this behalf

(4) If the owner, agent or manager of the mine objects to remedy the matter complained of in a notice under sub-section (1) or to comply with an order made under sub section (2), he may within twenty days after the receipt of the notice or order send his objection in writing, stating the grounds thereof, to the Board or other authority to which the Inspector's report is made under sub section (3)

(5) On receiving an objection made under sub section (4), the said Board or other authority shall refer the matter to a Committee

(6) In case objection is taken to an order made under sub section (2), the order shall be complied with until the decision of the Committee is received at the mine

(7) Nothing in this section shall affect the powers of a Magistrate under section 144 of the Code of Criminal Procedure, 1898

Notice to be given of mining operations

16 The owner, agent or manager of a mine shall, in the case of existing mines within three months after the commencement of this Act, and in the case of new mines within three months after the commencement of mining operations, give notice in writing to the Inspector of Mines appointed under section 4, sub-section (2), for the local area in which the mine is situate, or for the group or class of mines to which the mine belongs, or if no Inspector of Mines has been appointed for such area or group or class of mines, to the Chief Inspector of Mines, of the address to which he desires his letters to be directed, the kind of minerals worked or to be worked, the name of the person under whom the mining operations are or are to be conducted, and the nature of the moving power which is or is to be used

Notice to be given of accidents

17 When any accidental explosion occurs in a mine, or when any accident occurs in or at a mine, causing loss of life or serious bodily injury, the owner, agent or manager of the mine shall give such notice of the explosion or accident to such authorities, in such form, and within such time, as may be prescribed

Power for the Government to order formal inquiry into accidents

18 (1) When in or at any mine an explosion or other accident has occurred, if it appears to the Governor General in Council or the Local Government that a formal inquiry into the causes of, and circumstances attending, the accident ought to be held, the Governor General in Council or the Local Government may give directions accordingly, and may appoint a competent person to hold the inquiry, and may also appoint any person or persons possessing legal or special knowledge to act as assessor or assessors in holding the inquiry

(2) The person or persons so appointed shall have all the powers of a Civil Court for the purpose of enforcing the attendance of witnesses and compelling the production of documents, and every person required by such person or persons as aforesaid to furnish any information shall be deemed to be legally bound to do so within the meaning of section 176 of the Indian Penal Code

(3) The person or persons holding an inquiry under this section may exercise such of the powers of an Inspector of Mines as he or they may think it necessary or expedient to exercise for the purposes of such inquiry

(4) The person or persons holding an inquiry under this section shall make a report to the Local Government, stating the causes of the accident and its circumstances, and adding any observations which he or they may think fit to make

Publication of reports.

19 The Local Government may cause any report submitted under section 15 or section 18 to be published at such time and in such manner as it may think fit

Rules

Power for Government to make rules

20 (1) The Governor General in Council may, for the whole or any part of British India, and each Local Government with the previous sanction of the Governor General in Council, may, for the whole or any part of the Province by notification in the Gazette of India or the local official Gazette, as the case may be make rules for carrying out the purposes and objects of this Act in respect of all mines or any groups or classes of mines

(2) In particular and without prejudice to the generality of the foregoing power such rules may—

(a) regulate the duties and powers of the Chief Inspector and of Inspectors of Mines in respect of the inspection of mines under this Act, and provide for appeals from the orders of the Chief Inspector and Inspectors of Mines,

(b) provide for the appointment of chairmen and members of Mining Boards and Committees and regulate the procedure of such Boards and Committees,

(c) prescribe the duties of owners, agents and managers of mines and of all persons acting under them,

(d) prescribe the qualifications of managers and of all persons acting under them

(*e*) regulate the manner of ascertaining, by examination or otherwise, the qualifications of managers and persons acting under them, and the granting and renewal of certificates of competency,

(*f*) fix the fees (if any) to be paid in respect of such examinations and the grant and renewal of certificates as aforesaid,

(*g*) provide for the making of inquiries into charges of misconduct or incompetency on the part of managers and persons acting under them, and for the suspension and cancellation of certificates of competency,

(*h*) prescribe the matters in respect of which notices, returns and reports shall be furnished by owners, agents and managers, the forms of such notices, returns and reports, the persons and authorities to whom they are to be furnished and the particulars to be contained in them,

(*i*) prescribe the plans (if any) to be kept by owners, agents and managers, and the manner and places in which they are to be kept for purposes of record,

(*j*) regulate, subject to the provisions of the Indian Explosives Act, 1884, and the rules thereunder, the storage and use of explosives,

(*k*) provide for the safety of the persons employed in mines, their means of entrance thereinto and exit therefrom, the number of shafts or outlets to be furnished, the fencing of shafts, outlets and passages, and the care of all machinery,

(*l*) prohibit, restrict or regulate the employment of women or children either below ground or on particular kinds of labour where such employment is attended by danger to the life, safety or health of such women or children,

(*m*) require owners or agents to maintain registers of women and children employed, and prescribe the forms of such registers,

(*n*) provide for the water supply, sanitation and conservancy of mines,

(*o*) provide for the safety of the roads and working places in mines

(*p*) provide for the ventilation of mines and the action to be taken in respect of noxious gases,

(*q*) require and regulate the use of safety lamps in mines

(*r*) provide against the accumulation of water in mines,

(*s*) regulate the procedure on the occurrence of accidents in mines and the supply of medical appliances and comforts for the benefit of persons injured therein

(*t*) provide for the fencing of any mine or part of a mine, whether the same is being worked or not, where such fencing is necessary for the protection of the public,

(*u*) provide for the protection of public property and works from injury in respect of any mine when the workings are discontinued, and

(*v*) prescribe the notice to be given by the owner, agent or manager of a mine before extending any mining operations under his control at or to any point within fifty yards of any railway subject to the provisions of the Indian Railways Act, 1890, or of any public works or classes of public works which the Local Government may, by general or special order, specify in this behalf

(*3*) The power to make rules conferred by this section is subject to the condition of the rules being made after previous publication

(*4*) The date to be specified in accordance with clause (*3*) of section 23 of the General Clauses Act, 1897 as that after which a draft of rules proposed to be made under this section will be taken into consideration, shall not be less than three months from the date on which the draft of the proposed rules was published for general information

(*5*) Where a Mining Board has been constituted under section 9, any rule to be made under this Act shall, before it is published for criticism under sub section (*3*), be referred to the Mining Board and the rule shall not be so published until the said Board has reported as to the expediency of making the proposed rule and as to the suitability of its provisions

(*6*) All rules made under this section shall be published in the Gazette of India or in the local official Gazette, as the case may be, and, on such publication, shall have effect as if enacted in this Act

Power for owners etc, to make special rules

21 (*1*) The owner, agent or manager of a mine may frame and transmit to the Inspector of Mines or, when there is no Inspector for the local area in which the mine is situate or the group or class to which the mine belongs, to the Chief Inspector, a draft of such special rules, not being inconsistent with this Act or any rules for the time being in force under section 20, for the control and guidance of the persons acting in the management of, or employed in or about, the mine as he may deem necessary to prevent accidents and provide for the safety, convenience and discipline of the persons employed in or about the mine

(*2*) If any such owner, agent or manager—

(*a*) fails within a period of two months after the receipt of a notice from the Inspector or Chief Inspector to transmit a draft of such special rules as are referred to in sub section (*1*), or

(*b*) submits a draft of such special rules as aforesaid, which is not in the opinion of the Inspector or Chief Inspector sufficient,

the Inspector or Chief Inspector may either—

(*i*) propose a draft of such special rules as appear to him to be sufficient or

(*ii*) propose such amendments in the draft submitted to him by the owner, agent or manager as will, in his opinion render them sufficient,

and shall send such draft rules or draft amendments to the owner, agent or manager for consideration

(*3*) If within a period of two months from the date on which any draft rules or draft amendments are sent by the Inspector or Chief Inspector to the owner, agent or manager of a mine under the provisions of sub section (*2*) the Inspector or Chief Inspector and the owner agent or manager are unable to agree as to the terms of the special rules to be made under sub section (*1*) or as to the terms of any of such rules, the said Inspector or Chief Inspector shall refer the draft rules for settlement to the Mining Board or where there is no Mining Board, to such officer or authority as the Local Government may, by general or special order, appoint in this behalf

(*4*) A copy of the draft rules as agreed to by the owner, agent or manager and the Inspector or Chief Inspector or, when they are unable to agree, as settled by the Mining Board or such officer or authority as aforesaid shall, together with a notice intimating that any objection or suggestion in respect thereof may be submitted in writing by any person employed in the mine to the said Inspector or Chief Inspector for consideration, be posted up for not less than thirty days in legible characters in English and in the vernacular of the district in some conspicuous place in the mine for the information of the persons employed therein, and a certificate to the effect that this has been done signed by the owner, agent or manager of the mine shall be transmitted to the said Inspector or Chief Inspector, together with two copies of the draft rules

(*5*) When the publication required by sub-section (*4*) has been carried out, the Inspector or Chief Inspector shall forward a copy of the draft rules so published, together with a copy of any objections or suggestions in respect thereof received by him, to the Local Government

(*6*) The special rules, when approved by the Local Government, with such modifications (if any) as it may think fit, shall be published in like manner as is provided in sub section (*4*) respecting the publication of the draft, and, on such publication, shall have effect as if enacted in this Act

Provided that the Local Government may at any time by order in writing, which shall be published in like manner as aforesaid, rescind, in whole or in part, any rules so made, and that thereupon such rules shall cease to have effect accordingly

Penalties

Penalties for offences **22** (*1*) Whoever—

(*a*) obstructs the Chief Inspector or an Inspector of Mines in the discharge of his duties under this Act, or refuses or wilfully neglects to furnish him with the means necessary for making any entry, inspection, examination or inquiry thereunder in relation to any mine, or

(*b*) counterfeits or knowingly makes a false statement in any certificate or in any official copy of a certificate granted under this Act, or

(*c*) knowingly uses as true any such counterfeit or false certificate or

(*d*) makes or produces or uses any false declaration, statement or evidence knowing the same to be false for the purpose of obtaining, for himself or for any other person a certificate or the renewal of a certificate, or any employment under this Act or

(*e*) contravenes any provision of this Act or any rule or order thereunder for the breach of which no penalty is otherwise provided, where the act done has resulted in loss of life or serious bodily injury to any person,

shall be punishable with imprisonment for a term which may extend to three months or with fine which may extend to five hundred rupees or with both

(*2*) Whoever—

(*a*) falsifies any plan or register or record required to be maintained by or under this Act or,

(*b*) being the owner agent or manager of a mine, omit to give the prescribed notice of an accident in the mine or to make or furnish any prescribed plans or returns, or

(*c*) makes, gives or delivers any such plan, register record, notice or return containing a statement, entry or detail which is not to the best of his knowledge or belief, true

shall be punishable with fine which may extend to five hundred rupees

(*3*) Whoever—

(*a*) employs or allows to be employed in or about a mine, or allows to enter a mine or part of a mine any person in contravention of any provision of this Act or of any rule or order thereunder, or

(*b*) allows any person to perform any work forbidden by, or to work in contravention of, any such provision, or

(c) fails to comply with any requisition or order made under any such provision, or,

(d) being the owner, agent or manager of a mine, fails to maintain correctly, or to produce, any prescribed plan, or

(e) contravenes any provision of this Act or any rule or order thereunder for the breach of which no penalty is otherwise provided,

shall be punishable with fine which may extend to two hundred rupees, and, in the case of a continuing breach under clause (c) of this sub section, with a further fine which may extend to fifty rupees for every day during which the breach is proved to have been persisted in after the date of the receipt by him of the order or requisition referred to in such clause

Miscellaneous

Prosecution of owner agent or manager

23 No prosecution shall be instituted against any owner, agent or manager for any offence against this Act or any rule or order thereunder except at the instance of the Chief Inspector or an Inspector of Mines

Limitation of prosecutions

24 No Court shall take cognizance of any offence against this Act or any rule or order thereunder unless complaint thereof is made within six months of the date on which the offence is alleged to have been committed

Cognizance of offences

25. No Court inferior to that of a Magistrate of the first class or Sub divisional Magistrate shall try any offence against this Act or any rule or order thereunder which is alleged to have been committed by any owner, agent or manager of a mine or any offence which is punishable with imprisonment.

Reference to Mining Board or Committee in lieu of prosecution in certain cases

26. If the Court trying any case instituted on the complaint of the Chief Inspector or an Inspector of Mines under this Act is of opinion that the case is one which should, in lieu of a prosecution, be referred to a Mining Board or a Committee, it may stay the criminal proceedings, and report the matter to the Local Government with a view to such reference being made

Decision of question whether a mine is under this Act

27 If any question arises as to whether any excavation or working is a mine within the meaning of this Act, the Local Government may decide the question, and a certificate, signed by a Secretary to the Local Government, shall be conclusive on the point

Evidence of age.

28 If in any inquiry or proceeding under this Act it is necessary to decide the question whether a person is or is not under the age of twelve years, a certificate in writing, signed by a duly qualified person practising medicine or surgery, who states that he has examined such person, and that the age of such person as nearly as can be ascertained from such examination, is or is not under twelve years, shall be received as *primâ facie* evidence of the age of such person

Power to exempt from operation of Act

29 The Governor General in Council may, by notification in the Gazette of India and subject to such limitations and conditions as may seem to him expedient, exempt from the operation of the whole or any part of this Act any local area, or any mine or group or class of mines or any class of persons

Power of Government of India to alter or rescind orders

30 The Governor General in Council or any Local Government shall have authority to reverse or modify any order passed under this Act by any authority subject to his or its control

Application of Act to Crown mines

31 This Act shall apply to mines belonging to the Crown

Exercise of power by Governor General in Council

32 The Governor General in Council may, if he thinks fit, exercise any power which is by this Act conferred upon a Local Government

Temporary Provision

Bar of prosecutions for certain offences committed within one year of commencement of Act

33 No Court shall take cognizance of any offence punishable under section 22, sub section (1), clause (e), or sub section (3), which is alleged to have been committed by any person within one year from the commencement of this Act

PACIFIC OCEAN—PHILIPPINE ISLANDS—LUZON

Balintang channel—Shoal soundings obtained

THE British Admiralty has given notice (No 139 of 1901) that broken water was seen, and the following line of soundings obtained from the U S S *New Orleans* steering to the northward in the Balintang channel, north coast of Luzon —

> 150 fathoms, no bottom, in lat 19° 40 N, long 121° 28 E, then 20 fathoms hard bottom, 54 fathoms rock, 38 fathoms rock, 54 fathoms coral, and finally 100 fathoms no bottom, in lat 19° 47′ N, long 121° 26 E

The soundings were obtained at about equal intervals between these two positions.

The broken water may be only a tide rip, but it is possible that shoaler water exists, as this break was seen by the same vessel on a previous occasion in the vicinity (*Notice No 139 of 1901*)

This Notice affects the following Admiralty Charts —China Sea, No 2661b Luzon island, norther portion, No 2454 Also, China Sea Directory, vol 3, 1894, pages 228, 229, and Supplement, 1898, page 20

PACIFIC OCEAN—CAROLINE ISLANDS

Suk or Pulusuk, Pozoat—Reefs and tides in the vicinity of—

NOTICE TO MARINERS No 146 of 1901 issued by the British Admiralty is republished

The following information, dated 20th November 1900 has been received from Mr J G Hitchfield, commanding the schooner *Queen of the Isles*, respecting the reefs and tides in the vicinity of Suk, and Pozoat, Caroline Islands —

a Mr Hitchfield states that the Susanne reef, Pulusuk island, and the shoal reported in 1896, are connected together by a bank on which there is a depth of 12 fathoms or less The tide is said to run strongly over this bank, the flood setting to the eastward and the ebb to the westward

Approximate position, lat 6° 55 N, long 149° 15 E

b The Uranie bank is said to be connected to Pozoat island

Approximate position, lat 7° 22′ N, long 149° 25′ E

c A bank, now called Hitchfield bank, with a depth over it of 11 fathoms or less, and 4 or 5 miles in diameter, was passed over in lat 7° 46′ N, long 149° 42 E (*Notice No 146 of 1901*)

This Notice affects the following Admiralty Charts —Pacific, No 781 Caroline islands, No 980 Also, Pacific islands, vol I, 1900, page 429
